PREFACE

The 1960 Census of Agriculture for American Samoa was authorized by an Act of Congress (Title 13, U. S. Code-Census, codified August 1954 and amended in August 1957). Section 191 of Title 13 provided that the Census shall include each State, the Virgin Islands, Guam, the Commonwealth of Puerto Rico, and other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Section 191 further provided that the census data for American Samoa may be collected by the Governor, or highest ranking Federal official, in accordance with plans prescribed or approved by the Director of the U. S. Bureau of the Census.

In accordance with the provisions of Title 13, collection of the data for the 1960 Census of Agriculture in American Samoa was directed and supervised by the Governor of American Samoa. The actual collection of data was carried out by census enumerators supervised by Falefatu Utu under the direction of the Governor. The planning of the Census and the compilation of the statistics were supervised by Ray Hurley, Chief of the Agriculture Division, assisted by Joseph Correll and Helen Teir.

November 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
	New England States:		West North Central—Continued		Mountain:
1	Maine.	19	South Dakota.	38	Montana.
2	New Hampshire.	20	Nebraska.	39	Idaho.
3	Vermont.	21	Kansas.	40	Wyoming.
4	Massachusetts.		South Atlantic:	41	Colorado.
5	Rhode Island.	22	Delaware.	42	New Mexico.
6	Connecticut.	23	Maryland.	43	Arizona.
	Middle Atlantic States:	24	Virginia.	44	Utah.
7	New York.	25	West Virginia.	45	Nevada.
8	New Jersey.	26	North Carolina.		Pacific:
9	Pennsylvania.	27	South Carolina.	46	Washington.
	East North Central:	28	Georgia.	47	Oregon.
10	Ohio.	29	Florida.	48	California.
11	Indiana.		East South Central:	49	Alaska.
12	Illinois.	30	Kentucky.	50	Hawaii
13	Michigan.	31	Tennessee.		Other Areas:
14	Wisconsin.	32	Alabama.	51	American Samoa.
	West North Central:	33	Mississippi.	52	Guam.

16	Iowa.	34	Arkansas.	54	Virgin Islands.
17	Missouri.	35	Louisiana.		
18	North Dakota.	36	Oklahoma.		
		37	Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

MAP NO. G-4

INTRODUCTION

THE 1960 CENSUS OF AGRICULTURE

History of the Census.—The 1960 Census of Agriculture is the fifth United States agricultural census of American Samoa. The first such census was taken in 1920, in conjunction with the Census of Population. Since 1920, a census of agriculture has been taken in American Samoa every 10 years, at the same time as the population census.

Legal Basis for the Census.—The 1960 Census of Agriculture was authorized by an Act of Congress, as were the prior censuses of American Samoa. "Title 13, United States Code-Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for the census of agriculture as well as for all other censuses and surveys conducted by the Bureau of the Census. Section 191 of Title 13 specifically provides that the censuses "shall include each State.... and as may be determined by the Secretary (of Commerce), such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty." Section 191 further provides that the census data for these areas may be collected by the Governor or highest ranking Federal official in accordance with plans prescribed or approved by the Director of the Bureau of the Census (acting for the Secretary of Commerce). Pursuant to this provision, collection of data for the 1960 Census of Agriculture was directed and supervised by the Governor of American Samoa according to procedures prescribed by the Bureau of the Census.

Enumeration Personnel.—In the 1960 Census of Agriculture, for the first time, the enumeration was done by agricultural extension agents on the staff of the Government of American Samoa. They, and their supervisor, received special training for the census in accordance with instructions prepared by the Bureau of the Census.

Enumeration Period.—The enumeration for the Census of Agriculture began on April 1, 1960. Most of the enumeration was completed within two weeks thereafter.

Data for inventory items—land in farms, fruit and nut trees, livestock, and poultry—represent the situation existing on or about April 1, 1960. Data for area harvested and for quantities of crops harvested relate to the crop year 1959.

CENSUS FORMS AND PROCEDURES

The Agriculture Questionnaire.—The questionnaire for the 1960 Census of Agriculture was prepared by the staff of the Census Bureau in cooperation with the Governor of American Samoa. It contained a total of 38 inquiries, as compared with 31 on the questionnaire for the 1950 Census. Selection of the inquiries was based on current needs for agricultural information as well as on experience gained in earlier censuses.

The 1960 questionnaire contained more detailed questions about land tenure than had been asked in any previous census in American Samoa. Specifically, each operator was asked to give separate figures for the amount of land he owned, land he rented from others, and land he rented to others, regardless of where the land was located. To assure as nearly exact a measurement of land area as possible, the questionnaire contained provision for the area to be reported either in square feet or in acres. This provision facilitated the reporting of plots or parcels of land that amounted to small fractions of an acre. Enumerators were instructed to pace off plots or tracts of land, themselves, whenever necessary to help an operator arrive at a valid estimate of the area of the land under his control. Also, to minimize the likelihood that scattered plots of land might be overlooked, each operator was asked to report the number of "separate tracts or pieces of land, or plantations" that comprised the total area of the place he operated.

In the sections for crops, the 1960 questionnaire contained separate inquiries for 7 field crops and vegetables and for 14 kinds of fruits, nuts, and tree crops as compared with 6 and 12, respectively, on the 1950 questionnaire. Both questionnaires contained provision for reports of additional crops that were not specified by individual inquiries.

The questions on livestock and poultry were essentially the same in 1960 as in 1950. The chief difference is that the 1960 questionnaire omitted specific inquiries for carabaos, sheep, and goats. Space for reporting them was provided in a question about "other livestock."

Enumeration Districts.—For purposes of enumeration, American Samoa was divided into 27 Enumeration Districts, or "ED's." The ED's were clearly outlined on special maps prepared for the census. Each enumerator was required to canvass the entire area within his assigned ED's, and to indicate his route of travel on the map. This procedure was designed to assure complete enumeration coverage of all land and dwellings in American Samoa.

Processing Operations.—After the completion of enumeration, all agriculture questionnaires were sent to the Agriculture Operations Office in Parsons, Kansas. There, all questionnaires were individually edited and coded prior to tabulation of the data. In the editing process, questionnaires that did not represent farms according to the Census definition were withdrawn from further processing. (See below, "Census definition of a farm.") The remaining questionnaires were then examined for completeness and consistency. Errors in calculations and in units of measure, inconsistencies, and misplaced entries were corrected. Incomplete reports were adjusted on the basis of related information on the same questionnaire or on questionnaires for nearby farms of similar size. In the coding process, numerical codes were entered on all questionnaires to classify farms by size, in terms of total area, and by tenure of operator. As necessary for tabulation purposes, numerical codes were also assigned to individual items to assure their inclusion in the appropriate farm product totals.

After the questionnaires had been edited and coded, the information on them was transferred to tabulation sheets. Subject-matter specialists of the Bureau of the Census examined the tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further reappraisal of the original reports before approving the data for publication.

Presentation of Statistics.—This report contains data as compiled from the questionnaires used for the 1960 Census of Agriculture in American Samoa. Totals are given for American Samoa, as a whole, and also for each district and county. Comparable figures are given for preceding census years for those items for which information is available.

DEFINITIONS AND EXPLANATIONS

The definitions and explanations that follow refer specifically to the 1960 Census of Agriculture in American Samoa. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the 1960 agriculture questionnaire in the appendix of this report.

GENERAL FARM INFORMATION

Census Definition of a Farm.—A farm is defined as any "place" on which crops were harvested in 1959, or on which any livestock or five or more poultry were kept on or about April 1, 1960. The term "place" designates all land that was operated under the control or supervision of one person. The 1960 definition is entirely comparable with the definition of a farm as used for the 1950 and 1940 Censuses of Agriculture in American Samoa.

To avoid biases that might arise from varying interpretations of the definition, the Census Bureau did not give enumerators the definition of a farm in either the 1960 or the 1950 Censuses. In the 1960 Census, enumerators were instructed to obtain an agriculture questionnaire for each Matai who had title to land or claimed ownership of land; for each person who was not a Matai but who had charge of raising crops in 1959, or of keeping livestock or poultry on privately owned land on April 1, 1960; and for each agricultural experiment station, school, church, or other institution that had land on which crops were raised in 1959, or on which livestock or poultry were kept on April 1, 1960. The determination as to which questionnaires represented farms was made during the processing operations. The relatively few questionnaires that did not represent farms were excluded from the tabulations.

In the 1950 Census, enumerators were instructed to find out whether any member of a household raised crops in 1949, or kept livestock or poultry on April 1, 1950, and, if so, to fill a questionnaire for the person in charge of the agricultural operations. In the 1940 Census, enumerators were given the definition of a farm and instructed to fill a questionnaire for each farm. In the 1930 Census, two questionnaires were used, one for crops and the other for livestock. Any place on which crops were raised was counted as a farm. Places on which only livestock or poultry were kept were counted as "nonfarm places." In this report, the data for farms and nonfarm places are combined. Hence, the livestock figures for 1930 are comparable with those for the later years.

Farm Operator.—The term "farm operator" designates a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a tenant or renter, or the manager or superintendent of an institutional farm. For Matai lands, the Matai was always considered as the operator of land used for the benefit of the extended family group (aiga). An individual member of the family group who raised crops or kept livestock or poultry for his own account on land assigned him by the Matai was considered as the operator of the land so assigned. By definition the number of farm operators is the same as the number of farms.

Farms Reporting.—Figures for farms reporting represent the number of farms for which the specified item was reported. For example, if there were 150 farms in a county and only 130 of them reported chickens on hand, the number of farms reporting chickens would be 130. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Land in Farms.—The land to be included in each farm was determined from the reports for land owned, land rented from others, and land rented to others.

Land Owned includes all land which the operator held by legal ownership title, and also land which he claimed to own, without title.

Land Rented From Others includes all land used by the operator, other than land he owned, whether or not any rent was paid to the owner.

Land Rented to Others includes all land that the operator assigned to others for their own operations, whether or not he received any rental payment for it.

The figures for land owned and land rented from others were first added together and then the figure for land rented to others was subtracted. The result represents the amount of land in the farm. The data as originally reported for each farm were in terms of acres or of square feet. In this report, all area figures are given in terms of acres (43,560 square feet equal one acre).

In the 1950 Census, land in farms was based solely on the reported number of acres "in the property." The term "property" was used to designate all land operated under the control or supervision of one person but detailed specifications were not given on the questionnaire. The data for land in farms in 1950 are, nevertheless, believed comparable with those for 1960. Data for land in farms were not obtained in censuses prior to 1950.

Crops Harvested.—For field crops and vegetables, including pineapples, enumerators were instructed to record the area harvested in 1959 in terms of square feet, whenever possible. In the event that an operator was unable to report the number of square feet, the enumerator was instructed to pace off two sides of the plot or tract of land used for each individual crop as a basis for estimating the area. Crops or tracts for which the square feet of area could not be determined were recorded in terms of the number of plants or hills harvested. These reports were converted to square feet or acres during the processing operations on the basis of information for other farms of similar size and crop production. In cases where two or more crops were harvested from the same land in 1959, the entire area was to be reported for each crop. The quantity of each field crop and vegetable harvested was recorded in number of roots (or fruits) or in number of plants, as applicable to the individual crop. A hurricane which struck parts of Manua District early in 1959 caused considerable damage to some crops. The taro crop, particularly, was drastically reduced as reflected in the data reported for area and quantity harvested in 1959 compared with the area harvested in 1949.

For fruits, nuts, and other tree crops, data were obtained for the total number of bearing and nonbearing trees and plants on the place at the time of enumeration and for the number planted since January 1, 1955. For bananas, the number of hills or clumps was reported rather than the number of individual plants. No attempt was made to determine the amount of land area in tree crops. The quantity harvested was recorded either in pounds or in number of fruits or nuts. For this report, data in

terms of number were converted to pounds during the processing operations on the basis of average weights supplied by enumerators.

This report contains comparable data for earlier census years for acreages or numbers of trees or plants for most of the crops included in the enumeration. For quantities harvested, however, the data obtained in censuses prior to 1960 were so incomplete that they are not published. The data for quantity harvested for 1960 are subject to considerable error because of the difficulty of obtaining accurate reports from many farm operators.

Livestock and Poultry.—Data for livestock and poultry on farms represent the number on hand at the time of enumeration. For Matai lands, all livestock and poultry owned by the Matai and the extended family group were to be reported. For privately operated lands, all livestock and poultry that were on each place at the time of enumeration were to be reported, regardless of ownership. Enumerators were instructed to verify reported data by making an actual count, whenever possible.

CLASSIFICATION OF FARMS

Farms by Size.—Farms were classified by size on the basis of the total land area established for each farm. According to the Census definition, a farm is essentially an operating unit, not an ownership tract. In the case of tenants, the land assigned to each tenant is considered a separate farm, even though the landlord may regard his entire landholding as one unit rather than as several separate units. Likewise, land assigned by a Matai to an individual member of the family group for his own use is considered a separate farm.

Farms by Tenure of Operator.—Farms were classified by tenure of operator on the basis of data reported for land owned, land rented from others, and land rented to others. During the processing operations, each questionnaire was coded to indicate whether the farm operator was a full owner, a part owner, or a tenant. These three classifications are described below.

Full Owners operate only land they own. In the case of Matai lands, the operator was classified as a full owner if the Matai held title or claimed ownership of all land used by members of the family group, whether for individual or group benefit.

Part Owners operate land they own and also land they rent from others. If a Matai held title or claimed ownership of only part of the land used by members of the family group, the operator was classified as a part owner, whether or not any rent was paid for the additional land.

Tenants operate only land they rent from others. If a Matai did not hold title or claim ownership of any of the land used by members of the family group, the operator was classified as a tenant, whether or not any rent was paid for the land.

The questionnaire for the 1950 Census did not include any tenure questions comparable to those asked in 1960. Operators were classified either as owners or tenants solely on the basis of names recorded on the questionnaires in answer to inquiries as to who was the operator and who was the owner. The operator was classified as an owner if only the question about operator contained an entry. He was classified as a tenant if the question about owner also contained an entry indicating that some other person owned the land he operated. No attempt was made to distinguish between full owners and part owners. In this report, therefore, the figures given for owners and tenants in 1950 are not strictly comparable with those given for full and part owners and for tenants, respectively, in 1960.

APPENDIX

The Questionnaire

(15)

Form 60A1-46 (1-11-60)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 141, 221–4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. *The census report cannot be used for purposes of taxation, investigation, or regulation.*

Budget Bureau No. 41-6001
Approval expires December 31, 1960.

A1 No.

A1 CENSUS OF AGRICULTURE QUESTIONNAIRE: 1960

OFFICE USE ONLY — R S T C Tr

This Agriculture Questionnaire should also be filled for each Matai, and each school or other type of institution, if any crops were raised or harvested *in 1959*, or if livestock or poultry were kept on *April 1, 1960*.

MATAI LANDS:

a. The Matai should be reported as the person in charge under question 1.

b. All lands to which title is held or ownership is claimed by the Matai should be reported as owned under question 2.

c. Any land used for the benefit of the extended family group (aiga), to which Matai does not hold title or claim ownership, should be reported as land rented from others under question 3. *Do this even though no rent is paid to the owner of the land.*

d Any land to which title is held or ownership claimed by the Matai which is used by a nonmember of the extended family group (aiga), should be reported as land rented to others under question 4. *Do this even though no rent is paid by the nonmember.*

Likewise, if any member of the Matai family (fanau) or extended family group (aiga) is in full charge of the growing of crops or keeping of animals or poultry on lands assigned to him by the Matai, such lands should be entered under question 4. In such cases, a separate Agriculture Questionnaire should be filled, for the lands reported under question 4, in the name of that member as the person in charge.

e. The area for which the Matai is expected to report about crop production is restricted to that shown under question 5.

PRIVATELY OWNED LANDS, NOT HELD OR OPERATED UNDER THE MATAI SYSTEM:

If crops were raised or livestock or poultry are kept, fill this Agriculture Questionnaire in the name of the person in charge. He is the one responsible for making the decisions. He will usually be the head of the family which plants or gathers the crops.

EXPERIMENTAL FARMS, SCHOOLS, CHURCHES, AND OTHER INSTITUTIONS:

If crops were raised or livestock or poultry are kept, fill this Agriculture Questionnaire in the name of the Institution (question 1). Also, give the name of the manager or superintendent under question 1.

Section I.—OPERATOR, TENURE, AND AREA IN THIS PLACE

1. What is the name of the operator? (Person in charge of the agricultural operations. If operator is a Matai, underscore that part of the name which represents his title.) (Name in full) _____
2. How many acres are owned? . . . None ☐ — Acres OR Square feet
   (a) Are these Matai lands? No ☐ Yes ☐
3. How many acres are rented from others? Include land used rent free . . . None ☐ — Acres OR Square feet
   (a) What is the name of the owner of this land? _____ (Name in full)
   (b) Are these Matai lands? No ☐ Yes ☐
4. How many acres are rented to others? Include lands for which no rent is received None ☐ — Acres OR Square feet

Enumerator: 5. Add answers for questions 2 and 3, subtract answer for question 4, and enter the total here → Area in this place — Acres OR Square feet

Then ask—

6. How many separate tracts or pieces of land, or plantations, are represented in the total for "Area in this place"? Number of tracts or pieces _____

Section II.—CROPS AND VEGETABLES HARVESTED IN 1959

For each crop or vegetable harvested, ask these two questions →			(1) How much was harvested *in 1959?*		(2) How much area was harvested *in 1959?* (If unable to estimate the area, ask for the number of plants or hills)	
			Number of roots or fruits OR Number of plants		Square feet OR Number of plants or hills	
		No	Yes			
Were any of the following crops or vegetables harvested *in 1959*—	7. Taro?	☐	☐			
	8. Yams?	☐	☐			
	9. Arrowroot?	☐	☐			
	10. Sugarcane for thatching?	☐	☐			
	11. Sweetpotatoes?	☐	☐			
	12. Tobacco?	☐	☐			
	13. Pineapples?	☐	☐			
	14. Other field crops and vegetables? (Cassava, corn, kava (ava), giant taro, etc.). Give name	☐	☐			

Section III.—FRUITS, NUTS, AND TREE CROPS: QUANTITY HARVESTED IN 1959 AND TREES OR PLANTS, APRIL 1, 1960

For each kind of fruit, nut, or tree crop on this place, ask these questions →			(1) How much was harvested *in 1959?*		(2) How many trees or plants are on this place?	
			Number of pounds OR Number of fruits or nuts		Total trees of all ages	Planted *since 1955?*
		No	Yes			
Were any of the following fruits, nuts, and tree crops harvested *in 1959*—	15. Avocados?	☐	☐			
	16. Bananas?	☐	☐		Hills or clumps	Hills or clumps
	17. Breadfruit?	☐	☐			
	18. Cacao?	☐	☐			
	19. Citrons?	☐	☐			
	20. Coconuts?	☐	☐			
	21. Coffee?	☐	☐			
	22. Grapefruit?	☐	☐			
	23. Lemons?	☐	☐			
	24. Limes?	☐	☐			
	25. Mangoes?	☐	☐			
	26. Oranges?	☐	☐			
	27. Pandanus?	☐	☐			
	28. Papayas?	☐	☐			
	29. Other planted fruits, nuts, and tree crops? (Kapok, paper mulberry). Give name	☐	☐			

Section IV.—LIVESTOCK AND POULTRY ON THIS PLACE APRIL 1, 1960

How many of the following livestock and poultry are on this place—

30. Cattle and calves of all ages? . . None ☐ Number _____
Of this total, how many are—
31. Milk Cows? . . None ☐ Number _____
32. Other cattle and calves? . . . . . None ☐ Number _____
(The sum of questions 31 and 32 must equal the total for question 30.)
33. Hogs and pigs of all ages? . . None ☐ Number _____
34. Horses, mules, and colts of all ages? . . None ☐ Number _____
35. Other livestock? (Sheep and lambs and goats)
_____ (Give name) None ☐ Number _____
_____ (Give name) Number _____
36. Chickens of all ages? . . . . . None ☐ Number _____
37. Other poultry of all ages? (Ducks, geese, etc.)
_____ (Give name) None ☐ Number _____
_____ (Give name) Number _____

38. Who furnished the information given in this report? (*Mark* one) → ☐ Matai named as operator under question 1. ☐ Other person _____ (Give name) (Tell why you got your information from this person.)

PREFACE

The 1960 Census of Agriculture for Guam was authorized by an Act of Congress (Title 13, U. S. Code, Census codified August 1954 and amended in August 1957). Section 191 of Title 13 provided that the Census shall include each State, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico. Section 191 further provided that the census data for Guam may be collected by the Governor, or highest ranking Federal official, in accordance with plans prescribed or approved by the Director of the U. S. Bureau of the Census.

In accordance with the provisions of Title 13, collection of the data for the 1960 Census of Agriculture in Guam was directed and supervised by the Governor of Guam. The actual collection of data was carried out by census enumerators supervised by Manuel U. Lujan and Antonio C. Cruz working under the direction of the Governor. The planning of the Census and the compilation of the statistics were supervised by Ray Hurley, Chief of the Agriculture Division, assisted by Joseph Correll and Helen Teir.

Acknowledgment is made of the technical assistance of the personnel of the Guam Department of Agriculture in the planning of the Census.

May 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
	New England States:		West North Central—Continued		Mountain:
1	Maine.	19	South Dakota.	38	Montana.
2	New Hampshire.	20	Nebraska.	39	Idaho.
3	Vermont.	21	Kansas.	40	Wyoming.
4	Massachusetts.		South Atlantic:	41	Colorado.
5	Rhode Island.	22	Delaware.	42	New Mexico.
6	Connecticut.	23	Maryland.	43	Arizona.
	Middle Atlantic States:	24	Virginia.	44	Utah.
7	New York.	25	West Virginia.	45	Nevada.
8	New Jersey.	26	North Carolina.		Pacific:
9	Pennsylvania.	27	South Carolina.	46	Washington.
	East North Central:	28	Georgia.	47	Oregon.
10	Ohio.	29	Florida.	48	California.
11	Indiana.		East South Central:	49	Alaska.
12	Illinois.	30	Kentucky.	50	Hawaii
13	Michigan.	31	Tennessee.		Other Areas:
14	Wisconsin.	32	Alabama.	51	American Samoa.
	West North Central:	33	Mississippi.	52	Guam.
15	Minnesota.		West South Central:	53	Puerto Rico.
16	Iowa.	34	Arkansas.	54	Virgin Islands.
17	Missouri.	35	Louisiana.		
18	North Dakota.	36	Oklahoma.		
		37	Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

MAP NO. G-4

INTRODUCTION

THE 1960 CENSUS OF AGRICULTURE

History of the Census.—The 1960 Census of Agriculture is the fifth United States agricultural census of Guam. The first such census was taken in 1920, in conjunction with the Census of Population. Since 1920, a census of agriculture has been taken in Guam every 10 years, at the same time as the population census.

Legal Basis for the Census.—The 1960 Census of Agriculture was authorized by an Act of Congress, as were the prior censuses of Guam. "Title 13, United States Code—Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for the census of agriculture as well as for all other censuses and surveys conducted by the Bureau of the Census. Section 191 of Title 13 specifically provides that the censuses "shall include each State, . . . the Virgin Islands, Guam, and the Commonwealth of Puerto Rico" as well as other areas under the jurisdiction or control of the United States. Section 191 further provides that the census data for these areas may be collected by the Governor or highest ranking Federal official in accordance with plans prescribed or approved by the Director of the United States Bureau of the Census. Pursuant to this provision, collection of data for the 1960 Census of Agriculture in Guam was directed and supervised by the Governor of Guam according to procedures prescribed by the Bureau of the Census.

Pretest of the 1960 Census.—A "pretest" of the 1960 Census of Agriculture was conducted in Guam during April 1958. Its purpose was to provide the Bureau with a measure of the effectiveness of the questions and procedures planned for the 1960 Census. During the pretest, agricultural agents on the staff of the Guam Department of Agriculture, using preliminary versions of the agriculture questionnaire and the enumerators' reference manual, interviewed approximately 300 farmers.

Training of Enumeration Personnel.—Each supervisor, crew leader, and enumerator employed for the 1960 Census of Agriculture in Guam received special training for his job. All training was presented according to procedures contained in guides and manuals prepared by the Bureau of the Census. It included filmstrips, map reading, practice interviewing, and practice filling of questionnaires.

Enumeration Period.—The enumeration for the Census of Agriculture began on April 4, 1960. The bulk of the work was completed within two weeks thereafter.

Data for inventory items—land in farms, fruit and nut trees, livestock, poultry, and fishponds—represent the situation existing on or about April 1, 1960. Data for area harvested and for quantities of crops harvested or gathered relate to the crop year 1959.

ENUMERATION FORMS AND PROCEDURES

The Agriculture Questionnaire.—The questionnaire for the 1960 Census of Agriculture was prepared by the staff of the Census Bureau in cooperation with the Governor of Guam. It contained a total of 65 inquiries as compared with only 39 on the questionnaire for the 1950 Census. Selection of the inquiries was based on current needs for agricultural information as well as on experience gained in earlier censuses.

The 1960 questionnaire contained more detailed questions about land tenure than had been asked in any previous census in Guam and was the first questionnaire to include questions about land use in Guam. In the section on tenure, each operator was asked to give separate figures for the amount of land owned, rented to others, rented from others, used under permit, occupied as a squatter (or borrower), or furnished by the Government in connection with living quarters. The reports for land owned and land rented to others specifically excluded land used by the United States Military Services. The combined area of land reported by each operator, minus the land he rented to others, was taken to represent one Census farm, regardless of where the land was located. In six questions about land use, the area in each farm was distributed according to its principal use.

In the sections for crops, the 1960 questionnaire contained separate inquiries for 20 field crops and vegetables and for 17 kinds of fruits and nuts as compared with 9 and 14, respectively, on the 1950 questionnaire. Both the 1960 and the 1950 questionnaires contained space for the reporting of crops that were not specified in individual inquiries.

The questions on livestock and poultry were essentially the same in 1960 as in 1950. The only difference was that the 1960 questionnaire specified chickens 4 months old and over whereas the 1950 questionnaire referred to chickens of all ages.

About two weeks before the start of enumeration, agriculture questionnaires were distributed through post offices to most households in rural areas. A letter was attached to each questionnaire asking the farm operator to fill the questionnaire and to give it to the enumerator when he called. The purpose of this procedure was to save time and money in taking the census and to improve the quality of the information given by farm operators. By having the questionnaire ahead of time, the farmer could determine what information was required and could prepare his report in advance of the enumerator's visit. The enumerator, however, was directly responsible for obtaining a questionnaire for each place requiring one. If the farm operator had filled the questionnaire, the enumerator was instructed to examine it for completeness and consistency and, as necessary, to help the operator arrive at valid estimates of his agricultural operations.

The Enumeration.—The questionnaire used by enumerators for taking the 1960 Census of Population and Housing in Guam contained the question "Does anyone living in this house operate a farm?" If this question was answered "Yes," the enumerator knew that he must obtain an agriculture questionnaire for the farm operator. If it was answered "No," the enumerator was instructed to ask whether any member of the household harvested or gathered any crops in 1959, kept any livestock or poultry on April 1, 1960, or had a fishpond on April 1, 1960. A "Yes" answer to any one of these additional questions indicated that an agriculture questionnaire was required. The enumerator was also instructed to ask enough questions about tracts of land on which no one lived to determine whether an agriculture questionnaire was required for the person in charge of the land. This instruction was designed to assure enumeration of all land used for agriculture, whether operated by an individual, a partnership, a corporation, or an institution.

Enumeration Districts.—For purposes of enumeration, the Territory of Guam was divided into 95 Enumeration Districts, or "ED's." The ED's were clearly outlined on special maps prepared for the census. Each enumerator was required to canvass the entire area within his assigned ED and to indicate his route of travel on the map. This procedure was designed to assure complete enumeration coverage of all land and dwellings in Guam.

Processing Operations.—After the completion of enumeration, all agriculture questionnaires were sent to the Agriculture Operations Office in Parsons, Kansas. There, all questionnaires were individually edited and coded prior to tabulation of the data. In the editing process, questionnaires that did not represent farms according to the Census definition were withdrawn from further processing. (See below, "Census definition of a farm.") The remaining questionnaires were then examined for completeness and consistency. Errors in calculations and in units of measure, inconsistencies, and misplaced entries were corrected. Incomplete reports were adjusted on the basis of related information on the same questionnaire or on questionnaires for nearby farms of similar size. In the coding process, numerical codes were entered on all questionnaires to classify farms by size, in terms of total area, and by tenure of operator. As necessary for tabulation purposes, numerical codes were also assigned to individual crop and livestock items to assure their inclusion in the appropriate farm product totals.

After the questionnaires had been edited and coded, the information on them was transferred to tabulation sheets. These tabulations were reviewed for reasonableness and consistency.

Presentation of Statistics.—This report contains data as compiled from the questionnaires used for the 1960 Census of Agriculture in Guam. Totals are given for the Territory of Guam and also for the 19 Election Districts. Comparable figures for preceding census years are given for the Territory of Guam for those items for which information is available

In the 1950 and 1940 Censuses, data were compiled for municipalities. Prior to the 1960 Census, the 15 municipalities were rearranged into 19 Election Districts. Because of differences in boundaries resulting from the rearrangement, comparable data for prior censuses could not be presented for Election Districts.

DEFINITIONS AND EXPLANATIONS

The definitions and explanations that follow refer specifically to the 1960 Census of Agriculture but many of them also apply to earlier censuses. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the 1960 Agriculture Questionnaire in the appendix of this report.

GENERAL FARM INFORMATION

Census Definition of a Farm.—For the 1960 Census of Agriculture in Guam, a farm was defined as any "place" on which crops were grown in 1959, or on which any livestock, or five or more poultry, were kept on or about April 1, 1960. The word "place" designates all land under the control of one person or partnership, exclusive of land used by the United States Military Services. Control may have been exercised through ownership or management or through a lease, rental, permit, squatter, or governmental arrangement.

To avoid biases arising from an enumerator's personal judgment as to what constitutes a farm, the Census Bureau stressed the concept that the Census of Agriculture was a census of agricultural operations (including fishponds) rather than a census of farms. Accordingly, enumerators were not given the definition of a farm but were instructed to obtain questionnaires for all persons who considered themselves as farm operators and for all other persons who had charge of harvesting or gathering crops in 1959, or of keeping livestock, poultry, or fishponds on April 1, 1960. Consequently, questionnaires were filled for a number of places that did not qualify as farms. The determination as to which questionnaires represented farms was made during the processing operations. Only those questionnaires meeting the Census definition of a farm were included in the tabulations.

The 1960 Census definition of a farm is comparable with the definition adopted for the 1950 Census. In the 1940 Census, however, a farm was defined as follows: "The term 'farm' . . . relates to any parcel or parcels of land—regardless of size and of value of production—on which crops were grown by one person, either alone or with the aid of members of his household or of hired help." Questionnaires containing reports of livestock only, with no crops, were considered to represent "nonfarm places." In the 1940 Census report for "Territories and Possessions," the 1940 data for Guam are given for farms and nonfarm places separately. In the 1950 and 1960 reports, the 1940 data represent totals for farms and nonfarm places combined.

In the 1930 Census, the questionnaire for crops contained the following definition of a farm: "A farm for Census purposes is all the land directly farmed by one person, either by his own labor alone or with the assistance of members of his household or hired employees." A separate questionnaire was used for the enumeration of livestock whether they were on farms or elsewhere.

In the 1920 Census, also, separate questionnaires were used for crops and for livestock but neither one contained the definition of a farm. Moreover, no attempt was made to classify data according to farms or nonfarm places.

Farm Operator.—The term "farm operator" designates a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a hired manager, a tenant, a renter, a squatter, or a person who operates land under a permit or rent-free arrangement with the Government of Guam. If he rents land to others, he is considered as operator only of the land he retains for his own use. For farms operated in partnership, only one partner is counted as an operator. By definition, the number of farm operators is the same as the number of farms.

Farms Reporting.—Figures for "farms reporting" represent the number of farms for which the specified item was reported. For example, if there were 120 farms in an Election District and only 100 had chickens on hand, the number of farms reporting chickens would be 100. The difference between the total number of farms and the farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Land in Farms.—The land to be included in each farm was determined from the answers to questions 2 through 7, which relate to land tenure. (See the facsimile of the questionnaire in the appendix.) The amounts of land reported as owned, rented from others, used under permit, occupied on a squatter basis, and furnished by the Government were first added together and then the amount of land reported as rented to others was subtracted. The result represented the land in the farm.

In both the 1960 and the 1950 Censuses, all data for land area were obtained in terms of hectares and ares rather than acres, as in earlier censuses. In this report, all figures for land area are given in terms of hectares (100 ares = 1 hectare). The corresponding acreage figures for years prior to 1950 were converted to hectares (2.47 acres = 1 hectare).

Land Owned.—All land that an operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate was considered as owned.

However, the reports for land owned exclude land used by the United States Military Services.

Land Rented to Others.—This item includes all land that an operator rented or leased to others, except land used by the United States Military Services, and also land he assigned to others on a share basis or permitted others to occupy rent-free.

Land Rented from Others.—This item includes land that the operator rented or leased from private owners, whether individuals, partnerships, or corporations, and also land that he worked on shares for others.

Land Used under Permit.—Rights to use land owned or controlled by the Government of Guam are in the form of permits rather than lease or rental arrangements. Accordingly, this item includes all land for which the operator had a Government permit.

Land Occupied as a Squatter.—This item includes all land that the operator occupied on a "borrower" basis with neither ownership rights to the land nor any kind of permit, lease, governmental, or rental agreement.

Land Furnished with Living Quarters.—This item includes all land that the Government of Guam furnished to the operator in connection with living quarters.

Land in Two or More Election Districts.—An individual farm was always enumerated in the Election District in which the farm operator lived, regardless of where the farmland was located. If an operator had a residence in more than one Election District, his farm was to be enumerated in the Election District where his family lived or, if he had no family, in the Election District where he lived for the greater part of the year.

Land in Farms According to Use.—In this report, land in farms has been distributed according to the way in which it was used, as reported for the 1960 Census. The land uses described in the following paragraphs are mutually exclusive in that each hectare of land was to be reported in only one land-use classification even though it may have had more than one use during the year. No reports of land use were required for places of less than 10 ares. Since questions on land use were asked for the first time in the 1960 Census, there are no comparable data for earlier years.

Land used for crops refers to all land that was used for crops at any time in 1959, except land used only for soil-improvement crops. It includes land from which any crop was harvested; land in growing crops to be harvested after 1959; and land planted to both bearing and nonbearing fruit and nut trees, plants, and shrubs. Land from which two or more crops were harvested in 1959 was to be reported only once.

Cropland used for pasture includes all cropland that was used only for pasture in 1959, or in the first quarter of 1960. Land planted to crops was specifically excluded, even in cases where the crops were not harvested.

Cropland not used for crops or pasture includes idle cropland, land planted to soil-improvement crops not harvested, and any unused land that could, in the opinion of the operator, be satisfactorily cleared, planted, and cultivated for the production of field crops, vegetables, fruits, or nuts.

Pastureland used for pasture or grazing includes all land that was actually used for the grazing of livestock in 1959 or in the first quarter of 1960. It does not include any cropland, even if the cropland was used for pasture or grazing.

Pastureland not used for pasture or grazing includes all land that did not qualify as cropland but that could, in the opinion of the operator, support enough plant growth for grazing, provided the clearing and grazing of the land would not seriously damage it.

Other land includes all land that did not qualify as either cropland or pastureland, such as house lots, barn lots, land area of ponds, ditches, swamps, steep slopes, cliffs, roads, brushland, wasteland, and forest areas.

CROPS

The 1960 agriculture questionnaire contained individual inquiries for all crops commonly grown in Guam; space was also provided for the reporting of any additional crops that were harvested in 1959.

Field Crops and Vegetables.—The total quantity of each field crop and vegetable harvested in 1959 was always to be reported, even in cases where the farm area amounted to less than 10 ares. The area from which an individual crop was harvested was asked only if the quantity amounted to 50 pounds or more. Therefore, yields per hectare computed on the basis of the area and production figures in this report may be slightly overstated for some crops.

In cases where two or more crops, or two or more plantings of the same crop, were harvested from the same land in 1959, the area was to be reported for each separate crop or planting, provided the total production amounted to at least 50 pounds. For some Election Districts, therefore, the area given for crops may closely approximate, or even exceed, the area given for total land in farms.

Fruits and Nuts.—Questions on fruits and nuts were separated into two groups on the 1960 questionnaire. For the fruits commonly grown on farms, information was obtained for the total quantity harvested in 1959 and also for the number of trees or plants, both bearing and nonbearing, that were on the farm on April 1, 1960. For breadfruit, betelnuts, coconuts, gado and other wild root crops, guavas, soursops, starfruits, and anonas, the reported data represent total quantities harvested or gathered in 1959 by all members of the operator's household, both from land in the farm and from other land.

Unit of Measure.—On the 1960 questionnaire, all quantities were to be reported in pounds. In earlier censuses, quantities of fruits harvested were generally reported in number of fruits. In this report, no attempt has been made to convert numbers of fruits (or nuts), as reported in previous censuses, to pounds.

LIVESTOCK AND POULTRY

In accordance with the Census definition, an April 1 inventory of one or more farm animals or of five or more poultry qualified a place as a farm in both the 1960 and the 1950 Censuses. In earlier censuses, all livestock and poultry were enumerated, whether or not they were on places qualifying as farms according to the definitions then in effect. Except for milk cows and other cattle and calves, the data for the major livestock as given in this report are entirely comparable from one census year to another and represent the total livestock in Guam. The 1960 and the 1950 data for poultry are also entirely comparable. Such lack of comparability as may exist with earlier years is considered to be negligible.

To avoid double counting in the enumeration, each farm operator was asked to report all livestock and poultry on his place as of April 1, regardless of ownership. Livestock running loose or grazing on public land were to be reported as being on the place operated by the person who had control over them.

Cattle and Calves.—In the 1960 Census, "milk cows" were defined as cows that had been milked at any time in 1959 or in 1960, up to the time of enumeration. All other cows were to be included in the report for "other cattle and calves." Questionnaires for the 1950 and 1940 Censuses contained no definition of milk cows but enumerators were instructed to report, as milk cows, all cows kept for the purpose of providing milk for human consumption. Therefore, the data for milk cows and other cattle and calves as given for 1960 are not strictly comparable with those for earlier years.

FISHPONDS

Only fishponds stocked with fish for food purposes were to be reported. This specification was given to enumerators so that ponds or pools kept for other purposes would not be reported.

CLASSIFICATION OF FARMS

Farms by Size.—Farms were classified by size on the basis of the total land area established for each farm. According to the Census definition, a farm is essentially an operating unit, not an ownership tract. All land operated or managed by one person or partnership represents one farm. In the case of share-tenants, the land assigned to each share-tenant is considered a separate farm, even though the landlord may consider his entire landholding to be one unit, rather than several separate units.

Farms by Tenure of Operator.—Farms were classified by tenure of operator on the basis of data for land owned, rented from others, used by permit, occupied as a squatter, or furnished by the Government. During the processing operations, each questionnaire for the 1960 Census was coded to indicate whether the farm operator was to be classified as a full owner, part owner, tenant, permittee, squatter, or "other" operator. The various classifications of tenure, as used for the 1960 Census, are defined below:

Full owners operate only land they own or land they own plus land they operate on a permit, squatter, or Government-furnished basis.

Part owners operate land they own plus land they rent from others.

Tenants operate only land they rent from others.

Permittees have a permit from the Government for all the land they operate, or they have a permit for some of the land and occupy the remainder on a squatter basis.

Squatters "borrow" all the land they operate, with no rental agreement with the owner. They neither own nor rent any land nor do they occupy any land by permit or other governmental arrangement.

Others are operators who did not qualify for any of the foregoing classifications. All the land they operate may have been furnished by the Government in connection with living quarters; or the land they operate may be partly owned, partly rented from others, and partly held on a permit, squatter, or Government-furnished basis.

The tenure classifications for the 1960 Census are more precise than those used in earlier censuses. Data for 1940 and 1950 were classified according to whether operators were "owners," "lessees," "renters," or "borrowers." These terms may be roughly compared with the 1960 classifications as follows:

Owners—Full owners and part owners

Lessees—Permittees

Renters—Tenants

Borrowers—Squatters

For exact definitions of the tenure classifications used in earlier censuses, see the 1950 report for Guam in "Territories and Possessions" *(Volume I, Part 34, U. S. Census of Agriculture: 1950).*

STATISTICS FOR ELECTION DISTRICTS

(1)

Table 1.–POPULATION. LAND AREA, NUMBER OF FARMS, AND LAND IN FARMS, BY ELECTION DISTRICTS: CENSUS OF 1960

APPENDIX

The Questionnaire

(17)

Form 60A1 43 (9-8-59)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221-4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. *The census report cannot be used for purposes of taxation, investigation, or regulation.*

Budget Bureau No. 41-S807
Approval expires September 30, 1960

GUAM

U.S. DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS
PARSONS, KANSAS

A1 No.

A1 CENSUS OF AGRICULTURE QUESTIONNAIRE: 1960

If any member of the household harvested (or gathered) any crops, vegetables, fruits, or nuts in 1959; or kept any livestock or poultry; or had a fishpond on *April 1, 1960*, fill this questionnaire.

Section I.—OPERATOR, TENURE, AND AREA, APRIL 1, 1960

(Enter in question 1 the name of the operator (the person in charge of the agricultural operations).)

1 What is your name (the operator)?

(First name) (Middle name) (Last name)

2 How many hectares do you **own**? (Omit land used by U.S. Military Services.) ☐ None (Hectares) (Ares) ☐ If less than 10 ares (1,000 sq. meters or about 10,000 sq. ft.) check and do not report number of ares.

3 How many hectares do you **rent to others**? (Omit land used by U.S. Military Services.) ☐ None (Hectares) (Ares)

4 How many hectares do you **rent from others**? (Include cropland, grazing or pasture land, and all other land.) ☐ None (Hectares) (Ares)
Name of owner

5 For how many hectares do you have a **land permit**? (Include cropland, grazing or pasture land, and all other land.) ☐ None (Hectares) (Ares)

6 How many hectares do you occupy as a **squatter**? ☐ None (Hectares) (Ares)

7 How many hectares are **furnished** you in connection with your living quarters by the Government? ☐ None (Hectares) (Ares) ☐ If less than 10 ares (1,000 sq. meters or about 10,000 sq. ft.) check and do not report number of ares.

8 ***Total area in this place?*** (Add hectares and ares for questions 2, 4, 5, 6, and 7, and subtract hectares and ares for question 3.) (Hectares) (Ares) ☐ If less than 10 ares (1,000 sq. meters or about 10,000 sq. ft.) check and do not report number of ares and skip to question 15.

Section II.—LAND USE

Of the total area in this place (see question 8), how much is—

		(Hectares)	(Ares)
9	**Land** used for crops?	☐ None	
10	**Cropland** used for pasture?	☐ None	
11	**Cropland not** used for crops or pasture?	☐ None	
12	**Pastureland** used for pasture or grazing?	☐ None	
13	**Pastureland not** used for pasture or grazing?	☐ None	
14	All **other land** in this place?	☐ None	

(The sum of the entries for questions 9 through 14 should equal entry for question 8.)

Section III.—FIELD CROPS AND VEGETABLES HARVESTED IN 1959

(*Answer these two questions for each kind of crop.*) → (1) How many pounds were harvested *in 1959*? (Pounds) (2) How much area was harvested *in 1959*? (Give area only when quantity harvested was 50 pounds or more) (Hectares) (Ares)

Which of the following crops were harvested *in 1959*?

15. **Green beans**?
16. **Chinese cabbage**?
17. **Cassava** (tapioca, mandioka)?
18. **Corn, dry**?
19. **Corn, green**?
20. **Cucumbers**?
21. **Eggplant**?
22. **Green onions**?
23. **Lettuce**?
24. **Melons** (cantaloups, muskmelons, pepinos)?
25. **Mungo beans**?
26. **Peppers**?
27. **Pumpkins**?
28. **Radishes**?
29. **Rice**?
30. **Sweetpotatoes**?
31. **Taro**?
32. **Tomatoes**?
33. **Watermelons**?
34. **Yams** (cultivated)?
35. **Other crops**? Give name / Give name

(If two or more crops were harvested in *1959* on the same land, report the total area of each crop harvested.)

Section IV.—FRUITS AND NUTS: TREES, APRIL 1, 1960, AND QUANTITY HARVESTED IN 1959

(*Answer these two questions for each kind of fruit tree or plant on this place.*) → (1) How many pounds were harvested *in 1959*? (Pounds) (2) How many trees or plants are on this place? (Number / Hills / Number / Number / Number / Number / Number / Number / Number / Number)

Which of the following kinds of fruit trees or plants are on this place

36. **Avocados**?
37. **Bananas, cooking**?
38. **Bananas, eating**?
39. **Grapefruit**?
40. **Lemons and limes**?
41. **Mangos**?
42. **Oranges**?
43. **Papayas**?
44. **Pineapples**?
45. **Tangerines**?
46. **Other fruits**? Citrons? Custard-apples? Give name / Give name

(*Answer this question for each kind of fruit or nut.*) → (1) How many pounds were harvested *in 1959*? (Pounds)

Which of the following kinds of fruits, nuts, and other crops were harvested or gathered by you or your family *in 1959*, from this place and from other land

47. **Breadfruit**?
48. **Betelnuts**?
49. **Coconuts**?
50. **Gado** and other wild root crops?
51. **Guavas**?
52. **Soursops**?
53. **Starfruits**?
54. **Other fruits**? Anonas? Give name / Give name

Section V.—LIVESTOCK AND POULTRY ON APRIL 1, 1960

How many of the following livestock and poultry are on this place—

55. **Carabaos** of all ages? Number
56. **Cattle** and **calves** of all ages? Number
Of this total, how many are—
57. **Milk cows**? (Cows milked at any time *last year* or *this year*) Number
58. **Other cattle** and **calves**? (The sum of questions 57 and 58 must equal the total for question 56.) Number
59. **Goats** and **kids** of all ages? Number
60. **Hogs** and **pigs** of all ages? Number
61. **Horses** and **colts** of all ages? Number
62. **Chickens** 4 months old and over? Number
63. **Other poultry** of all ages? (Ducks, guineas, pigeons, turkeys, etc.) (*Give name.*) Number / Number

Section VI.—FISHPONDS: NUMBER AND AREA, APRIL 1, 1960

64. Number of **fishponds** ☐ None Number
65. **Dimensions** of each fishpond (Give width and length of each pond) feet by feet / feet by feet / feet by feet

REMARKS:

PREFACE

Volume I, Counties, is one of the five principal reports presenting the results of the 1959 Census of Agriculture. This volume, in 54 parts, presents the compilation of the information given by farm operators to census enumerators in 1959.

The 1959 Census of Agriculture was taken in conformity with the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

The collection of the data was carried out by census enumerators directed by supervisors appointed by the Director of the Bureau of the Census and working under the direction of Robert B. Voight, then Chief, Field Division. Paul R. Squires, then Special Assistant to the Director, was responsible for the recruitment of the field staff. The planning of the census and the compilation of the statistics were supervised by Ray Hurley, Chief, Agriculture Division, Warder B. Jenkins, Assistant Chief, and Orvin L. Wilhite, Assistant Chief. The technical work for the census was performed by Hector Vila, Agricultural Economist. The compilation of the statistics was under the supervision of Lois G. Miller.

Acknowledgment is made of the valuable assistance of the Puerto Rico Department of Agriculture and the University of Puerto Rico, for their loan of personnel from the Puerto Rico Extension Service and other agencies to serve as census crew leaders and for technical assistance in connection with the planning and enumeration of the 1959 Census of Agriculture for Puerto Rico.

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
	New England States:		West North Central—Continued		Mountain:
1	Maine.	19	South Dakota.	38	Montana.
2	New Hampshire.	20	Nebraska.	39	Idaho.
3	Vermont.	21	Kansas.	40	Wyoming.
4	Massachusetts.		South Atlantic:	41	Colorado.
5	Rhode Island.	22	Delaware.	42	New Mexico.
6	Connecticut.	23	Maryland.	43	Arizona.
	Middle Atlantic States:	24	Virginia.	44	Utah.
7	New York.	25	West Virginia.	45	Nevada.
8	New Jersey.	26	North Carolina.		Pacific:
9	Pennsylvania.	27	South Carolina.	46	Washington.
	East North Central:	28	Georgia.	47	Oregon.
10	Ohio.	29	Florida.	48	California.
11	Indiana.		East South Central:	49	Alaska.
12	Illinois.	30	Kentucky.	50	Hawaii
13	Michigan.	31	Tennessee.		Other Areas:
14	Wisconsin.	32	Alabama.	51	American Samoa.
	West North Central:	33	Mississippi.	52	Guam.
15	Minnesota.		West South Central:	53	Puerto Rico.
16	Iowa.	34	Arkansas.	54	Virgin Islands.
17	Missouri.	35	Louisiana.		
18	North Dakota.	36	Oklahoma.		
		37	Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

Municipio Table—

1.—Number of farms and land in farms classified by use: Censuses of 1959 and 1950 ... 50
2.—Number of farms and land in farms classified according to use, by size of farm: Censuses of 1959 and 1950 ... 52
3.—Number of farms and land in farms classified according to use, by tenure of operator: Censuses of 1959 and 1950 ... 60
4.—Land owned, rented, and managed by farm operators: Censuses of 1959 and 1950 ... 65
5.—Number of farms by economic class and type of farm: Census of 1959 ... 66
6.—Farm operators reporting off-farm work by major occupation groups and days worked: Census of 1959 ... 68
7.—Facilities and equipment on farms: Censuses of 1959 and 1950 ... 70
8.—Agregados and medianeros—number of families and land cultivated by agregados and medianeros: Censuses of 1959 and 1950 ... 72
9.—Farm labor—farms reporting, number of persons and hours worked on farms during week preceding enumeration: Census of 1959 ... 73
10.—Farm expenditures—farms reporting and amount expended for feed, fertilizer, and hired labor: Censuses of 1959 and 1949 ... 74
11.—Farms reporting and number of horses, burros and mules, sheep, and goats on farms; and goats milked: Censuses of 1959 and 1950 ... 75
12.—Farms reporting and number of cattle on farms: Censuses of 1959 and 1950 ... 76
13.—Farms reporting and number of milk cows on farms, cows milked, cattle and calves sold, and milk sold: Censuses of 1959 and 1950 ... 77
14.—Farms reporting and number of hogs and pigs on farms, sows farrowing, pigs raised, and hogs and pigs sold: Censuses of 1959 and 1950 ... 78
15.—Farms reporting and number of chickens on farms, number of chickens sold, and dozens of eggs sold: Censuses of 1959 and 1950 ... 79
16.—Farms reporting and number of turkeys, ducks, geese, guineas, and pigeons on farms; number of hives of bees on farms, and honey produced: Censuses of 1959 and 1950 ... 80
17.—Sugarcane—farms reporting, area, and quantity harvested, 1959 and 1949; sugarcane cut for seed, 1959; area in sugarcane, November 1, 1959; and area in gran cultura for harvest in 1960 ... 82
18.—Pineapples—farms reporting, area, and quantity harvested, 1959 and 1949; and area in pineapples, November 1, 1959 ... 84
19.—Coffee and tobacco—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 85
20.—Cotton and rice—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 86
21.—Cowpeas and pigeon peas—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 87
22.—Dry beans and corn—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 88
23.—Sweetpotatoes—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 89
24.—Dasheens and yams—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 90
25.—Taniers and cassava—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 91
26.—Miscellaneous field crops—farms reporting, area, quantity harvested, and quantity sold, 1959 and 1949 ... 92
27.—Forage crops—farms reporting and area harvested, 1959 and 1949 ... 93
28.—Vegetables harvested for sale—farms reporting, area, quantity harvested, and value of sales, 1959 and 1949 ... 94
29.—Citrons—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 101
30.—Coconuts—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 102
31.—Bananas and plantains—farms reporting and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 103
32.—Grapefruit—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 104
33.—Oranges—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 105
34.—Limes—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 106
35.—Avocados—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 107
36.—Cacao—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 108
37.—Guavas—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 109
38.—Mangoes—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 110
39.—Papayas—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 111
40.—Breadfruit—farms reporting, number of trees, and area, 1959 and 1950; quantity harvested and quantity sold, 1959 and 1949 ... 112
41.—Parcelas and parcela characteristics: Censuses of 1959 and 1950 ... 113

PUERTO RICO

THE 1959 CENSUS OF AGRICULTURE

INTRODUCTION

History of the Census of Agriculture.—The first census of agriculture taken in Puerto Rico by the United States was made as of April 15, 1910. From 1910 to 1950, a census of agriculture was taken in conjunction with the census of population at each decennial enumeration. In 1935, a special census of Puerto Rico was taken by the Puerto Rico Reconstruction Administration. The 1959 Census was taken separately from the 1960 Census of Population.

Legal Basis for the Census.—The 1959 Census of Agriculture was authorized by an Act of Congress, as were all prior censuses of agriculture. "Title 13, United States Code—Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for censuses of agriculture and other censuses and surveys conducted by the Bureau of the Census. Section 142, paragraph (a), of Title 13 makes provision for the Census of Agriculture. It reads as follows:

> "The Secretary shall, beginning in the month of October 1959, and in the same month of every fifth year thereafter, take a census of agriculture, provided that the censuses directed to be taken in October 1959 and each tenth year thereafter, may, when and where deemed advisable by the Secretary, be taken instead in conjunction with the censuses provided in section 141 of this title." (Section 141 relates to the decennial censuses of population, unemployment, and housing to be taken as of the first day of April of each decennial year.) Under authority granted by Section 4 of Title 13, the Secretary of Commerce delegated "the functions and duties imposed upon him by this title" to the Director of the Bureau of the Census.

The Agriculture Questionnaires.—Two questionnaires were used for the 1959 Census of Agriculture. One of these questionnaires contained spaces for listing the name of the head of the household for each dwelling in the area, and the names of tenants and owners for places on which no one lived. This questionnaire contained inquiries regarding the size of the place, and was used to determine when an agriculture questionnaire was to be filled for a farm. If the size of the place was between one-fourth and 3 cuerdas, the listing form contained six additional inquiries regarding these places, designated as "parcelas." The inquiry regarding parcelas secured information regarding the value of two groups of farm products sold. Data for parcelas are presented in Municipio Table 41.

The other questionnaire, the questionnaire for farms, was to be filled for all places containing 3 or more cuerdas, and contained 130 inquiries related to farm operator characteristics; land in farms according to tenure of operator; area harvested, quantity harvested, and quantity sold for individual crops; area in fruit orchards and planted nut trees, number of fruit trees, and quantity of fruit harvested and sold; land in farms according to use; facilities on farms and number of certain selected farm equipment; number of agregados and medianeros and land cultivated by them; number of farm workers; specified expenditures; number of the important classes of livestock on farms; production and

INTRODUCCION

Historia del Censo de Agricultura.—El primer censo de agricultura levantado en Puerto Rico por los Estados Unidos se efectuó el 15 de abril de 1910. Desde 1910 hasta el 1950 el censo de agricultura se hacía simultaneamente con el censo de población, cada diez años. En el 1935 un censo especial fué levantado por la Administración de Reconstrucción de Puerto Rico. En el 1959 el censo de agricultura se hizo separado del censo de población del 1960.

Base legal para el censo.—Al igual que todos los anteriores censos de agricultura, el censo de agricultura de 1959 fué autorizado por ley del Congreso de los Estados Unidos. "El Título 13, del Código Censal de los Estados Unidos," codificado en agosto de 1954, y enmendado en agosto de 1957 y en septiembre de 1960, es la base legal para los censos de agricultura, y de otros censos y estudios llevados a cabo por el Negociado del Censo. La sección 142, párrafo (a), del Título 13, es la que asegura el censo de agricultura. Lee como sigue:

> "El Secretario debe empezar en el mes de octubre de 1959, y de aquí en adelante, cada cinco años y en el mismo mes, a tomar el censo de agricultura, con tal de que los censos a tomarse en octubre de 1959 y en cada diez años de aquí en adelante, pueden, cuando y donde el Secretario conceptue aconsejable, tomarse conjuntamente con los censos estipulados en la sección 141 de este título." (La sección 141 se relaciona a los censos decenales de población, desempleo, y vivienda que se toman para el primero de abril en cada año decenal.) Bajo la autoridad concedida en la sección 4 del Título 13, el Secretario de Comercio delega "las funciones y deberes impuestos sobre él por este título" al Director del Negociado del Censo.

Cuestionarios usados en el Censo de Agricultura de 1959.—Dos cuestionarios fueron usados para el censo de agricultura de 1959. Uno de estos cuestionarios contenía espacio para anotar el nombre del jefe de familia de cada vivienda en el área y el nombre de los arrendatarios o dueños de los sitios donde no vivía nadie. Este cuestionario contenía preguntas relacionadas al tamaño del sitio, usadas para determinar cuando un cuestionario agrícola debería ser tomado para una finca. Si el tamaño del sitio era entre 1/4 y 3 cuerdas, el registro contenía seis preguntas adicionales relacionadas a estos sitios, designados como parcelas. Las preguntas relacionadas a parcelas contenían información respecto al valor de las ventas de dos grupos de productos agrícolas. Los datos para parcelas están presentados en la tabla por municipio número 41.

El otro cuestionario, el cuestionario para fincas, fué tomado para todos los sitios de 3 cuerdas o más y se componía de 130 preguntas relacionadas con las características del operador de la finca; terreno en la finca de acuerdo con la tenencia; área cosechada, cantidad cosechada y cantidad vendida de cada producto agrícola; área sembrada en huertos frutales y árboles de nueces, número de árboles frutales y cantidad de frutas cosechadas y vendidas; terreno en la finca, clasificado de acuerdo con el uso; facilidades y número de cierto equipo en la finca; número de agregados y medianeros y terreno cultivado por ellos; número de trabajadores agrícolas; gastos especificados; número

sales of important livestock items; and location of farmland. Facsimilies of the two questionnaires appear in the appendix.

The Enumeration.—A good census requires a complete as well as an accurate enumeration. Several techniques were used to help obtain a good census in 1959. Every person hired to do work in connection with the 1959 Census of Agriculture received specialized training for his job. A staff member of the Washington office trained the 29 crew leaders. The crew leaders, in turn, trained and supervised approximately 465 enumerators. All training was presented according to procedures contained in various guides and manuals prepared by the Bureau. The training program included map-reading, practice interviewing, and practice filling of questionnaires and other census forms. In most instances, training sessions were held near the areas in which employees worked and immediately prior to the beginning of their assignments.

Instructions covering census procedures were designed in such a manner that objective criteria were supplied, and enumerators were not expected to rely on their own opinions or judgments concerning census entries or classifications. For example, an enumerator was required to complete an agriculture questionnaire when specified conditions were met. He was *not* required to decide first what constituted a farm and then to obtain a questionnaire. Instead, a questionnaire was completed whenever minimum conditions were satisfied. Then, during central office processing operations, a decision was made—on the basis of carefully defined criteria—as to which questionnaires represented farms.

To help in insuring the completeness of the enumeration, enumerators were provided with a specially designed Enumerator's Record Book in which to list the names of heads of households for the dwellings in their enumeration districts and the names of the tenants or owners for places on which no one lived. The Enumerator's Record Book contained also a question about the size of the place. The answer to this question determined whether an agricultural questionnaire was required.

In order to minimize the cost of the enumeration, procedures were developed to limit the listing of heads of households and of other places in urban areas, and built-up residential areas. In accordance with these procedures, enumeration districts were classified, prior to the enumeration, into two groups on the basis of the density of dwellings in relation to the number of farms according to the 1950 Censuses of Agriculture and Population.

In general, the rural districts with no well-defined cluster of dwellings were considered to be open-country areas and were classified as Group A enumeration districts. For Group A enumeration districts the enumerator was required to list in his Enumerator's Record Book the name of the head of each household within his district. If no one lived on a tract of land, he was required to list the name of the person who rented the land, worked it on shares, used it for livestock, or, if the land was not used for agricultural purposes, the name of the owner.

Urban areas and villages with approximately 150 or more dwellings were classified as Group C enumeration districts. For Group C enumeration districts, the enumerator was given a list of farm operators enumerated in the 1950 Census of Agriculture and was instructed to visit each place listed and find out whether an agriculture questionnaire was required. Any place used for agriculture was to be listed in his Enumerator's Record Book and an agricultural questionnaire was to be obtained. If the place was no longer used for agriculture, an explanation was

de las distintas clases de ganado en la finca; producción y venta de los productos de ganadería más importante; y ubicación del terreno en la finca. Facsímiles de los dos cuestionarios aparecen en el apéndice.

La enumeración.—Un buen censo requiere una enumeración completa y exacta. Diversas técnicas fueron usadas en el 1959 para obtener un buen censo. Cada persona reclutada para trabajar con el censo de agricultura de 1959 recibió adiestramiento especializado para su trabajo. Un miembro del personal de la oficina de Washington adiestró 29 jefes de grupos. Los jefes de grupos adiestraron y supervisaron el trabajo de aproximadamente 465 enumeradores. Todo el adiestramiento se presentó de acuerdo a los procedimientos explicados en varias guías y manuales preparados por la oficina del censo. El adiestramiento incluyó la leyenda de mapas, entrevistas de práctica, y llenar cuestionarios y otras formas censales de práctica. Corrientemente, el programa de adiestramiento se llevó a cabo cerca de las áreas en las cuales los enumeradores trabajaron, e inmediatamente antes de empezar sus trabajos.

Las instrucciones relacionadas al censo fueron trazadas de tal manera que suplían criteria objetiva, y el enumerador no tenía que depender de su opinión o juicio al hacer anotaciones o clasificaciones durante el censo. Por ejemplo, al enumerador se le requería que llenara un cuestionario cuando se encontrara con ciertas condiciones especificadas en las instrucciones. No se le requería que decidiera si el sitio era una finca o no. Un cuestionario fué llenado cada vez que las condiciones mínimas fueran encontradas. En la oficina central se decidía, a base de criterios definidos, cuales cuestionarios representaban fincas.

Para ayudar a asegurar una enumeración completa, a los enumeradores se les proveyó un Libro de Registro en el cual anotaban el nombre del jefe de familia de cada vivienda localizada en sus distritos de enumeración, y el nombre del arrendatario o del dueño de los terrenos en el cual no vivía nadie. Este libro contenía una pregunta relacionada al tamaño del sitio. Si se requería un cuestionario para el sitio, dependía de la contestación a esta pregunta.

Para mantener el costo de enumeración a un mínimo, se desarrollaron procedimientos para limitar la enumeración de jefes de familias y sitios en áreas urbanas y áreas residenciales. Antes de la enumeración, los distritos se clasificaron en dos grupos, de acuerdo a la cantidad de viviendas con relación a la cantidad de fincas, según aparecía en los censos de agricultura y población del 1950.

Por lo general, los distritos rurales se consideraron como campo abierto sin tener un grupo de viviendas definido, y se clasificaron como distritos de enumeración del grupo A. Al enumerador se le requería que anotara en su libro de registro el nombre de todo jefe de familia que viviera en este distrito. Si nadie vivía en los terrenos a enumerar, se le requería que anotara el nombre de la persona que rentaba el terreno, o lo trabajaba a media, o lo tenía para uso de ganado; o si el terreno no se usaba para propósitos agrícolas, el nombre del dueño.

Las áreas urbanas, y aldeas de aproximadamente 150 o más viviendas, se clasificaron como distritos de enumeración del grupo C. En estos distritos a los enumeradores se les suplió una lista de los agricultores enumerados en el censo de agricultura de 1950, y tenían instrucciones de visitar cada uno de estos sitios y averiguar si se requería tomar un cuestionario agrícola. Todo terreno usado con propósitos agrícolas, localizado en estos distritos, tenía que ser anotado en el Libro de Registro y se tomaría un cuestionario agrícola. Si el sitio ya

to be made on the list furnished the enumerator. The enumerator was instructed to ask at each of these places whether there were any other farms or any places of 3 or more cuerdas in the neighborhood. In covering his enumeration district, the enumerator was instructed to proceed in a systematic manner from a logical starting point. He listed each place and each dwelling on successive lines in the Enumerator's Record Book. In addition, he was required to identify these on his enumerator's map with a cross-reference to the Enumerator's Record Book. This procedure helped him to determine, by looking at his map, the extent of coverage at any given time. It also helped the crew leader in checking to see that coverage was complete.

Crew leaders, in supervising enumerators, began reviewing questionnaires, maps, and other forms and checking the enumerator's work for completeness of coverage and quality almost as soon as the enumeration was started. The crew leader and his enumerators were required to make the records of their respective areas as accurate and as complete as possible.

When the land in an individual farm was located in two or more barrios or municipios, the entire farm was enumerated in only one barrio and one municipio. If the farm operator lived on the farm, the farm was enumerated in the barrio and municipio in which the farm operator lived. If the farm operator did not live on the farm, the figures for the farm were included in the barrio and municipio in which the farm headquarters was located. If there was any question as to the location of the headquarters of the farm, the farm and all the data for it were included in the barrio and municipio in which most of the land was located.

Some farms were given special attention to insure their inclusion in the enumeration. Prior to the enumeration, a list of large farms (farms containing 200 or more cuerdas) was prepared from records of the 1950 Census of Agriculture. During the enumeration a careful check was made to see that each large farm was accounted for. This procedure helped to insure that farms which could have a significant effect upon the census data were not omitted from the enumeration.

After the canvass of an enumeration district was completed, the supervising crew leader collected the questionnaires and other records from the enumerator and sent them to the San Juan office. While assembling records for shipment to the Agriculture Processing Office at Parsons, Kansas, the San Juan office checked to see that the enumeration in each enumeration district was reasonably complete, that the sampling procedure was correctly applied and that all large farms had been enumerated.

PROCESSING OPERATIONS

Checking, editing, and coding were performed for individual agriculture questionnaires at the Agriculture Operations Office at Parsons, Kansas. *The checking consisted of seeing* (1) that the questionnaires were completely filled out; (2) that the acreage of individual crops harvested was in reasonable agreement with the acreage of cropland used for crops; (3) that the amount of land classified according to use accounted for the entire farm area; (4) that the age and sex breakdown for cattle and hogs added to the total number of animals of all ages; and (5) that all entries for related items were reasonably consistent. *Editing consisted* of the identification and withdrawal of questionnaires filled for places not qualifying as farms; the selection of questionnaires with entries of unusually large size for review by the technician; the selection of groups of questionnaires with common reporting errors in an individual enumeration district for referral to the technician for review; and the correction of obvious

no era usado con propósitos agrícolas, se daba una explicación en la lista provista. El enumerador tenía instrucciones de preguntar en cada uno de estos sitios si había otras fincas o sitios de tres o más cuerdas en la vecindad. Al enumerador se le instruyó que procediera de una manera sistemática desde cierto punto, durante el recorrido de su distrito de enumeración. El anotaba en el Libro de Registro cada sitio y cada vivienda en líneas sucesivas. Además, se le requería que identificara éstos en su mapa, con referencia al número de la línea anotada en el Libro de Registro. Este procedimiento le ayudaba a determinar en el mapa cuanto había cubierto de su distrito en cualquier momento dado. También ayudaba al jefe de grupo en la verificación de que el área había sido cubierta por completo.

En la supervisión del trabajo de los enumeradores, los jefes de grupos, empezaban a revisar los cuestionarios, los mapas y demás formas, y a revisar el trabajo del enumerador tan pronto la enumeración empezaba. Se le requería a los jefes de grupo y a los enumeradores que llevaran de sus respectivas áreas unas memorias (records) lo más exactas y lo más completas posibles.

Cuando los terrenos de una finca estaban localizados en dos o más barrios o municipios, la finca entera fué enumerada en solamente un barrio o municipio. Si el operador de la finca vivía en la misma, ésta se enumeraba en el barrio o municipio donde el operador vivía. Si el operador no vivía en la finca, los datos para dicha finca se incluían en el barrio o municipio en donde estaba localizado el almacén principal. Si había alguna duda en cuanto a la localización del almacén principal de la finca, ésta y todos los datos pertinentes a ella se incluían en el barrio o municipio en donde la mayor parte del terreno estaba ubicado.

Atención especial fué dada a ciertas fincas para asegurar ser incluídas en la enumeración. Antes de la enumeración, una lista de fincas grandes (fincas de 200 cuerdas o más) fué preparada de los informes del censo de agricultura de 1950. Durante la enumeración se verificaba con sumo cuidado de que cada finca grande fuese enumerada. Este procedimiento ayudó a asegurar que fincas que pudiesen afectar las estadísticas del censo, no se omitieran durante la enumeración.

Después de completada la inspección de un distrito, el jefe de grupo recolectaba los cuestionarios y el material de enumeración, y lo enviaba a la oficina de San Juan. La oficina de San Juan, mientras reunía los informes a ser enviados a la Oficina de Operaciones Agrícolas en Parsons, Kansas, investigaba si la enumeración de cada distrito de enumeración era completa, si el procedimiento de la muestra se hacía correctamente y si todas las fincas grandes habían sido enumeradas.

OPERACIONES DE PREPARACION

Las operaciones de verificación, revisión y codificación se llevaron a cabo en la Oficina de Operaciones Agrícolas en Parsons, Kansas, para cada cuestionario individual. *La verificación consistió en ver* (1) que los cuestionarios contenían toda la información solicitada, (2) que las cuerdas cultivadas por cultivo individual estaban en armonía con el total de cuerdas cultivadas, (3) que la cantidad de cuerdas clasificadas de acuerdo a su uso era igual al total de cuerdas en la finca, (4) que la distribución por edad y sexo del ganado y los cerdos era igual al total de estos animales, y (5) que las entradas para partidas relacionadas, eran consistentes. *La revisión consistió* de la identificación y rechazo de cuestionarios tomados para sitios que no cualificaban como fincas; de la selección de cuestionarios con entradas demasiado grandes para ser revisados por el técnico; de la selección de cuestionarios de un mismo distrito de enumeración con errores comunes para ser

inconsistencies such as reporting in an incorrect unit, or not reporting in the proper place on the questionnaire. *Coding consisted* of entering code numbers for tenure of operator, size of farm, economic class of farm, and type of farm.

Entries determined by the technician to be in error were corrected on the basis of relationships existing on nearby farms, or, if the entries were large, on the basis of correspondence with the farm operator. In case of information missing for a group of questions, estimates were prepared on the basis of adjacent questionnaires for farms with similar operations and, in some cases, on the basis of information obtained by mail from farm operators. Usually, when estimates were made, letters were mailed to the farm operators to verify the information and, if the estimates were not in reasonable agreement with the information contained in the replies, the entries were corrected before the tabulations were made.

Punchcards were prepared for making the required tabulations. Once on punchcards, the data were sorted, listed, or otherwise handled mechanically to facilitate checking and obtaining totals. One of the initial and primary steps in the mechanical handling of the punchcards was to select, for further checking, cards which lacked necessary information, cards on which the punched data were inconsistent or impossible, and cards on which the relationships were possible but the data were of such magnitude that a further review of the individual questionnaires was warranted. These cards containing questionable data or lacking data were examined, checked to the agricultural questionnaires, and corrected, if necessary, before the tabulations were made.

Finally, tabulations were examined from the standpoint of over-all reasonableness and consistency. This examination required the judgment of an agricultural specialist and was the primary responsibility of a senior Census staff member.

SAMPLING

Use of Sampling for the 1959 Census of Agriculture.—The information called for in Sections VII, VIII, IX, and X on the agriculture questionnaire, i. e., information for farm facilities, equipment on the place, farm expenditures, farm labor, and agregados and medianeros, was enumerated for only a sample of farms. (See appendix for copy of the questionnaire.) The tabulations by economic class of farm and by type of farm were made only for farms in the sample.

Description of the Sample for the 1959 Census.—The sample used for the 1959 Census of Agriculture consisted of all farms containing 200 or more cuerdas; and one-fifth, or 20 percent, of the remaining farms. Thus, the sample included slightly more than 20 percent of all farms. The actual selection of farms to be included in the sample was made by census enumerators during the enumeration.

Adjustment of the Sample.—An adjustment of the sample that related to one-fifth of the farms under 200 cuerdas in size was made by a process essentially equivalent to stratifying the farms in the sample by size, for the purpose of (1) improving the reliability of the estimates from the sample at the Puerto Rico level, and (2) for the purpose of reducing the effects of possible biases introduced because some census enumerators did not follow perfectly the method devised for selecting the farms in the sample. In order to adjust the sample, counts were obtained of all farms under 200 cuerdas in size and of sample farms for

referidos al técnico; y de la corrección de inconsistencias, como es el informar en la unidad incorrecta, o no informar en el sitio correcto en el cuestionario. *La codificación consistió* en anotar en los cuestionarios ciertos números claves para la tenencia, el tamaño, la clase económica y el tipo de finca.

La información determinada por el técnico como errónea, fué corregida a base de fincas adyacentes, o si la información era de gran proporción, a base de correspondencia con el operador de la finca. En los casos de cuestionarios con información incompleta, se prepararon estimados a base de cuestionarios adyacentes de fincas con operaciones agrícolas similares, y en algunos casos a base de información obtenida por correspondencia con el operador de la finca. En los casos de estimados, se les escribió a los operadores de finca para verificar la información y si la información no estaba de acuerdo, se corregía antes de hacerse las tabulaciones.

Tarjetas perforadas fueron preparadas para hacer las tabulaciones requeridas. Una vez la información fué entrada en tarjetas perforadas, la data se clasificó, se registró, o se manipuló mecánicamente para facilitar hacer comprobaciones y obtener totales. Uno de los primeros pasos en la manipulación mecánica de las tarjetas perforadas fué el seleccionar para revisiones adicionales las tarjetas con información incompleta, las tarjetas de información inconsistente o imposible, y las tarjetas de relación posible pero la información necesitaba ser verificada al cuestionario. Estas tarjetas que contenían información a ser verificada, o información incompleta o imposible, fueron inspeccionadas, verificadas al cuestionario, y corregidas, si necesario, antes de haberse hecho la tabulación.

Finalmente, las tabulaciones fueron inspeccionadas del punto de vista de ser sobre todo razonables y consistentes. Esta inspección requería el buen juicio de un especialista agrícola y fué la responsabilidad primaria del personal de mayor experiencia en censos.

MUESTREO

Uso del muestreo en el censo de agricultura de 1959.—La información solicitada en las secciones VII, VIII, IX y X en el cuestionario agrícola, i.e., la información sobre facilidades en la finca, equipo agrícola en el sitio, gastos de la finca, trabajo en la finca, y agregados y medianeros en la finca, fué tomada únicamente para una muestra de fincas. (Vea el apéndice para copia del cuestionario). Las tabulaciones por clase económica y por tipo de finca fueron hechas únicamente para fincas en la muestra.

Descripción de la muestra del censo de 1959.—La muestra usada en el Censo de Agricultura de 1959 consistió de todas las fincas de 200 cuerdas o más y una quinta parte, o sea el 20%, del resto de fincas. La muestra incluye un poco más del 20% de todas las fincas. La selección real de fincas a incluirse en la muestra fué hecha por el enumerador durante la enumeración.

Ajuste de la muestra.—Un ajuste de la muestra relacionada a la quinta parte de las fincas de menos de 200 cuerdas en tamaño, fué hecha por un proceso equivalente a la estratificación de fincas en la muestra por tamaño, con el propósito de (1) mejorar la confiabilidad del estimado de la muestra al nivel de Puerto Rico, y (2) con el propósito de reducir los efectos de posibles prejuicios introducidos porque algunos enumeradores no siguieron a perfección el método ideado para seleccionar las fincas de la muestra. Con el fin de ajustar la muestra, se contaron todas las fincas de menos de 200 cuerdas en tamaño y las

each of the six size-of-farm groups based on "acres in this place." The six size-of-farm groups were as follows:

3 to 9 cuerdas	50 to 99 cuerdas
10 to 19 cuerdas	100 to 174 cuerdas
20 to 49 cuerdas	175 to 199 cuerdas

In determining the extent of the adjustment, the difference between the number of farms in the sample and the total number of farms divided by five was obtained for each size group. The actual adjustment for the size group was made by either eliminating or duplicating, on a random basis, farms in those municipios where the greatest over- or under-representation existed.

Method of Estimation.—Estimates based on the sample of farms represent figures for all farms. The estimate for an item was obtained by multiplying by five the tabulated total for that item for the farms in the 20 percent part of the sample and adding the total for the farms of 200 or more cuerdas.

Reliability of Estimates Based on the Sample.—The estimates based on the tabulation of data for a sample of farms are subject to sampling errors. In case all the data in a table are estimates based on a sample, a headnote for the table indicates that the data are estimates based on a sample of farms. Approximate measures of the sampling reliability of estimates are given in in Puerto Rico Tables 14 and 15 for farms reporting and for item totals. These measures indicate the general level of sampling reliability of the estimates but do not include adequate allowances for sources of error other than sampling variation as, for example, errors in original data furnished by farm operators.

Data in Puerto Rico Tables 14 and 15 are given to assist in determining the general level of sampling reliability of estimated totals. In Puerto Rico Table 15 a list of the items is given and the level of sampling reliability is shown in Puerto Rico Table 14. By referring to Puerto Rico Table 14 in the column for the level of sampling reliability designated in Puerto Rico Table 15, the sampling error according to the number of farms reporting may be obtained. For farms reporting, the indicated level of sampling is level 1. Puerto Rico Table 14 shows percentage limits such that the chances are about 68 in 100 that the difference between the estimates based on the sample and the figure that would have been obtained from a tabulation for all farms would be approximately within the limit specified. However, the chances are 99 in 100 that the difference would be less than two and one-half times the percentage given in the table.

The data in Puerto Rico Table 14 indicate that when the number of farms reporting specified items is small, the item totals are subject to relatively large sampling errors. Nevertheless, the considerable detail for every classification for each item is presented to insure maximum usefulness for appraising estimates for any combination of items that may be desired.

Percentage figures and averages derived from the tables will generally have greater reliability than the estimated totals; also, significant patterns of relationships may sometimes be observed even though the individual data are subject to relatively large sampling errors.

Differences in Data Resulting From Differences in Tabulations.—Many of the figures in the detailed Puerto Rico tables

fincas en la muestra para cada uno de los seis grupos de tamaño-de-finca, basado en "área total de la finca." Los seis grupos de tamaño-de-fincas fueron los siguientes:

3 to 9 cuerdas	50 to 99 cuerdas
10 to 19 cuerdas	100 to 174 cuerdas
20 to 49 cuerdas	175 to 199 cuerdas

En la determinación del alcance del ajuste, se obtuvo para cada grupo de tamaño la diferencia entre el número de fincas en la muestra y el número total de fincas dividio por cinco. El ajuste real por grupo de tamaño-de-finca se hizo eliminando o duplicando, al azar, fincas en estos municipios donde existía una gran sobre-representación o una representación demasiado baja.

Método de estimación.—Estimados basados en la muestra de fincas representan calculaciones para todas las fincas. El estimado de una partida se obtuvo multiplicando por cinco el total tabulado para esa partida de las fincas en la muestra, y sumando el total de las fincas de 200 cuerdas o más.

Confiabilidad de estimados basados en la muestra.—Los estimados basados en la tabulacion de los datos de la muestra de fincas están sujetos a errores del muestreo. En caso de que toda los datos en una tabla son estimada a base de la muestra, se indicará en la tabla que los datos son estimados basados en la muestra de fincas. Las medidas aproximadas de la confiabilidad de estimados del muestreo para fincas informando y para totales de ítems son dadas en las tablas para Puerto Rico 14 y 15. Estas medidas indican el nivel de confiabilidad del estimado del muestreo, pero no incluye tolerancia adecuada para fuentes de error de otras variaciones del muestreo como, por ejemplo, errores en la información original dada por los operadores de finca.

La información de las tablas para Puerto Rico 14 y 15 se dan para ayudar a determinar el nivel general de confiabilidad de los totales estimados de la muestra. En la tabla para Puerto Rico 15 se da una lista de las partidas, y el nivel de confiabilidad del muestreo está indicado en la tabla para Puerto Rico 14. Refiriéndose a la tabla para Puerto Rico 14 en la columna para el nivel de confiabilidad de la muestra designada en la tabla para Puerto Rico 15, se puede obtener el error del muestreo de acuerdo con el número de fincas que informan. Para fincas que informan, el nivel indicado en la muestra es el nivel 1. La tabla para Puerto Rico 14 expone los límites de por ciento de tal manera que las posibilidades son de alrededor de 68 en 100 que la diferencia entre los estimados basados en la muestra y el número que se hubiera obtenido de la tabulación de todas las fincas se encontrará aproximadamente dentro de los límites especificados. Sin embargo, las posibilidades son de 99 en 100 de que la diferencia será menor que dos veces y medio el por ciento dado en la tabla.

La data en la tabla 14 para Puerto Rico indica que cuando el número de fincas que informan es pequeño, los totales para partidas en la muestra están sujetas a errores relativamente grandes. Sin embargo, el detalle a considerar en cada clasificación por partida es presentado para asegurar una máxima utilidad para estimados de apreciación para cualquier combinación de partidas que se desee.

Por cientos y promedios derivados de las tablas generalmente tienen mayor confiabilidad que los totales estimados; como también, patronos significativos de relación algunas veces se pueden observar aunque la data individual está sujeta a errores del muestreo relativamente grande.

Diferencias en la información debido a diferencias en los procedimientos de tabulacion.—Muchas de las calculaciones en

represent estimates based on tabulations for only farms in the sample. The totals for these detailed distributions will, generally, differ somewhat from totals presented in other tables obtained from different tabulations that were made for all farms. Moreover, although most of the figures presented by municipios were obtained from tabulations of all farms, the data in Puerto Rico Tables 8 to 13 for farms classified by economic class of farm and by type of farm, and the municipio tables for farm expenditures, farm labor, facilities and equipment, and information related to agregados and medianeros were estimated for each municipio on the basis of data tabulated for the farms in the sample.

DEFINITIONS AND EXPLANATIONS

Definitions and explanations are presented only for those items for which the table descriptions are considered inadequate. The descriptive terms and explanations refer principally to the 1959 Census of Agriculture, although, in general, they are also applicable to earlier censuses. The definitions consist primarily of a résumé of the questionnaire wording, occasionally supplemented by the more essential parts of instructions given to the enumerators. For the exact phrasing of the inquiries and of the instructions included on the questionnaire, reference should be made to the facsimile of the 1959 Agriculture Questionnaire shown in the appendix.

GENERAL FARM INFORMATION

The Census Date.—The 1959 Census of Agriculture was taken as of November 1, 1959. Inventory items relate generally to November 1959. Data relating to area and quantity of crops harvested (except coffee) and to sales of agricultural products are for the crop year extending from November 1, 1958, to October 31, 1959. Data on the area and quantity of coffee harvested are for the crop year extending from March 1, 1958, to February 28, 1959. Although the heading of the livestock and poultry section of the agriculture questionnaire specified November 1 for all inventory items, the individual inquiries did not specify a date. Therefore, the replies may represent conditions as of the date the questionnaire was filled.

Questionnaires were generally filled during November 1959. The date on which the enumerator obtained the information required for the census of agriculture may affect the statistics because of changes that occurred between the census date and the actual date of enumeration.

Comparability of Data for Various Censuses.—Comparability of the data may be affected by such factors as the month in which the enumeration was made, the definition of a farm, the wording of the questions, etc. When the comparability is affected to an appreciable extent, mention is made of the differences under the specific item. Production figures may also be influenced by climatic and economic conditions existing during the period covered by the enumeration.

A Farm.—For the 1959 Census of Agriculture, places of 3 or more cuerdas were counted as farms if any agricultural products, other than vegetables for home use, were produced or if any livestock or 15 or more chickens or other poultry were kept on the place in 1959.

All the land under the control of one person or partnership was included as one farm. Control may have been through ownership, or through lease or rental arrangement.

las detalladas tablas para Puerto Rico representan estimados basados en las tabulaciones para fincas en la muestra. Los totales para estas distribuciones detalladas generalmente se diferencian de los totales presentados en las tablas obtenidas de las diferentes tabulaciones que fueron hechas para todas las fincas de Puerto Rico. Sin embargo, aunque casi todas las computaciones presentadas por municipio fueron obtenidas de tabulaciones para todas las fincas, los datos en las tablas para Puerto Rico 8 a 13 para fincas clasificadas por clase económica y tipo de finca, y las tablas para municipios para gastos de la finca, trabajo en la finca, facilidades y equipo, y la información relacionada a familias de agregados y medianeros fueron estimados para cada municipio a base de la data tabulada para las fincas en la muestra.

DEFINICIONES Y EXPLICACIONES

Se presentan definiciones y explicaciones solamente para aquellas preguntas en las cuales las descripciones anotadas en las tablas se consideran inadecuadas. Los términos descriptivos y explicaciones se refieren principalmente al Censo de Agricultura de 1959, aunque en general éstas son también aplicables a censos anteriores. Las definiciones consisten principalmente de un resumen del texto usado en el cuestionario, ocasionalmente suplementadas por las partes más esenciales de las instrucciones dadas a los enumeradores. Para obtener el texto completo de las preguntas y las instrucciones incluídas en el cuestionario, véase el facsímile del Cuestionario para Finca de 1959, en el apéndice.

INFORMACION GENERAL SOBRE FINCA

La fecha del censo.—El Censo de Agricultura de 1959 fué levantado el 1ro de noviembre de 1959. Las preguntas sobre inventario se refieren generalmente a noviembre de 1959. Los datos relacionados con el área, la producción y venta de productos agrícolas (con excepción del café), se refieren al año agrícola que se extiende de noviembre 1, 1958 a octubre 31, 1959. Los datos respecto al área y cantidad de café producido, se refieren al año agrícola de marzo 1,1958 a febrero 30, 1959. Aunque el encabezamiento de la sección de ganadería y aves en el cuestionario para finca especifica el 1ro de noviembre como la fecha para enumerar todas las preguntas sobre inventario, las preguntas individuales no se refieren a ninguna fecha en particular. Por lo tanto, las respuestas pueden representar condiciones existentes a la fecha en la cual se llenó el cuestionario.

Generalmente los cuestionarios fueron llenados durante el mes de noviembre de 1959. La fecha en la cual el enumerador obtuvo la información requerida para el censo de agricultura puede afectar las estadísticas debido a cambios que ocurrieron entre la fecha del censo y la fecha de enumeración.

Comparabilidad de datos.—La comparabilidad de los datos puede ser afectada por factores tales como el mes en el cual se hizo la enumeración, la definición de finca, la redacción de las preguntas, etc. Cuando la comparabilidad es afectada considerablemente, se hace mención de las diferencias bajo el producto agrícola específico. Los datos sobre la producción pueden ser afectados por factores climáticos y económicos prevalecientes durante el período cubierto por la enumeración.

Una finca.—Predios de 3 o más cuerdas eran contados como fincas para el Censo de Agricultura de 1959 si en los mismos se había llevado a efecto la siembra y cosecha de cualquier producto agrícola durante 1959, con la excepción de la siembra de vegetales para uso en el hogar, o si había en dichos predios algún ganado o 15 o más gallinas u otras aves.

Todo el terreno bajo el dominio de una persona o sociedad fué incluído como una sola finca. El dominio pudo haber sido mediante posesión o contrato de arrendamiento.

The census enumerator was not given the definition of a farm. He was instructed to obtain an agriculture questionnaire for every place of 3 or more cuerdas, whether or not it was considered a farm. Thus, agriculture questionnaires were filled for more places than those that qualified as farms. The determination as to which reports were to be included in the tabulations as farms was made during the processing of the questionnaires. This procedure was followed in order that uniform criteria could be applied.

For the 1940 and earlier censuses of agriculture, the definition of a farm was somewhat more inclusive. In each census prior to 1950 all places of 3 or more cuerdas on which there were agricultural operations were counted as farms. Places of less than 3 cuerdas were considered farms in 1940 if agricultural production during 1939 was valued at $100 or more; in 1935, 1930, and 1920, if agricultural production during the year covered by the census was valued at $100 or more, or if the place required the continuous services of at least one person; and in 1910, if agricultural production during 1909 was valued at $250 or more. Enumerators in censuses prior to 1950 were provided with the definition of a farm and were instructed to fill questionnaires only for those places which met the criteria.

In censuses from 1910 through 1940, separate questionnaires were obtained for medianeros (sharecroppers), but in 1950 and 1959 the operations of these individuals were included on the questionnaires for the farms on which they worked.

The decrease in the number of farms between 1940 and 1950 is probably the result, in part, of the change in the definition of a farm. The farms of less than 3 cuerdas in 1940 were not counted as farms in 1950.

Farm Operator.—A "farm operator" is a person who operates a farm, either performing the labor himself or directly supervising it. He may be an owner, a hired manager, or a tenant. If he rents land to others, he is considered as the operator of only that land which he retains. In the case of a partnership, one member was included as the operator. The number of farm operators is considered the same as the number of farms.

Farms Reporting or Operators Reporting.—Figures for all farms reporting or operators reporting represent the number of farms, or farm operators, for which the specified item was reported. For example, if there were 1,122 farms in a municipio and only 300 had cattle, the number of farms reporting cattle would be 300. The difference in the total number of farms and the number of farms reporting that item represents the number of farms not having that item, provided the inquiry was answered for all farms.

Land Owned, Rented, and Managed.—The land to be included in each farm was determined by asking the number of cuerdas owned, the cuerdas rented from others, and the cuerdas rented to others. The cuerdas in the farm were obtained by adding the cuerdas owned and cuerdas rented from others, and subtracting the cuerdas rented to others. In case of a managed farm, the person in charge was asked the total area managed. From this total managed area was subtracted any of the area which was rented to others. For 1950 and 1959, the figures for land owned, land rented from others, and land managed by farm operators include the land that farm operators rented to others. In censuses

Al enumerador no se le entregó la definición de una finca, sino que se le instruyó a que llenara un cuestionario para finca para cada predio de 3 o más cuerdas aunque el mismo fuese considerado o no como finca. De este modo se llenaron cuestionarios para finca para más predios que los que calificaban como fincas. La determinación en cuanto a cuáles eran los informes que debían considerarse como representativos de fincas y que debían incluirse en las tabulaciones, se llevó a efecto durante la elaboración de los cuestionarios en Kansas. Se siguió este sistema con el objeto de aplicar un criterio uniforme.

Para el censo de 1940 y otros censos anteriores de agricultura, la definición de finca se hizo un tanto más amplia. En cada censo anterior al de 1950, todos aquellos predios de 3 o más cuerdas en los cuales se llevaron a efecto operaciones agrícolas, fueron contados como fincas. Predios de menos de tres cuerdas fueron considerados como fincas en 1940 si los productos agrícolas cosechados en 1939 tenían un valor de $100 o más; en 1935, 1930, y 1920, si la producción agrícola durante el año cubierto por el censo tenía un valor de $100 o más, o si el predio requería los servicios continuo de por lo menos una persona; y en 1910, si la producción agrícola en 1909 tenía un valor de $250 o más. A los enumeradores de todos los censos anteriores a 1950 se les entregó la definición de finca y fueron instruídos a que llenaran informes solamente para aquellos predios que reunían los requisitos de la definición.

En todos los censos desde el 1910 al 1940 se obtuvieron cuestionarios separados para los medianeros, pero en 1950 las operaciones agrícolas de éstos se incluyeron en los cuestionarios correspondientes a las fincas donde ellos trabajaron.

La disminución en el número de fincas entre el 1940 y 1950 es probablemente el resultado, en parte, de los cambios en la definición de finca. Las fincas de menos de tres cuerdas en 1940 no se contaron como fincas en 1950.

Operadores de fincas.—Un operador de finca es una persona que explota una finca, ya sea desempeñando él mismo la labor o supervisándola directamente. Puede ser el dueño, un administrador asalariado, o un arrendatario. Si da terreno en arrendamiento a otras personas, se le considera como operador solamente de aquel terreno que él tiene. En el caso de una sociedad, un sólo miembro fué incluído como operador. El número de operadores de fincas es considerado igual al número de fincas.

Fincas que informan u operadores que informan.—Las cifras para todas las fincas u operadores que informan representan el número de fincas u operadores de fincas para los cuales la pregunta especificada fué informada. Por ejemplo, si habían 1122 fincas en un municipio y de éstas solamente 300 tenían ganado, el número de fincas informando ganado sería 300. La diferencia entre el número total de fincas y el número de fincas informando dicho dato representa el número de fincas que no tienen ganado, siempre y cuando la pregunta fué contestada para todas las fincas.

Terreno propio, arrendado, y administrado.—El terreno a ser incluído en cada finca fué determinado preguntando el número de cuerdas poseídas, las cuerdas arrendadas de otras personas y las cuerdas arrendadas a otras personas. Se obtuvo el total de cuerdas en la finca sumando las cuerdas poseídas y las cuerdas arrendadas de otras personas y restando las cuerdas arrendadas a otras personas. En el caso de una finca bajo un administrador asalariado, se le preguntó a la persona a cargo el área total administrada para su patrono. Del área total administrada se restó el área que hubiese arrendada a otros. Para el 1950 y

prior to 1950 the enumerator was instructed to include all land rented from others and to exclude all land rented to others. He recorded only that portion of the area owned and the area rented from others which was retained by the farm operator. Thus, the land included in each farm was essentially the same as for the 1950 and 1959 Censuses.

Land Owned.—Land owned includes all land which the operator or his wife, or both, hold under title, purchase contract, or as one of the heirs, or as a trustee of an undivided estate.

Land Rented from Others.—Land rented from others includes land rented or leased under any arrangement whereby the tenant controls the use of the land.

Land Rented to Others.—For the most part, this land rented to others represents agricultural lands but it also includes tracts rented for residential or other purposes. When land is leased or rented, the tenant is considered the farm operator. The owner of the farm is considered as operating only that portion of the land not assigned to tenants. Land worked on shares by medianeros was not classified as "land rented to others."

Land Area.—The approximate land area reported for 1959 for Puerto Rico is ~~2,126,386~~ cuerdas, as compared to 2,255,684 cuerdas reported in the 1950 Census. All land areas are given in terms of cuerdas. A cuerda is equivalent to 0.9712 of an acre.

Land in Farms.—The area designated "land in farms" includes considerable areas of land not actually under cultivation and some land not used for pasture or grazing. All woodland and wasteland owned by farm operators, or included in tracts rented from others, is included as land in farms.

Land in Farms According to Use.—Land in farms was classified according to how it was used during the period from November 1, 1958, to October 31, 1959. These classes of land are mutually exclusive, i.e., each cuerda of land was included only once even though it may have had more than one use during the period specified. The classes are as follows:

Cropland Used for Crops.—This includes land from which crops were harvested; land in bearing and nonbearing fruit and nut trees, including plantains, bananas, and coconuts; and land from which no crop was harvested during the year covered by the census but which was occupied by sugarcane and pineapples for future harvest. Land from which two or more crops were harvested was to be counted only once. Since each crop was reported separately under "crops harvested," a total of the cuerdas of the individual crops harvested in a municipio may exceed the area designated as "cropland used for crops" in that municipio.

Pastureland Suitable for Crops.—This includes open or brushland pasture which the respondent considered suitable for use for crops.

Pastureland not Suitable for Crops.—This includes any open or brushland pasture which the respondent did not consider suitable for use for crops.

Land not Used for Crops or Pasture Occupied by Hills and Mountains.—This includes all land in hills, mountains, and brushland which the respondent did not consider as suitable for crops or for use as pastureland.

1959, las cifras para terreno propio, terreno arrendado de otros y terreno administrado por operadores de fincas incluyen el terreno que los operadores de fincas arrendaron a otras personas. En censos anteriores al 1950, el enumerador fué instruído a incluir todo el terreno arrendado de otros y excluir todo el terreno arrendado a otros. Solamente anotó aquella parte del área que era de propiedad del operador y el área arrendada de otros. De este modo el terreno incluído en cada finca fué prácticamente igual para los censos del 1950 y 1959.

Terreno propio.—Terreno propio incluye todo el terreno que el operador o su esposa, o ambos, poseen bajo título, contrato de compra, o como uno de los herederos, o como fideicomisario de una herencia.

Terreno tomado a título de arrendamiento.—El terreno tomado a título de arrendamiento incluye terreno arrendado bajo cualquier condición mediante el cual el arrendatario tiene el derecho al uso de la tierra.

Terreno dado en arrendamiento.—La mayor parte de este terreno dado en arrendamiento representa terrenos para faenas agrícolas pero también incluye predios dados en arrendamiento para fines residenciales y otros propósitos. Cuando el terreno es dado en arrendamiento, el arrendatario es considerado como operador de la finca. El dueño de la finca es considerado como explotador solamente de aquella parte del terreno no asignado a los arrendatarios. El terreno trabajado por los medianeros no se clasificó como terreno arrendado a otros.

Area del terreno.—El área aproximada del terreno informada para Puerto Rico en 1959 es de 2,126,386 cuerdas, comparada con 2,255,684 cuerdas informadas en el censo de 1950. Todas las áreas se informan en términos de cuerdas. Una cuerda es equivalente a 0.9712 de un acre.

Terreno de las fincas.—El área designada como "terreno en fincas" incluye áreas considerables de terreno que no están realmente bajo cultivo y algún terreno no usado para pasto de corte o pastoreo. Todo terreno enmalezado y terreno baldío propiedad de los operadores de fincas o incluído en predios arrendados de otros está comprendido como terreno en fincas.

Terrenos en las fincas de acuerdo con su uso.—El terreno en las fincas fué clasificado basándose en el uso que se hizo del mismo durante el período de noviembre 1ro de 1958 al octubre de 31 de 1959. Estas clases de terreno se excluyen mutuamente, o sea, cada cuerda de terreno fué incluída una sola vez aún cuando la misma hubiese tenido más de un uso durante el período especificado. Las clases de terreno son como sigue:

Terreno de cultivo usado para cosechas.—Esta clase incluye terreno del cual se cosecharon productos agrícolas, terreno con árboles frutales y de nueces en estado de producción y de no producción, incluyendo plátanos, guineos y cocos, y terreno del cual no se cosechó ningún producto agrícola durante el período cubierto por el censo pero que estaba sembrado de caña de azúcar o piñas para cosecha futura. Terreno del cual se cosecharon dos o más productos agrícolas debía contarse una sola vez. Debido a que cada producto agrícola fué informado por separado bajo "productos agrícolas cosechados" el total de las cuerdas de los productos agrícolas individualmente cosechados en un municipio puede exceder el área designada como "terreno de cultivo usado para cosechas."

Terreno de pasto que se puede cultivar.—Este incluye el terreno con pasto abierto o enmalezado que el operador de la finca consideró apropiado para cultivar.

Terreno de pasto que no se puede cultivar.—Este incluye el terreno de pasto abierto o enmalezado que el operador de la finca no consideró apropiado para cultivar.

Terreno que no es de cultivo ni de pasto cubierto por montes y malezas.—Este incluye todo terreno de montes o malezas que el operador de la finca no consideró apropiado para cultivar o para pasto.

Land Occupied by Buildings, Roads, and Wasteland.—This item includes all house lots, roads, fences, and wasteland. It includes all farmland which does not belong under any of the other land-use classes.

Irrigated Land.—Irrigated land is that to which water is applied by artificial means for agricultural purposes. The land reported as under irrigation was included in cropland used for crops or in pastureland suitable for crops. Farms reporting irrigated land include all farms with irrigation, regardless of whether all or part of the farm was irrigated.

Off-farm Work by Farm Operator.—To obtain a measure of the extent to which farm operators worked off their farms, each farm operator was asked the number of days he worked off his farm in 1959. Off-farm work was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions, whether the work was done on the farm premises or elsewhere. Exchange work was not included.

Farm operators working off their farms were asked to report the principal occupation or kind of job at which they worked off the farm. These occupations or kinds of work were classified into five groups, as follows:

1. Farm laborers
2. Skilled laborers
3. Laborers other than farm and skilled
4. Professional workers and government employees
5. All other occupations

Facilities and Equipment.—Inquiries were made in 1959 for farms in the sample to determine the presence or absence of selected items on each place such as (1) electricity, (2) piped running water, (3) television, (4) radio, (5) milking machine, (6) milk cooler, and (7) silos. Such facilities or equipment were to be counted even though temporarily out of order. Piped running water was defined as water piped from a pressure system or by gravity flow from a natural or artificial source.

The number of selected types of other farm equipment was also obtained for farms in the sample. The selected kinds of farm equipment to be reported were (1) tractors, (2) motortrucks, (3) coffee pulping machines, (4) coffee drying platforms, (5) artificial coffee driers, (6) oxcarts, (7) other carts, and (8) artificial ponds.

Farms by Kind and Ownership of Work Power.—Farms were grouped on the basis of work power used as farms with tractor power or farms with animal power and by ownership of this work power used, i. e.; on the basis of whether the tractor, oxen, horse, mule, etc., belonged (1) to the farm operator only, (2) to the farm operator and another person jointly, (3) to the landlord of farm operator, (4) to another person, or (5) to a Government agency.

Agregados Living on Farms.—Agregados families include those families living on farms that are not operated by any member of the family. A member of the agregado family may or may not be an employee of the farm operator, and he may or may not produce any agricultural products of his own on the farm. An agregado usually lives on a small plot large enough for the cultivation of few crops for consumption by members of the family or for the raising of some chickens, hogs, or cows. He may be

Ocupado por edificaciones, caminos y terreno baldío.—Esta clasificación incluye todo el terreno ocupado por edificaciones, caminos, verjas y terreno baldío. Incluye todo el terreno en la finca no clasificable bajo ninguna de las otras clases de uso del terreno.

Terreno bajo riego.—Terreno bajo riego es aquél al cual se la ha aplicado agua por medios artificiales con el objeto de utilizarlo para fines agrícolas. El terreno informado como bajo riego fué incluído en "terreno de cultivo para cosechas" o en "terreno de pasto que se puede cultivar." Las fincas que informan terreno bajo riego incluyen todas aquéllas que estaban bajo riego, aunque toda la finca o sólo parte de la misma fuera regada.

Trabajo del operador fuera de su finca.—Para obtener una medida hasta que punto los operadores de finca trabajan sus fincas, a todos los operadores se les preguntó el número de días que él trabajó fuera de la finca en el 1959. Trabajo fuera de la finca se definió a incluir trabajo por paga en otras fincas como también todos los tipos de trabajos fuera de fincas, en negocios y en profesiones, y si el trabajo se hizo en una finca o en cualquier otra parte. Intercambio de trabajo no se incluye. A los operadores que informaron trabajar fuera de su finca, se les pidió que informaran la ocupación principal o clase de trabajo que hicieron. Estas ocupaciones o clases de trabajo se clasificaron en cinco grupos, como sigue:

1. trabajadores agrícolas
2. trabajadores diestros
3. trabajadores otros que agrícolas o diestros
4. profesionales y empleados del gobierno
5. todas las otras ocupaciones

Equipo y facilidades.—El cuestionario del 1959 contenía, para la muestra de fincas, preguntas que determinaban en el sitio la presencia o ausencia de ciertos ítems seleccionados; como, (1) servicio de energía eléctrica (2) agua corriente (3) televisor (4) radio (5) ordeñadoras mecánicas (6) tanques de refrigeración y (7) silos. Estas facilidades y equipo se debían haber incluído aunque estuvieran dañados temporalmente. Agua corriente se define como agua llevada por tubería de una fuente artificial o natural mediante un sistema de presión o por gravedad.

También se obtuvo en la muestra el número de otro tipo de equipo seleccionado. La clase de equipo seleccionado a informarse fué la siguiente, (1) tractores (2) camiones (3) despulpadoras de café (4) correderas (5) bombos y bateas (6) carretas de bueyes (7) otras carretas (8) charcas.

Clasificación de las fincas por clase y dueño de fuente de trabajo.—Las fincas se agruparon a base de la fuente de trabajo usada, como fincas con fuerza mecánica o fuerza animal, y por dueño de esta fuente de trabajo, a base de si el tractor, buey, caballo, mulo, etc., perteneció; (1) solamente al operador de la finca, (2) al operador de la finca y a otra persona juntamente, (3) al dueno de la finca, (4) a otra persona, o (5) a una agencia del gobierno.

Agregados.—Las familias de agregados viven en una finca que no es explotada por ningún miembro de dicha familia. Un miembro de esta familia puede ser o no un empleado del operador de la finca y puede o no producir en la finca para su uso personal cualquier producto agrícola. Usualmente un agregado vive en un pequeño predio de terreno lo suficientemente grande para permitirle la siembra de algunos productos agrícolas para el consumo de su familia o la crianza de algunas gallinas, cerdos

allowed to use the land gratuitously or may pay informally for the use of the land in work, a share of the agricultural products, or money. He does not control the use of the land and does not have a definite contract with the operator of the farm. The agregado may own, rent, or use rent-free the house in which he lives.

The 1959 Agriculture Questionnaire, like the 1950 questionnaire, asked the farm operator to report the number of agregado families that were not medianeros living on the farm at the time of the census and the amount of land cultivated by these agregados between November 1, 1958, and October 31, 1959. Livestock belonging to agregados and kept on the farm, and all agricultural production by agregados on the farm, were to be reported by the operator of the farm on which the agregados lived.

Medianeros (sharecroppers).—A medianero is a person who works land under a definite arrangement with a farm operator, receiving a certain share of the crops in return for his labor or other contribution.

The 1940 Census considered the land operated by a medianero as a separate farm if the tract of land was 3 cuerdas or more in size or if its agricultural products in 1939 were valued at $100 or more. In 1959, as in 1950, separate agriculture questionnaires were not obtained for places operated by medianeros. Farm operators were instructed to report the number of medianeros working on the farm from November 1, 1958, to October 31, 1959, and the cuerdas cultivated by them during this period, and to include in the report for their farm all livestock kept and agricultural production by medianeros. In censuses prior to 1950 provisions were not made for the enumeration of land operated by medianeros if the size of the place was less than 3 cuerdas and the value of agricultural products was less than $100. In 1959 and 1950, however, when such places were part of a farm, the production was to be reported on the questionnaire for the farm on which the medianero worked. When such places were not a part of any farm, sales of agricultural products were to be reported for parcelas unless the place was less than one-fourth of a cuerda in size.

Since it is possible for the same person to work as medianero on more than one farm, census figures may overstate the number of medianeros. Likewise, since it is possible for a person to live as an agregado on one farm and work as medianero on another, some families may be counted both as agregados and as medianeros.

Farm Labor.—The farm labor inquiries for 1959 called for the number of persons 14 years old and over, doing farm work on the farm during the calendar week preceding the enumeration. Farm work was to include any work, chores on the farm, and the planning necessary to the operation of the farm. Housework was not to be included. Inasmuch as the enumeration occurred over a period of several weeks, the calendar week preceding the enumeration is not the same for all farms.

Separate figures were obtained for the farm operator, unpaid members of the operator's family, salaried workers, and hired workers.

Specified Farm Expenditures.—Data on farm expenditures were obtained only for selected items. Amounts spent by agre-

o vacas. Puede estar autorizado a usar el terreno gratuitamente o puede pagar informalmente por el uso del mismo por medio de su trabajo, con parte de los productos agrícolas o dinero. No tiene control sobre el uso del terreno y no tiene contrato definitivo con el operador de la finca. La casa en la cual vive el agregado puede ser de su propiedad, alquilada o usada sin pagar alquiler.

El Cuestionario para Finca de 1959, al igual que el de 1950, solicitaba del operador de la finca que informara el número de familias de agregados que no eran medianeros, viviendo en la finca en la fecha del censo y el área de terreno cultivado por éstos entre el 1ro de noviembre de 1958 y el 31 de octubre de 1959. El operador de la finca era el responsable de suministrar el enumerador e incluir como parte de su finca todos los datos en relación con el total de ganado perteneciente a los agregados y mantenido en la finca, al igual que toda la producción agrícola de dichos agregados.

Medianeros.—Un medianero es una persona que trabaja terreno bajo un arreglo definitivo con un operador de finca recibiendo una parte de las cosechas en retribución por su labor u otra contribución.

El Censo de 1940 consideraba el terreno trabajado por un medianero como una finca individual si dicho predio de terreno era de 3 cuerdas o más en tamaño o si el valor de los productos agrícolas cosechados en 1939 era de $100 o más. En 1959, al igual que en el 1950, no se llenaron cuestionarios para finca por separado para aquellos predios operados por medianeros. Los operadores de fincas fueron instruídos a informar el número de medianeros trabajando en la finca desde el 1ro de noviembre de 1958 al 31 de octubre de 1959 y las cuerdas cultivadas por éstos durante dicho período, y a incluir en los datos para sus fincas todo el ganado perteneciente a los medianeros y mantenido en la finca al igual que toda la producción agrícola de dichos medianeros. En censos anteriores al 1950 no se tomaron medidas para la enumeración de terreno explotado por medianeros, si el tamaño del predio y el valor de la producción agrícola era menos de tres cuerdas y $100 respectivamente. En el 1959 y 1950, sin embargo, cuando tales predios eran parte integrante de una finca, la producción debía informarse en el cuestionario para la finca donde el medianero trabajaba. Si tales predios no eran parte integrante de una finca, las ventas de productos agrícolas debían informarse en el cuestionario para parcela, siempre y cuando el tamaño del predio no fuese menor de un cuarto de cuerda.

Debido a que una persona puede trabajar como medianero en más de una finca, puede haber cierto grado de exageración en las cifras del Censo en cuanto al número de medianeros. Igualmente, como una persona puede vivir como agregado en una finca y trabajar como medianero en otra, algunas familias pueden ser contadas como agregados y como medianeros a la vez.

Trabajo en la finca.—En 1959 las preguntas relacionadas con el trabajo en la finca solicitaban el número de personas de 14 años o más trabajando en la finca en cualquier operación agrícola, durante la semana calendario precedente a la enumeración. Trabajo en la finca debió incluir cualquier trabajo, faena agrícola y la planificación necesaria para la operación de una finca. El trabajo doméstico no fué incluído. Esta semana no es la misma para todas las fincas debido a que la enumeración cubrió un período de varias semanas.

Se obtuvieron datos por separado para el operador, miembros de la familia del operador trabajando sin paga, trabajadores asalariados y obreros a jornal.

Gastos especificados de la finca.—Se obtuvieron únicamente datos sobre gastos en la finca para partidas seleccionadas. Las

gados and medianeros were to be reported for the farm on which those persons worked. Only cash payments were to be included for hired labor. Expenditures for housework were not to be included.

Expenditures for feed were to include expenditures for concentrates and mineral supplements as well as for grain and mixed feed.

Expenditures for the purchase of chemical fertilizer were to include the total amount spent for commercial fertilizers of all kinds used on the farm.

PRESENTATION OF STATISTICS

This report presents data from the 1959 Census of Agriculture with comparable data for Puerto Rico for previous censuses, beginning with 1910. Data are presented for each municipio for 1959 and for 1950.

Puerto Rico Tables.—The Puerto Rico summary tables present data for items for which historical figures are available for censuses prior to 1959. They present also the data for cross-tabulations made by tenure of operator, size of farm, type of farm, and economic class of farm for 1959.

Municipio Tables.—The municipio tables present information for most of the items on the 1959 Agriculture Questionnaire, together with the available comparable data from the 1950 Census.

Minor Civil Division Tables.—Data for most of the items included in the 1959 Census were tabulated by minor civil divisions (barrios), but these detailed tabulations are not included in any published reports. Information for these small geographic areas may be obtained by paying the cost of checking the data and preparing statistical tables.

LIVESTOCK

The 1959 Agriculture Questionnaire provided for an inventory of all the important kinds of animals and poultry on farms. Animals were to be enumerated on the farm on which they were located at the time of the enumeration, regardless of ownership. The farm operator was asked to report on his farm animals belonging to the agregados and medianeros. The inquiries regarding animal production and sales of animal products on farms relate to the period from November 1, 1958, to October 31, 1959.

Cows and Heifers, Cows Milked, and Milk Sold.—Data on number of cows and heifers relate to November 1959, but the data on the number of cows milked and milk sold relate to the period from November 1, 1958, to October 31, 1959.

Goats and Goats Milked.—Data on the number of goats on the farm relate to November 1959, while data on the number of goats milked relate to the period from November 1, 1958, to October 31, 1959.

Comparability with Previous Censuses.—Comparability of data on the number of livestock and poultry for the various cen-

cantidades gastadas por agregados y medianeros trabajando el terreno fueron informadas para la finca en donde esas personas vivían o trabajaban. Solamente los pagos en efectivo fueron incluídos en la pregunta relacionada con la mano de obra alquilada. Los gastos del servicio doméstico no fueron incluídos.

Los gastos para alimento de animales y aves incluyó gastos para alimentos concentrados y suplementos minerales al igual que gastos para granos.

Los gastos para la compra de abono químico incluyó la cantidad total gastada en la compra de toda clase de abonos comerciales usados en la finca.

PRESENTACION DE LAS ESTADISTICAS

Este informe presenta los datos del Censo de Agricultura de 1959 y datos comparables de censos anteriores empezando con el Censo de 1910. Los datos están presentados para Puerto Rico y para cada municipio.

Tablas para Puerto Rico.—Las tablas para Puerto Rico presentan datos sobre aquellos productos agrícolas para los cuales existen cifras anteriores a 1959. También presentan datos en tabulaciones cruzadas según la tenencia del operador, el tamaño, el tipo y la clase económica de finca para 1959.

Tablas para municipios.—Las tablas para municipios contienen los datos relacionados con la mayoría de los productos agrícolas que aparecen en el Cuestionario para Finca de 1959, conjuntamente con los datos comparativos disponibles del Censo de 1950.

Tablas para divisiones civiles menores.—Los datos correspondientes a la mayoría de los productos agrícolas incluídos en el Censo de 1959 fueron tabulados por divisiones civiles menores o barrios pero estas tabulaciones detalladas no están incluídas en los informes publicados. Las informaciones para estas pequeñas áreas geográficas pueden ser obtenidas pagando el costo de buscar los datos y de preparar las tablas estadísticas.

ANIMALES EN LA FINCA

El Cuestionario para Finca usado para el Censo de Agricultura de 1959 estipulaba que se hiciera un inventario de toda clase importante de animales y aves en la finca. Los animales debían ser enumerados en la finca en que se encontraran en el momento de la enumeración sin tomar en consideración quiénes eran los dueños de los mismos. Era responsabilidad del operador informar los animales que tenía en su finca pertenecientes a agregados y medianeros. Las preguntas en relación con la producción y venta de productos animales en las fincas se refieren al período del 1ro de noviembre de 1958 al 31 de octubre de 1959.

Vacas y novillas, vacas ordeñadas y leche vendida.—Los datos relativos al número de vacas y novillas se refieren al 1ro de noviembre de 1959 pero la información sobre el número de vacas ordeñadas y leche vendida cubre el período del 1ro de noviembre de 1958 al 31 de octubre de 1959.

Cabros y cabras ordeñadas.—La información sobre el número de cabros en la finca se refiere al 1ro de noviembre de 1959, mientras que los datos sobre el número de cabras ordeñadas se refieren al período del 1ro de noviembre de 1958 al 31 de octubre de 1959.

Comparabilidad con censos anteriores.—La comparabilidad de datos sobre animales con los datos de censos anteriores está

suses is affected by the date of the census enumeration, changes in specification of age groups to be reported, and other variations in questionnaire wording and instructions. Table A lists the enumeration date and animal age groups enumerated for each census from 1910 to 1959.

In 1940, animals on places which did not qualify as farms were reported under "Domestic animals not on farms." Some of the animals that would have been classified as "not on farms" under 1940 procedures were enumerated on parcelas in 1950, while others belonging to medianeros living on farms were included in the report of the farms on which the medianeros lived. There were no provisions in 1950 and 1959 for the enumeration of animals located on places less than one-fourth cuerda in size. Animals and poultry on parcelas—places of one-fourth to 3 cuerdas in size—were not enumerated in 1959.

In 1950 and 1959, the farmer was asked to give separate reports on the number of hens (gallinas) and the number of chickens, pullets, and roosters (pollos, pollonas, y gallos) on the farm. In the 1920, 1930, 1935, and 1940 Censuses, the agriculture questionnaire asked only for the number of "gallinas." The term "gallinas" specifically refers to "hens" but is also used in Puerto Rico in a more general sense to refer to all chickens. Separate inquiries regarding hens and chickens, pullets and roosters were included on the 1950 and 1959 questionnaires in order to prevent misunderstanding as to the age and sex groups of chickens to be reported.

afectada por la fecha de enumeración del Censo, cambios en las especificaciones de edades que debían informarse y otras variaciones en la terminología usada en el cuestionario y en las instrucciones. La Tabla "A" presenta la fecha de levantamiento censal y los animales de acuerdo con las edades mínimas que debían tener para ser enumerados en cada censo desde 1910 a 1959.

En 1940 aquellos animales en lugares que no reunían los requisitos para ser clasificados como fincas fueron informados como "animales domésticos fuera de fincas." Algunos de los animales que hubiesen sido clasificados como "animales fuera de fincas" de acuerdo con el criterio y procedimiento puestos en práctica en 1940, fueron enumerados en parcelas en 1950, mientras que aquellos otros animales pertenecientes a medianeros residentes en fincas fueron incluídos en el informe correspondiente a los operadores de las fincas donde estos medianeros vivían. Los animales que había en predios cuyas extensiones eran de menos de un cuarto de cuerda no fueron enumerados en el Censo de 1950 ni en el Censo de 1959. Los animales y aves en las parcelas, sitios de un cuarto a menos de tres cuerdas, no fueron enumerados en el 1959.

En 1950 y 1959 se solicitó del agricultor que diera datos por separado sobre el número de gallinas, pollos, pollonas y gallos en la finca. En los Censos de 1920, 1930, 1935 y 1940 el cuestionario de agricultura solicitaba únicamente el número de gallinas. El término "gallinas" se refiere específicamente a las hembras del gallo o también puede usarse como término general que incluye gallinas, pollos, pollonas, y gallos sin tomar en cuenta el sexo o la edad. Por lo tanto para evitar confusión en la interpretación del término, y que tal vez en algunos casos se omitiera el número de gallos y pollos, al informar este dato se hizo la pregunta por separado para cada clase.

TABLA A.—FECHAS DE ENUMERACION Y EDADES DE LOS ANIMALES INFORMADOS EN LOS CENSOS DE 1910 A 1959

Partida	1959 (Noviembre 1)	1950 (Abril 1)	1940 (Abril 1)	1935 (Diciembre 1)	1930 (Abril 1)	1920 (Enero 1)	1910 (Abril 15)

Gallinas	Todas las edades[1]	Todas las edades[1]	Más de cuatro meses.	Edad no especificada	Edad no especificada	Edad no especificada	Edad no especificada

[1]En los Censos de 1959 y 1950 se preguntó a los agricultores por el número de gallinas, y por el número de pollos, pollonas y gallos por separado.

TABLE A.—CENSUS ENUMERATION DATES AND LIVESTOCK AND POULTRY AGE GROUPS REPORTED IN THE VARIOUS CENSUSES: 1910 TO 1959

Item	1959 (Nov. 1)	1950 (April 1)	1940 (April 1)	1935 (Dec. 1)	1930 (April 1)	1920 (Jan. 1)	1910 (April 15)
Horses	All ages	All ages	Over 3 months old	All ages	All ages	All ages	All ages.
Burros and mules	All ages	All ages	Over 3 months old	All ages	All ages	All ages	All ages.
Cattle and calves	All ages	All ages	Over 3 months old	All ages	All ages	All ages	All ages.
Sheep and lambs	All ages	All ages	Over 6 months old	All ages	All ages	All ages	All ages.
Goats and kids	All ages	All ages	Over 4 months old	All ages	All ages	All ages	All ages.
Hogs and pigs	All ages	All ages	Over 4 months old	All ages	All ages	All ages	All ages.
Chickens	All ages[1]	All ages[1]	Over 4 months old	Age not specified	Age not specified	Age not specified	Age not specified.

[1]In the 1959 and 1950 Censuses, farmers were asked to report hens and all other chickens (chickens, pullets, and roosters) separately.

CROPS

Crops Harvested.—The agriculture questionnaire was so organized that it was possible to list the area and quantity harvested for every crop grown on the farm. If a separate question was not on the questionnaire for a particular crop, that crop was to be reported under one of several "all other" questions.

The units of measure used for reporting the quantity harvested for some crops have varied from one census to another. The figures on quantity harvested for each crop are shown in the unit of measure appearing on the 1959 questionnaire. Sometimes this required that the figures for earlier years be converted into units different from those published for those years. Conversions have been made by using the weights and measures in current use.

Field Crops.—The 1959 questionnaire obtained data on the cuerdas harvested and tons produced of each of the three types of sugarcane culture during the 1959 crop year as well as information on the area planted in all three culture types on November 1, 1959, and the area planted in fall cane (gran cultura) on November 1, 1959, for harvest in 1960.

For pineapples, the farm operator was asked to report cuerdas harvested and tons harvested from November 1, 1958, to October 31, 1959, as well as the total area planted in the crop on November 1, 1959, and the estimated area for harvest in 1960.

For all remaining field crops (except coffee and ornamental plants) data are published on the number of cuerdas harvested and quantity harvested from November 1, 1958, to October 31, 1959, and the quantity of the crops harvested during this period that was sold or was to be sold.

In 1959 and 1950, information was obtained on the number of cuerdas cut for specified kinds of forage crops. In the 1940 Census, only one question regarding the area was asked for all forage crops harvested.

Vegetables.—In 1959 and 1950, farm operators were asked to report the cuerdas harvested, pounds harvested, and value of sales for each vegetable harvested for sale. In the 1940 Census only cuerdas harvested were enumerated for individual vegetables, and only a total was obtained for the value of all vegetables sold.

Fruits.—For each fruit, the 1959 Agriculture Questionnaire called for the number of cuerdas in trees or plants; the quantity harvested and sold; and, except for bananas and plantains, the number of bearing and nonbearing trees or plants on farm.

CLASSIFICATION OF FARMS

Farms by Size.—Farms were classified by size according to the total land area of each farm. Classification of farms by size was arranged to permit comparison with previous censuses in Puerto Rico as well as with censuses in the continental United States.

PRODUCTOS AGRICOLAS

Productos agrícolas cosechados.—El cuestionario para finca estaba preparado en tal forma que era posible anotar el área y la cantidad cosechada para cada producto agrícola que fué sembrado en la finca. Si no había en el cuestionario una pregunta específica para anotar los datos sobre un producto agrícola en particular, esta cosecha y sus datos respectivos debía de informarse bajo una de las varias preguntas con el epígrafe de "otros."

Las unidades de medidas usadas para informar la cantidad cosechada de algunos productos agrícolas han cambiado de un censo a otro. Las cifras sobre cantidad cosechada para cada producto agrícola aparecen en la unidad de medida que se indica en el cuestionario para finca de 1959. Esto requirió que en algunos casos los datos informados en años anteriores se cambiaran a otras unidades distintas a las publicadas en dichos años. Los cambios se hicieron usando las medidas en uso corriente.

Cosechas principales y frutos menores.—Se obtuvieron datos en el cuestionario para finca de 1959 sobre las cuerdas de caña cortadas y las toneladas producidas de cada uno de los tres tipos distintos de siembra de esta cosecha durante el año agrícola 1959, así como información sobre el área total de caña de los tres tipos sembrada al 1ro de noviembre de 1959 y el área de caña de Gran Cultura que estaba sembrada al 1ro de noviembre de 1959 para cortarse en el 1960.

Con relación a la piña, se le preguntó al agricultor las cuerdas cosechadas, las toneladas cosechadas del 1ro de noviembre de 1958 al 31 de octubre de 1959, así como el área total sembrada de este producto agrícola al 1ro de noviembre de 1959 y el área estimada que se cosecharía en el año entrante.

Para las restantes cosechas principales y frutos menores (con excepción del café y de plantas ornamentales), se publican datos sobre el número de cuerdas cosechadas y cantidad cosechada del 1ro de noviembre de 1958 al 31 de octubre de 1959, y la cantidad cosechada de dichos productos agrícolas durante este período que fué vendida o que estaba disponible para venderse.

En el 1959 y 1950 se obtuvo información sobre el número de cuerdas de las distintas clases de yerbas que se cortaron para forraje. En el Censo de 1940 se preguntó solamente por el área total de yerbas que se cortaron para forraje.

Vegetales.—Los operadores de las distintas fincas informaron al enumerador en 1959 y 1950 las cuerdas cosechadas, cantidad vendida y valor de venta para cada vegetal que fué producido para el mercado. En el Censo de 1940 solamente se informaron las cuerdas cosechadas para cada hortaliza mientras que el valor de las ventas se refería al valor total de todos los vegetales.

Frutas.—El Censo de Agricultura de 1959 solicitaba el número de cuerdas sembradas de árboles frutales, la cantidad cosechada y vendida, y el número de árboles o plantas en edad de producción y de no producción en cada finca, con excepción de los guineos y plátanos.

CLASIFICACION DE FINCAS

Fincas por Tamaño.—Las fincas se clasificaron por tamaño de acuerdo con el área total de terreno en cada una. La clasificación de fincas por tamaño fué hecha en tal forma que permite comparación con los censos anteriores de Puerto Rico, así como también con los censos de los Estados Unidos.

Farms by Tenure of Operator.—In the 1959 Census farm operators are classified according to the tenure under which they operate the land in their farm. The tenure was determined on the basis of the report as to land owned, total land rented from others, and land managed for others.

Full owners own land but do not rent from others.

Part owners own land and rent land from others.

Managers operate farms for others and are paid a wage or salary for their services. Persons acting merely as caretakers, "mayordomos" (foremen), or hired laborers are not classified as managers. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as another farm. The decrease in the number of farms operated by managers from 1940 to 1950 resulted largely from changes in procedures in the classification of farms by tenure. In the 1940 and prior censuses, a considerable number of small farms operated by foremen, sons of owners, etc., were classified as operated by managers. In 1950 and 1959, such farms were classified as operated by owners rather than by managers. The farms operated by a church, a school, a hospital, or a government agency, were classified as operated by managers.

Tenants rent from others all the land they operate.

Farms by Economic Class.—A classification of farms by economic class was made for the purpose of segregating groups of farms that are somewhat alike in their characteristics and size of operations. This classification was made in order to present an accurate description of the farms in each class and in order to provide basic data for an analysis of the organization of agriculture. Only the farms in the sample were classified by economic class. The totals given in the tables represent estimates for all farms based on tabulations of the data for the farms included in the sample.

The classification of farms by economic class was made on the basis of the total value of all farm products sold and number of days the farm operator worked off the farm. Farms operated by institutions or government agencies (except farms operated by the Land Authority) were always classified as abnormal.

Except in the case of vegetables sold and ornamental plants sold, the value of crops, animals, and animal products sold was not obtained in the 1959 Census. The value of sales was estimated by multiplying the quantity sold for each crop, animal, or animal product by unit prices. The unit prices used were as follows:

Farm Product	*Price per unit (dollars)*	*Unit*
Sugarcane	9.10	Ton
Pineapples	49.83	Ton
Coffee	.56	Pound
Tobacco	.31	Pound
Cotton	.13	Pound
Rice	.07	Pound

Fincas por Tenencia del Operador.—En el censo de 1959 los operadores de fincas se clasificaron de acuerdo con la tenencia bajo la cual ellos operan el terreno en sus fincas. La tenencia fué determinada a base del informe sobre terreno propio, total de terreno tomado en arrendamiento y terreno administrado para otros.

Los propietarios poseen terreno pero no toman terreno en arrendamiento.

Los propietarios en parte poseen terreno y toman terreno en arrendamiento.

Los administradores operan fincas para otras personas y reciben un salario por sus servicios. Las personas que actúan meramente como vigilantes, mayordomos u obreros a sueldo no son clasificados como administradores. Si el operador de una finca administraba bajo salario terreno perteneciente a otra persona y también estaba a cargo de la operación de terreno propio, los terrenos así atendidos se consideraban como dos fincas distintas. La disminución en el número de fincas que fueron explotadas por administradores desde el 1940 al 1950 se debe mayormente a cambios de procedimientos en la clasificación de las fincas por tenencia. Un número considerable de fincas pequeñas operadas por mayordomos, hijos de los dueños, etc. fueron clasificadas como operadas por administradores asalariados en 1940 y censos anteriores. En 1950 y 1959 tales fincas fueron clasificadas como operadas por dueños en vez de por administradores. Fincas operadas por una iglesia, escuela, hospital o agencia del gobierno se clasificaron como administradas.

Los arrendatarios toman en arrendamiento todo el terreno que operan.

Fincas por clase económica.—Una clasificación de fincas por clase económica fué hecha con el propósito de segregar las fincas en grupos con características y tamaño de operaciones casi iguales. Esta clasificación se hizo para presentar una descripción segura de las fincas en cada clase y para que se proveyera una data básica para el análisis de la organización de la agricultura. Solamente las fincas incluídas en la muestra fueron clasificadas por clase económica. Los totales dados en las tablas representan estimados para todas las fincas basados en la tabulación de la data para las fincas incluidas en la muestra.

La clasificación de fincas por clase económica se hizo a base del valor total de todos los productos vendidos, y del número de días el operador trabajó fuera de la finca durante el año. Las fincas operadas por instituciones o agencias del gobierno (excepto las fincas operadas por la Autoridad de Tierras) fueron siempre clasificadas como anormales.

Con excepción de los vegetales y las plantas ornamentales vendidas, el valor de las ventas de los productos agrícolas, animales y productos de animales no se obtuvo en el Censo de 1959. El valor de las ventas fué estimado multiplicando la cantidad vendida de cada producto agrícola, animal o producto de animal por determinada unidad de precio. Las unidades de precios que se usaron son las siguientes:

Producto agrícola	*Precio por unidad (dólares)*	*Unidad*
Caña de azúcar	9.10	Tonelada
Piñas	49.83	Tonelada
Café	.56	Libra
Tabaco	.31	Libra
Algodón	.13	Libra
Arroz	.07	Libra

Farm Product	*Price per unit (dollars)*	*Unit*
Cowpeas	.10	Pound
Pigeon peas	.10	Pound
Dry beans	.08	Pound
Corn	.05	Pound
Sweetpotatoes	.04	Pound
Dasheens	.01	Pound
Yams	.03	Pound
Taniers	.03	Pound
Cassava	.03	Pound
Citrons	.03	Pound
Coconuts	.03	Each nut
Plantains	.60	Bunch
Bananas	.40	Bunch
Grapefruit	19.90	Per 1,000
Oranges	4.84	Per 1,000
Limes	4.00	Per 1,000
Avocados	33.76	Per 1,000
Mangoes	4.30	Per 1,000
Cattle	144.00	Each
Hogs and pigs	29.00	Each
Milk	.16	Quart
Eggs	.51	Dozen
Chicken hens, roosters, and pullets	1.71	Each

These unit prices were secured from the Department of Agriculture of Puerto Rico.

Farms were divided into eleven groups as follows:

Commercial Farms	*Value of Farm Products Sold*
I	$20,000 or more
II	$10,000 to $19,999
III	$7,500 to $9,999
IV	$5,000 to $7,499
V	$2,500 to $4,999
VI	$1,200 to $2,499
VII	$500 to $1,199
VIII	$150 to $499

The other farms were divided into three economic classes as follows:

1. Part-time farms—Operator working off the farm 75 or more days and sales of farm products less than $150.

2. Subsistence farms—Operator working off the farm less than 75 days and sales of farm products less than $150.

3. Abnormal farms—Includes all institutional and experimental farms regardless of the value of sales. Institutional farms include those operated by hospitals, penal institutions, schools, etc.

Producto agrícola	*Precio por unidad (dólares)*	*Unidad*
Frijoles	.10	Libra
Gandules	.10	Libra
Habichuelas secas	.08	Libra
Maíz	.05	Libra
Batatas	.04	Libra
Malangas	.01	Libra
Ñames	.03	Libra
Yautías	.03	Libra
Yuca	.03	Libra
Cidras	.03	Libra
Cocos	.03	Cada uno
Plátanos	.60	Racimo
Guineos	.40	Racimo
Toronjas	19.90	Millar
Chinas	4.84	Millar
Limones	4.00	Millar
Aguacates	33.76	Millar
Mangos	4.30	Millar
Vacas	144.00	Cada una
Cerdos	29.00	Cada uno
Leche	.16	Litro
Huevos	.51	Docena
Gallinas, gallos y pollos	1.71	Cada uno

Estas unidades de precio se obtuvieron del Departamento de Agricultura de Puerto Rico.

Las fincas se dividieron en once grupos, como sigue:

Fincas comerciales	*Valor de los productos vendidos*
I	$20,000 o más
II	$10,000 a $19,999
III	$7,500 a $9,999
IV	$5,000 a $7,499
V	$2,500 a $4,999
VI	$1,200 a $2,499
VII	$500 a $1,199
VIII	$150 a $499

Las demás fincas fueron agrupadas en tres clases económicas, como sigue:

1. Fincas trabajadas parte del tiempo—El operador de la finca informó haber trabajado fuera de la finca 75 días o más durante el año 1959 y el valor estimado de las ventas de los productos agrícolas fué menos de $150.

2. Fincas de subsistencia—El operador informó haber trabajado fuera de la finca menos de 75 días durante el año de 1959, y el valor estimado de las ventas de los productos agrícolas fué menos de $150.

3. Fincas anormales—Todas las fincas experimentales y todas las pertenecientes a instituciones se incluyen aquí sin considerar el valor de las ventas de los productos agrícolas. Las fincas pertenecientes a instituciones se relacionan a estas operadas por hospitales, instituciones penales, escuelas, etc.

Farms by Type.—Commercial farms with a value of $150 or more of farm products sold were classified by type on the basis of the source from which 50 percent or more of the calculated value of all farm products sold was obtained. In some cases the type of farm was determined on the basis of the value of sales for an individual farm product such as sugarcane, or on the basis of combined sales of closely related products such as fruits and nuts. In other cases, when 50 percent of the total value of sales was not derived from specified individual products or a closely related group of products, the type was determined on the basis of the value of sales of a broader group of products. For instance, if the value of cotton, rice, pigeon peas, cowpeas, dry beans, corn, sweetpotatoes, dasheens, yams, taniers, cassava, peanuts, Irish potatoes, and other minor crops sold represented 50 percent or more of the total value of farm products sold, the farm was classified as a "minor-crop" farm.

The types, together with the products or groups of products from which 50 percent or more of the total sales were to be derived, are as follows:

Type	*Product or group of products amounting to 50 percent or more of the value of all farm products sold*
Sugarcane	Sugarcane.
Coffee	Coffee.
Tobacco	Tobacco
Minor-crop	Cotton, rice, pigeon peas, cowpeas, dry beans, corn, sweetpotatoes, dasheens, yams, taniers, cassava, peanuts, Irish potatoes, and other minor field crops.
Fruit-and-nut	All tree fruits, nuts, and pineapples.
Livestock	Hogs, cattle, milk, poultry, and poultry products.
General-crop	A farm was classified as general-crop if 50 percent or more of the value of farm products sold was obtained from the sale of crops, but the value of a crop or group of crops, as specified for sugarcane, coffee, tobacco, or minor crops, and fruit and nut farms, did not equal 50 percent or more of the total value of farm products sold.
Crop-and-livestock	Farms on which less than half of the value of all farm products sold was obtained from the sale of crops listed for each crop-type of farm above or from the sale of livestock and livestock products were classified as crop-and-livestock farms.
Miscellaneous	All farms with calculated sales of $150 or more that could not be classified into any of the above groups. These farms include farms with 50 percent or more of the total value of farm products sold from the sale of ornamental plants, or of vegetables.

STATISTICS FOR PARCELAS

In order to obtain information regarding parcelas and parcela characteristics, questions related to tenure of operator; value of livestock and livestock products sold; and value of crops, vegetables, and fruits sold were included in the Enumerator's Record Book. Sales were reported for the year 1959.

This information was obtained for all places having an area of one-fourth of a cuerda but less than three cuerdas.

Fincas por tipo.—Las fincas comerciales con productos agrícolas vendidos por valor de $150 o más fueron clasificadas a base de aquel producto que produjo 50 por ciento o más del valor computado de todos los productos agrícolas vendidos. En algunos casos el tipo de finca se determinó a base del valor de las ventas de un solo producto agrícola; como por ejemplo, la caña de azúcar; o a base de las ventas combinadas de productos relacionados entre sí, como frutas y nueces. En otros casos, cuando el 50 por ciento del valor total de las ventas no se derivó de productos individuales o de un grupo de productos relacionados entre sí, el tipo de finca se determinó a base del valor de las ventas de un grupo de productos más amplio. Por ejemplo, si el valor del algodón, arroz, gandules, frijoles, habichuelas secas, maíz, batatas, malangas, ñames, yautías, yuca, maní, papas, y otros frutos menores vendidos fué de 50 por ciento o más del valor total de productos agrícolas vendidos, la finca se clasificó como finca de frutos menores.

Los tipos, conjuntamente con los productos o grupos de productos de los cuales se derivó 50 por ciento o más del valor total de las ventas, se señalan a continuación:

Tipo	*Producto o grupo de productos que representan un 50 por ciento o más del valor de todos los productos agrícolas vendidos*
Caña de azúcar	Caña de azúcar.
Café	Café.
Tabaco	Tabaco.
Frutos menores	Algodón, arroz, gandules, frijoles, habichuelas secas, maíz, batatas, malanga, ñames, yautía, yuca, maní, papas y otros frutos menores.
Frutas y nueces	Todos los árboles frutales, nueces y piñas.
Ganado	Cerdos, ganado vacuno, leche, aves y productos de aves.
Cosecha general	Una finca fué clasificada como cosecha general, si el 50 por ciento o más del valor de los productos agrícolas vendido fué obtenido de la venta de cosechas, pero el valor de una cosecha o grupo de productos como caña de azúcar, café, tabaco, frutos menores, y frutas y nueces no era igual al 50 por ciento o más del valor total de todos los productos agrícolas vendidos.
Cosecha y ganado	Las fincas con un valor, de las ventas de cosechas, especificadas anteriormente por tipo, o de las ventas de ganado y productos de ganadería y aves, de menos de la mitad del valor de todos los productos agrícolas vendidos se clasificaron como fincas de cosecha y ganado.
Miscelánea	Todas las fincas con ventas calculadas de $150 o más que no se pudieron clasificar en ninguno de los grupos anteriores. Estas fincas incluyen las fincas con el 50 por ciento o más del valor total de los productos agrícolas vendidos de ventas de plantas ornamentales o de vegetales.

ESTADISTICAS PARA PARCELAS

Para obtener la información relacionada a parcelas y las características de éstas, se incluyeron en el libro de registro preguntas relacionadas a la tenencia de la parcela, al valor de los animales y de los productos de animal vendido, y al valor de las cosechas vendidas. Las ventas informadas fueron durante el año 1959.

Esta información se obtuvo de todos los sitios en los distritos rurales que tenían un área de un cuarto de cuerda a menos de tres cuerdas.

Puerto Rico Table 13.–FARMS REPORTING TYPE OF WORK POWER USED, BY OWNERSHIP AND BY TENURE OF OPERATOR: CENSUS OF 1959

[Data are based on reports for only a sample of farms. See text]

Item (For definitions and explanations, see text)	All farm operators	Tenure of operator		
		Full owners and managers	Part owners	Tenants
Tractor power, total	3,082	2,419	466	197
Owned by:				
Farm operator only	1,160	796	281	83
Farm operator and another person jointly	86	74	10	2
Landlord of farm operator	193	153	23	17
Another person	1,424	1,192	143	89
Government agency	219	204	9	6
Animal power only, total	16,775	14,721	1,248	806
Owned by:				
Farm operator only	9,979	8,705	821	453
Farm operator and another person jointly	262	193	32	37
Landlord of farm operator	607	489	48	70
Another person	7,628	6,792	483	353
Government agency	31	31	...	...
No power used	25,515	24,229	650	636
Farm operators not reporting as to use of tractor or animal power	427	406	20	1

Puerto Rico Table 14.–SAMPLING RELIABILITY OF ESTIMATED TOTALS BY NUMBER OF FARMS REPORTING, BY LEVELS, 1959

If the estimated number of farms reporting is–	Then the chances are about 2 in 3 that the estimated total would differ from the reaults of a complete tabulation of the items for all farms by less than–				If the estimated number of farms reporting is–	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than–			
	Level 1[1]	Level 2	Level 3	Level 4		Level 1[1]	Level 2	Level 3	Level 4
	Percent	*Percent*	*Percent*	*Percent*		*Percent*	*Percent*	*Percent*	*Percent*
25	40	53	71	96	5,000	2.8	3.7	5.0	6.8
50	28	37	50	68	10,000	2.0	2.6	3.5	4.8
100	20	26	35	48	25,000	1.3	1.7	2.2	3.0
250	13	17	22	30	50,000	0.9	1.2	1.6	2.1
500	8.9	12	16	21	100,000	0.6	0.8	1.1	1.5
1,000	6.3	8.4	11	15	250,000	0.4	0.5	0.7	1.0
2,500	4.0	5.3	7.1	9.6					

[1]Level 1 should be used in determining the sampling reliability of estimated number of farms and farms reporting. The level for all other items should be obtained from Puerto Rico Table 15. If the estimated number of farms or farms reporting constitutes more than 75 percent of all farms in the universe, a better approximation to the sampling reliability may be obtained by multiplying the percent given in the table as follows:

1. When the number of farms or farms reporting is 75 percent of all farms, multiply the percent error by 0.50.
2. When the number of farms or farms reporting is 90 percent of all farms, multiply the percent error by 0.30.
3. When the number of farms or farms reporting is 95 percent of all farms, multiply the percent error by 0.20.

Puerto Rico Table 15.–INDICATED LEVEL OF SAMPLING RELIABILITY OF ESTIMATED TOTALS FOR SPECIFIED ITEMS, 1959

[To determine the sampling reliability for an item, use this table to determine which of the 4 levels of sampling reliability to use in Puerto Rico Table 14. To use Table 14, it is necessary to refer also to municipio or Puerto Rico table to obtain the number of farms reporting for the item]

Item (For definitions and explanations, see text)	Total	Size-of-farm group			Tenure-of-farm-operator group			Economic-class-of-farm group				Type-of-farm group						
		Under 10 cuerdas	10-49 cuerdas	50-259 cuerdas	Full owners and managers	Part owners	All tenants	Class I, II, III, & IV	Class V and VI	Class VII	Class VIII and IX	Sugarcane	Coffee	Tobacco	Minor crop	Fruit-and-nut	Livestock	Miscellaneous
Farms and farm characteristics:																		
Land in farms	1	1	1	1	1	1	2	1	1	2	2	1	2	3	2	2	2	2
Cropland harvested	1	1	1	1	1	1	1	1	1	2	2	1	2	2	1	3	2	2
Total cropland	1	1	1	1	1	1	1	1	1	2	2	1	2	2	2	2	2	2
Total pasture	1	1	1	1	1	1	2	1	2	3	2	1	2	3	2	2	2	2
Irrigated land in farms	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1
Farm labor:																		
Wage workers	1	2	2	2	1	1	3	1	2	2	2	2	2	2	3	2	1	1
Specified farm expenditures:																		
Feed for poultry	4	4	4	3	4	2	2	4	3	2	4	2	2	2	2	2	4	2
Feed for animals	2	4	4	3	4	1	4	1	3	2	2	2	1	4	4	4	2	2

APPENDIX

The Questionnaire

(115)

Forma 6041.41 (6-10-59)

Esta entrevista está autorizada por ley del Congreso de los Estados Unidos, U. S. C., título 13, Secciones 5, 9, 142, 221-4, la cual requiere que se contesten todas las preguntas que aplican al caso y que éstas sean contestadas lo más exacto posible. También garantiza que la información suministrada será considerada estrictamente confidencial. *El informe censal no puede ser usado para propósitos de impuestos, investigación o reglamento.*

PUERTO RICO

Número A1

DEPARTAMENTO DE COMERCIO DE LOS ESTADOS UNIDOS
NEGOCIADO DEL CENSO

A1 CUESTIONARIO PARA FINCAS

noviembre, 1959

Número del Negociado del Presupuesto 41-59[illegible].1

Expira diciembre 30, 1960

Sección I.—AGRICULTOR

Para Uso de la Oficina Solamente

1. ¿Cuál es su nombre completo?
(Nombre) (Inicial o segundo nombre) (Apellidos)
2. ¿Cuál es su dirección de correos?
3. ¿Cuántos días trabajó usted fuera de su finca durante los últimos doce meses? ..... Ninguno ☐ Número de días ____
(Si "Ninguno," marque X y pase a la pregunta [5].)
4. ¿Cuál fué su ocupación principal cuando trabajó fuera de la finca?

Sección II.—TENENCIA

(Anote las cuerdas y centésimos)

	Ninguna	Cuerdas	Centésimos
[5] ¿Cuántas cuerdas son de su propiedad? ..... (Incluya las cuerdas cultivadas por medianeros y agregados)	☐		
(a) ¿Tiene alguna hipoteca sobre los terrenos y los edificios que posee? ..... No ☐ Sí ☐			
6. ¿Cuántas cuerdas arrienda usted de otros? ..... (Si "Ninguna," marque X y pase a la pregunta número [8].)	☐		
7. ¿Cuál es el nombre y la dirección del propietario de los terrenos que usted arrienda? Nombre ____ Dirección de Correos ____			
[8] ¿Cuántas cuerdas explota usted como administrador asalariado?..... (Incluya las cuerdas cultivadas por medianeros y agregados)	☐		
9. ¿Cuántas cuerdas arrienda a otros? ..... (No incluya las cuerdas trabajadas por medianeros y agregados)	☐		
10. Area Total de la Finca ..... (Para obtener el área total de la finca sume las preguntas 5 y 6. Del resultado que se obtenga reste el total de la pregunta número 9. Si la finca está bajo un administrador, reste el cuerdaje informado en la pregunta número 9 del que se informó en la pregunta número 8.)			

Sección III.—PRODUCTOS AGRICOLAS COSECHADOS EN ESTA FINCA

Queremos que incluya todos aquellos productos que se cosecharon en dicha área durante el período que se pide a continuación, incluyendo los cosechados por medianeros y agregados. Cuando sea necesario informar parte de una cuerda, hágalo en números enteros bajo centésimos y no en fracciones o decimales. Ejemplos: Centésimos - 05, 10, 25, 50, 75.)

CAÑA DE AZUCAR

	Ninguna	Cuerdas	Centésimos	Toneladas
11. ¿Cuál fué el total de caña cortada y molida de noviembre 1, 1958 a octubre 31, 1959? ..... (Si "Ninguna," marque X y pase a la pregunta número [15].)	☐			
12. ¿Cuánto fué la caña de Gran Cultura cortada y molida de noviembre 1, 1958 a octubre 31, 1959? ...	☐			
13. ¿Cuánto fué la caña de Primavera cortada y molida de noviembre 1, 1958 a octubre 31, 1959?	☐			
14. ¿Cuánto fué la caña de Retoños cortada y molida de noviembre 1, 1958 a octubre 31, 1959? ..... (La suma de las preguntas 12, 13 y 14, debe ser igual al total que aparece en la pregunta 11.)	☐			
[15] ¿Cuántas cuerdas de caña fueron cortadas para semillas de noviembre 1, 1958 a octubre 31, 1959?	☐			
16. ¿A qué Centrales fué entregada la caña?				
17. ¿Cuál fué el área total dedicada al cultivo de caña en noviembre 1, 1959?	☐			
18. ¿Cuántas cuerdas de caña de Gran Cultura había en noviembre 1, 1959 para cortarse en el 1960?	☐			

PIÑA

19. ¿Cuál fué el total de piñas cosechadas de noviembre 1, 1958 a octubre 31, 1959?	☐			
20. ¿Cuántas cuerdas de piñas había en noviembre 1, 1959? ..... (Si "Ninguna," marque X y pase a la pregunta número [22].)	☐			
21. ¿Cuántas cuerdas de piña tiene para cosecharse de noviembre 1, 1959 a octubre 31, 1960?	☐			

PLANTAS ORNAMENTALES

[22] ¿Cuántos dólares se obtuvieron de las ventas de plantas ornamentales de noviembre 1, 1958 a octubre 31, 1959?..... Ninguno ☐ $ ____ /00

PRODUCTOS AGRICOLAS COSECHADOS EN LA FINCA DE NOVIEMBRE 1, 1958 A OCTUBRE 31, 1959

(Hágale al agricultor las siguientes preguntas para toda clase de cosecha informada)

	(1) ¿Cuántas cuerdas o partes de una cuerda se cosecharon de noviembre 1, 1958 a octubre 31, 1959? Ninguno	(1) Cuerdas	(1) Centésimos	(2) ¿Cuántas libras se cosecharon de noviembre 1, 1958 a octubre 31, 1959? Libras	(3) ¿Cuántas libras se vendieron de noviembre 1, 1958 a octubre 31, 1959? Libras
¿CUALES DE ESTOS PRODUCTOS FUERON COSECHADOS EN LA FINCA? 23. ¿Café?	☐				
24. ¿Tabaco?	☐				
25. ¿Algodón?	☐				
26. ¿Arroz?	☐				
27. ¿Frijoles?	☐				
28. ¿Gandules?	☐				
29. ¿Habichuelas secas?	☐				
30. ¿Maíz?	☐				
31. ¿Batatas?	☐				
32. ¿Malangas?	☐				
33. ¿Names?	☐				
34. ¿Yautías?	☐				
35. ¿Yucas?	☐				
36. ¿Otros? (¿Papas?) (Dé el nombre)	☐			Número	Número
(Dé el nombre)				Número	Número

YERBAS QUE SE CORTARON PARA FORRAJE:

37. ¿Cortó usted alguna yerba para forraje de noviembre 1, 1958 a octubre 31, 1959?..... No ☐ Sí ☐ (Si "No," marque X y pase a la pregunta número [42].)

	Ninguna	¿Cuántas cuerdas, o partes de una cuerda, se cortaron de noviembre 1, 1958 a octubre 31, 1959? Cuerdas	Centésimos
¿QUE YERBAS SE CORTARON PARA FORRAJE? 38. ¿Malojillo?	☐		
39. ¿Yertas de Guinea?	☐		
40. ¿Merker?	☐		
41. ¿Elefante?	☐		
42. ¿Otras? (¿Yaraguá?, ¿Guatemala?) (Dé el nombre)	☐		

VEGETALES:

[42] ¿Cosechó o vendió algunos vegetales de noviembre 1, 1958 a octubre 31, 1959? ..... No ☐ Sí ☐

(Si "No," marque X y pase a la pregunta número [56].)

(Hágale al agricultor las siguientes preguntas para cada clase de vegetal informado)

	(1) ¿Cuántas cuerdas, o partes de una cuerda, fueron cosechadas de noviembre 1, 1958 a octubre 31, 1959? Ninguno	(1) Cuerdas	(1) Centésimos	(2) ¿Cuánto fué la cantidad cosechada de noviembre 1, 1958 a octubre 31, 1959?	(3) ¿Cuántos dólares se obtuvieron de las ventas? Dólares Solamente
¿CUALES DE LOS SIGUIENTES VEGETALES QUE USTED VENDIO FUERON COSECHADOS EN SU FINCA? 44. ¿Ajíes?	☐			Libras	$ /00
45. ¿Berenjenas?	☐			Libras	$ /00
46. ¿Calabazas?	☐			Libras	$ /00
47. ¿Habichuelas tiernas?..	☐			Libras	$ /00
48. ¿Lechugas?	☐			Mazos	$ /00
49. ¿Pepinos?	☐			Libras	$ /00
50. ¿Pimientos?	☐			Libras	$ /00
51. ¿Quimbombós?	☐			Libras	$ /00
52. ¿Repollos?	☐			Libras	$ /00
53. ¿Tomates?	☐			Libras	$ /00
54. ¿Zanahorias?	☐			Mazos	$ /00
55. ¿Otros? (¿Cebollas?) (Dé el nombre)	☐			Libras	$ /00
(Dé el nombre)				Libras	$ /00

FRUTAS, PLATANOS, GUINEOS, ETC.

[66] ¿Hay árboles frutales, matas de plátanos, de guineos, o palmas de cocos en la finca? ..... No ☐ Sí ☐

(Si "No," marque X y pase a la pregunta número [66].)

(Hágale al agricultor las siguientes preguntas para cada clase de árbol frutal informado) →

	Ninguno	(1) ¿Cuántos árboles estaban en edad de producción? Número	(2) ¿Cuántos árboles no estaban en edad de producción? Número	(3) ¿Cuántas cuerdas hay de estas frutas? (Cuando hay más de 10 árboles) Cuerdas	Centésimos	(4) ¿Qué cantidad se cosechó de noviembre 1, 1958 a octubre 31, 1959?	(5) ¿Qué cantidad se vendió de noviembre 1, 1958 a octubre 31, 1959?
¿CUALES DE ESTAS FRUTAS HAY EN SU FINCA?							
57. ¿Cidras?	☐					Libras	Libras
58. ¿Cocos?	☐					Número	Número

(Dé el nombre)						Libras o_____ Frutas	Libras o_____ Frutas
(Dé el nombre)							

Sección IV.—USOS DEL TERRENO

[67] Area total de la Finca (copie de la pregunta número 10) → (Cuerdas) (Centésimos)

(El total debe ser distribuído entre las preguntas 67 a 71 de acuerdo con el uso que se le dió al terreno de noviembre 1, 1958 a octubre 31, 1959.)

TERRENOS DE PASTOS:

67. ¿Cuántas cuerdas de pasto hay en terrenos que se pueden cultivar? ... Ninguna ☐

(Incluya aquí pasto abierto y pasto enmalezado que se puede cultivar) (Cuerdas) (Centésimos)

68. ¿Cuántas cuerdas de pasto hay en terrenos que no se pueden cultivar? ..... Ninguna ☐ (Cuerdas) (Centésimos)

TERRENOS QUE NO SON DE CULTIVO NI DE PASTO

69. ¿Cuántas cuerdas hay de montes y malezas que no se pueden utilizar para cultivos o para pastos? ..... Ninguna ☐ (Cuerdas) (Centésimos)

70. ¿Cuántas cuerdas hay ocupadas por lagos, edificaciones, caminos, cercas o terrenos baldíos? ..... Ninguna ☐ (Cuerdas) (Centésimos)

Estos dos totales deben ser iguales

TERRENOS DE CULTIVO

71. ¿Cuántas cuerdas de terreno cultivado hay? ..... Ninguna ☐ (Cuerdas) (Centésimos)

(Informe todos los terrenos cosechados incluyendo aquellos en huertas y en yerbas cortadas para forraje, y también los terrenos en frutas, plátanos y cocos, aunque hayan producido o no.)

(Incluya todos los terrenos cultivados por agregados y medianeros)

Sume todas las preguntas desde la 67 hasta la 71 aquí ---------- (Cuerdas) (Centésimos)

Sección V.—RIEGO

72. ¿Cuántas cuerdas se regaron entre noviembre 1, 1958 y octubre 31, 1959? ..... Ninguna ☐ (Cuerdas) (Centésimos)

Sección VI.—ANIMALES EN NOVIEMBRE 1, 1959 y PRODUCCION DE NOVIEMBRE 1, 1958 A OCTUBRE 31, 1959

Incluya todos los animales en su finca, sean o no propiedad suya. Incluya todos los animales y aves pertenecientes a agregados y a medianeros que viven en su finca.

	Ninguno	Número
CABALLOS Y POTROS		
73. ¿Cuántos caballos y potros, de todas las edades, hay en la finca?	☐	
BURROS Y MULOS		
74. ¿Cuántos burros y mulos, de todas las edades, hay en la finca?	☐	
OVEJAS Y CORDEROS		
75. ¿Cuántas ovejas y corderos, de todas las edades, hay en la finca?	☐	
CABROS		
76. ¿Cuántos cabros, de todas las edades, hay en la finca?	☐	
77. ¿Cuántas cabras fueron ordeñadas de noviembre 1, 1958 a octubre 31, 1959?	☐	
CERDOS		
78. ¿Cuántos cerdos y cerditos de todas las edades, hay en la finca?	☐	
(Si "Ninguno," marque X y pase a la pregunta [81].)		
79. ¿Cuántos de éstos son de menos de cuatro meses?	☐	
80. ¿Cuántos de éstos son de cuatro meses o más?	☐	
(la suma de los totales de las preguntas 79 a 80 debe ser igual al total de la pregunta 78.)		
[81] ¿Cuántos cerdos se vendieron de noviembre 1, 1958 a octubre 31, 1959?	☐	
82. ¿Cuántas cerdas parieron entre noviembre 1, 1958 a octubre 31, 1959?	☐	
83. ¿Cuántos cerditos se criaron de noviembre 1, 1958 a octubre 31, 1959?	☐	
GANADO VACUNO		
84. ¿Cuál es el total de ganado vacuno, de todas las edades, que hay en la finca?	☐	
(Si "Ninguno," marque X y pase a la pregunta [89].)		
85. ¿Cuántas novillas y vacas hay en la finca?	☐	
(a) ¿Cuántas son vacas de ordeño?	☐	
86. ¿Cuántos becerros y becerras hay en la finca?	☐	
87. ¿Cuantos novillos y toros hay en la finca?	☐	
88. ¿Cuántos bueyes de trabajo hay en la finca?	☐	
(la suma de los totales de las preguntas 85, 86, 87, y 88 debe ser igual al número de la pregunta 84.)		
[89] ¿Cuánto ganado vacuno vendió de noviembre 1, 1958 a octubre 31, 1959? ...	☐	
90. ¿Cuántas vacas y novillas fueron ordeñadas de noviembre 1, 1958 a octubre 31, 1959?	☐	
(Si "Ninguna," marque X y pase a la pregunta [92].)		Litros o Cuartillos
91. ¿Cuántos litros (cuartillos) de leche se vendieron de noviembre 1, 1958 a octubre 31, 1959?	☐	
GALLINAS, POLLONAS, POLLOS Y GALLOS		
[92] ¿Hay gallinas, pollonas, pollos, o gallos en la finca? ... No ☐ Sí ☐		
(Si "No," marque X y pase a la pregunta [95].)		
93. ¿Cuántas gallinas hay en la finca?	☐	
94. ¿Cuántos pollos, pollonas y gallos hay en la finca?	☐	
[95] ¿Cuántos pollos, pollonas, gallinas o gallos se vendieron de noviembre 1, 1958 a octubre 31, 1959?	☐	
96. ¿Cuántas docenas de huevos se vendieron de noviembre 1, 1958 a octubre 31, 1959?	☐	
OTRAS AVES		
97. ¿Hay pavos, patos, gansos, guineas, o palomas en la finca? ..... No ☐ Sí ☐		Número
Si la respuesta es "Sí," informe los nombres de las aves y los números. (Dé el nombre)		Número
(Dé el nombre)		
COLMENAS DE ABEJAS	Ninguno	Número
98. ¿Cuántas colmenas de abejas hay en la finca?	☐	
(Si "Ninguna," marque X y pase a la pregunta número [100].)		Galones
99. ¿Cuántos galones de miel de abeja fueron producidos de noviembre 1, 1958 a octubre 31, 1959?	☐	

PARA USO DEL ENUMERADOR

(a) ¿Termina el número de este cuestionario (A1) en 2 o en 7? ..... No ☐ Sí ☐

(b) ¿Es la contestación a la pregunta número 10 de 200 cuerdas o más? ..... No ☐ Sí ☐

(Si la contestación a una de estas dos preguntas es "Sí," continúe llenando el cuestionario (Secciones VII a XII). Si "No," en ambas contestaciones, pase a la Sección XII.

Sección VII.—FACILIDADES Y EQUIPO

Incluya las facilidades y el equipo en la finca aunque éste esté dañado temporeramente. Incluya todo equipo sea o no propiedad suya.

¿CUAL DE ESTAS FACILIDADES HAY EN SU FINCA?

[100] ¿Servicio de Energía Eléctrica? ..... No ☐ Sí ☐
101. ¿Agua corriente? ..... No ☐ Sí ☐
102. ¿Televisor? ..... No ☐ Sí ☐
103. ¿Radio? ..... No ☐ Sí ☐
104. ¿Ordeñadoras mecánicas? ..... No ☐ Sí ☐
105. ¿Enfriadoras? (Tanques de Refrigeración) ..... No ☐ Sí ☐
106. ¿Silos? ..... No ☐ Sí ☐

¿CUANTOS DE LOS SIGUIENTES HAY EN SU FINCA?

		Ninguno	Número
107.	¿Tractores? (De todas clases)	☐	
108.	¿Camiones?	☐	
109.	¿Despulpadoras de café?	☐	
110.	¿Correderas?	☐	
111.	¿Bombos y bateas?	☐	
112.	¿Carretas de bueyes?	☐	
113.	¿Otras carretas? (Impulsadas por tractores, etc.).	☐	
114.	¿Charcas? (Lagos artificiales)	☐	

¿QUIEN ES EL DUEÑO DE LAS FUENTES DE TRABAJO QUE USTED UTILIZA EN SU FINCA ESTE AÑO?

		De usted	Del dueño de la finca	De usted y otras personas	De otro agricultor	De una agencia del Gobierno	No fué usado
115.	¿Bueyes?	☐	☐	☐	☐	☐	☐
116.	¿Tractores?	☐	☐	☐	☐	☐	☐
117.	¿Caballos, mulos, y burros?	☐	☐	☐	☐	☐	☐

Sección VIII.—AGREGADOS Y MEDIANEROS

118. ¿Cuántas familias de agregados, que no son medianeros, viven en la finca? ..... Ninguna ☐
(Si "Ninguna," marque X y pase a la pregunta número [120].) — Familias

119. ¿Cuántas cuerdas fueron cultivadas por agregados, que no son medianeros, de noviembre 1, 1958 a octubre 31, 1959? ..... Ninguna ☐ — Cuerdas | Centésimos

[120] ¿Cuántos trabajaron como medianeros en la finca de noviembre 1, 1958 a octubre 31, 1959? ..... Ninguno ☐
(Si "Ninguno," marque X y pase a la pregunta número [122].) — Medianeros

121. ¿Cuántas cuerdas fueron cultivadas por medianero de noviembre 1, 1958 a octubre 31, 1959? ..... Ninguna ☐ — Cuerdas | Centésimos

Sección IX.—TRABAJADORES AGRICOLAS

(Personas de 14 años o más de edad que trabajaron en esta finca durante la última semana)

AGRICULTOR

[122] ¿Cuántas horas trabajó usted en la finca durante la última semana? .....
Ninguna ... ☐
1 a 14 horas ... ☐
15 horas o más ... ☐

FAMILIARES

123. ¿Cuántos de sus familiares trabajaron sin paga en la finca durante la última semana?... Ninguno ☐ — Número de personas

EMPLEADOS

124. (a) ¿Cuántos empleados asalariados trabajaron en la finca durante la última semana?... Ninguno ☐
(Incluya todo empleado al cual se le pague un sueldo fijo, ya sea semanal o mensual) — Número de empleados

(b) ¿Alrededor de cuántas horas trabajaron en la finca estos empleados en esta última semana? ..... — Número de horas

125. (a) ¿Cuántos obreros a jornal trabajaron en la finca durante la última semana? ..... Ninguno ☐ — Número de obreros

(b) ¿Alrededor de cuántas horas trabajaron estos empleados en esta última semana? ..... — Número de horas

Sección X.—GASTOS

		Ninguno	Dólares
126.	¿Cuánto dinero gastó para alimentos de aves de noviembre 1, 1958 a octubre 31, 1959?	☐	/00
127.	¿Cuánto dinero se gastó para alimentos de animales de noviembre 1, 1958 a octubre 31, 1959? ..... (No incluya aquí dinero gastado para alimentos de aves)	☐	/00
128.	¿Cuánto dinero se gastó para abono químico de noviembre 1, 1958 a octubre 31, 1959?	☐	/00
129.	¿Cuánto dinero se gastó en jornales y salarios de noviembre 1, 1958 a octubre 31, 1959? ..... (No incluya aquí dinero gastado en servicios domésticos)	☐	/00

Sección XI.—INFORMACION ADICIONAL

130. ¿Está todo el terreno de su finca situado en el mismo barrio o municipio? ..... No ☐ Sí ☐

(Si "No," informe el número de cuerdas por barrio y municipio.)

Barrio	Municipio	Cuerdas	Centésimos

OBSERVACIONES: Haga cualquier observación que sea necesaria en relación con las cosechas y rendimiento por cuerda, tamaño de la finca, dueño de la finca, etc....

U.S. Government Printing Office, Washington, D.C., 1961

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., or any of the Field Offices of the Department of Commerce. Price 25 cents

PREFACE

The 1960 Census of Agriculture for the Virgin Islands was authorized by an Act of Congress (Title 13, U. S. Code, Census codified August 1954 and amended in August 1957.) Section 191 of Title 13 provided that the Census shall include each State, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico. Section 191 further provided that the census data for the Virgin Islands may be collected by the Governor, or highest ranking Federal official, in accordance with plans prescribed or approved by the Director of the U. S. Bureau of the Census.

In accordance with the provisions of Title 13, collection of the data for the 1960 Census of Agriculture in the Virgin Islands was directed and supervised by the Governor of the Virgin Islands. The actual collection of data was carried out by census enumerators supervised by Dr. Alonzo G. Moron working under the direction of the Governor. The planning of the Census and the compilation of the statistics were supervised by Ray Hurley, Chief of the Agriculture Division, assisted by Joseph Correll and Helen Teir.

June 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
	New England States:		West North Central—Continued		Mountain:
1	Maine.	19	South Dakota.	38	Montana.
2	New Hampshire.	20	Nebraska.	39	Idaho.
3	Vermont.	21	Kansas.	40	Wyoming.
4	Massachusetts.		South Atlantic:	41	Colorado.
5	Rhode Island.	22	Delaware.	42	New Mexico.
6	Connecticut.	23	Maryland.	43	Arizona.
	Middle Atlantic States:	24	Virginia.	44	Utah.
7	New York.	25	West Virginia.	45	Nevada.

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

VIRGIN ISLANDS

Municipalities, Quarters and Cities

INTRODUCTION

THE 1960 CENSUS OF AGRICULTURE

History of the Census.—The 1960 Census of Agriculture is the fifth United States agricultural census of the Virgin Islands. The first one was a special census taken in 1917, by authorization of the Secretary of Commerce. The next census of agriculture was taken in 1930, in conjunction with the population census. Since 1930, a census of agriculture has been taken in the Virgin Islands every ten years, at the same time as the population census.

Legal Basis for the Census.—The 1960 Census of Agriculture was authorized by an Act of Congress, as were all prior censuses of the Virgin Islands, beginning with the 1930 Census. "Title 13, United States Code—Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for the census of agriculture as well as for all other censuses and surveys conducted by the Bureau of the Census. Section 191 of Title 13 specifically provides that the censuses "shall include each State, . . . the Virgin Islands, Guam, and the Commonwealth of Puerto Rico," as well as other areas under the jurisdiction or control of the United States. Section 191 further provides that the census data for these areas may be collected by the Governor or highest ranking Federal official in accordance with plans prescribed or approved by the Director of the United States Bureau of the Census (acting for the Secretary of Commerce). Pursuant to this provision, collection of data for the 1960 Census of Agriculture in the Virgin Islands was directed and supervised by the Governor of the Islands according to procedures prescribed by the Bureau of the Census.

Training Program for Enumeration Personnel.—Each supervisor, crew leader, and enumerator employed for the 1960 Census of Agriculture in the Virgin Islands received special training for his job. All training was presented according to procedures prepared by the Bureau of the Census. It included practice interviewing, practice filling of questionnaires, and detailed discussion of the instructions given to enumerators.

Enumeration Period.—The enumeration for the Census of Agriculture began on April 1, 1960, at the same time as the enumeration for the Census of Population and Housing. The enumeration was completed during the month of April.

Data for inventory items—land in farms, fruit and nut trees, equipment and facilities, livestock and poultry—represent the situation existing at the time of enumeration of each individual farm. Data for acres, production, and sales of crops relate to the crops harvested during the crop year 1959. Data for sales of livestock and livestock products, and for expenditures, relate to the calendar year 1959.

CENSUS FORMS AND PROCEDURES

The Agriculture Questionnaire.—The questionnaire for the 1960 Census of Agriculture was prepared by the Staff of the Census Bureau with the cooperation of the Governor of the Virgin Islands and the officer in charge of the Virgin Islands Agricultural Program, U. S. Department of Agriculture. It contained a total of 102 inquiries, some of which consisted of several parts, as compared with 85 on the questionnaire for the 1950 Census. Selection of the inquiries was based on current needs for agricultural information as well as on experience gained in earlier censuses.

In most respects, the questionnaire for the 1960 Census of Agriculture was closely comparable with the one used in 1950. Several questions that were asked in the 1950 Census were omitted in 1960, while others were added. For example, questions about the operator's race and about Irish potatoes, cacao, guavas, irrigated land, bees and honey, and kind of road did not appear on the 1960 questionnaire. They were replaced by questions concerning nursery crops, forest products, farm ponds, facilities, source of farm power, milk and milk cows, sales of live animals, and age and birthplace of the farm operator.

The Enumeration.—The schedule which enumerators used for taking the 1960 Census of Population and Housing in the Virgin Islands contained the question "Is this house on a farm?" If this question was answered "Yes," the enumerator knew immediately that an agriculture questionnaire was required for the farm operator. If it was answered "No," the enumerator was instructed to ask whether the place consisted of three or more acres. Here again a "Yes" answer indicated that an agriculture questionnaire was required. In the case of a respondent who said the house was not on a farm and the place did not consist of three or more acres, the enumerator was instructed to ask enough additional questions to determine whether or not there were any agricultural operations on the place and, if so, to obtain a questionnaire. For enumeration purposes, agricultural operations were considered to be on a place if—

a. One or more horses, cattle, hogs, sheep, or goats were kept on the place at the time of enumeration;

b. A combined total of 10 or more chickens, turkeys, ducks, geese, or other poultry was kept on the place at the time of enumeration, or had been kept on the place in 1959;

c. A combined total of 10 or more fruit or nut trees and plants was on the place at the time of enumeration;

d. Any field crops such as corn, sugarcane, or yams were harvested on the place in 1959;

e. Any vegetables, vegetable plants, flowers, ornamental plants, trees, seeds, or bulbs were grown on the place for sale in 1959.

The enumerator was also instructed to ask enough questions about tracts of land on which no one lived to determine whether an agriculture questionnaire was required for the person in charge of the land. This instruction was designed to assure enumeration of all land used for agriculture, whether operated by an individual, a partnership, a corporation, or an institution.

Enumeration Districts.—For purposes of enumeration, the Virgin Islands was divided into 44 Enumeration Districts, or "ED's." The ED's were clearly outlined on special maps prepared for the census. Each enumerator was required to canvass the entire area within his assigned ED's and to indicate his route of travel on the map. This procedure was designed to assure complete enumeration coverage of all land and dwellings in the Islands.

To avoid enumeration of the same place by two or more enumerators, the Census Bureau established rules whereby each enumerator could determine whether or not he was responsible for obtaining the agriculture questionnaire for a given place. If

a place was entirely within the boundaries of one ED, the enumerator for that ED was required to obtain the questionnaire, regardless of where the person in charge of the operations lived. If a place was partly in one ED and partly in another, the enumerator for the ED in which the person in charge lived was responsible for obtaining the questionnaire. In such case, he was to report on the questionnaire all the land that the person in charge operated in the Virgin Islands, including the land outside his ED.

Processing Operations.—After the completion of enumeration, all agriculture questionnaires were sent to the Agriculture Operations Office in Parsons, Kansas. There, all questionnaires were individually edited and coded prior to tabulation of the data. In the editing process, questionnaires that did not represent farms according to the Census definition were withdrawn from further processing. (See below, "Census Definition of a Farm.") The remaining questionnaires were then examined for completeness and consistency. Errors in calculations and in units of measure, inconsistencies, and misplaced entries were corrected. Incomplete reports were adjusted on the basis of related information on the same questionnaire or on questionnaires for nearby farms of similar size.

In the coding process, numerical codes were entered on all questionnaires to classify farms by size, in terms of total area, by tenure and birthplace of operator, and by total value of agricultural products sold. In addition, codes were entered on questionnaires for commercial farms to classify them by type of farm. As necessary for tabulation purposes, numerical codes were also assigned to individual items to assure their inclusion in the appropriate farm product totals.

After the questionnaires had been edited and coded, the information on them was transferred to tabulation sheets. Subject-matter specialists of the Bureau of the Census examined the tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further reappraisal of the original reports before approving the data for publication.

Presentation of Statistics.—This report contains data as compiled from the questionnaires used for the 1960 Census of Agriculture in the Virgin Islands. Totals are given for each of the three islands—St. Croix, St. John, and St. Thomas—and for the Virgin Islands as a whole. Comparable figures for preceding census years are given for those items for which information is available.

DEFINITIONS AND EXPLANATIONS

Descriptive Summary.—The definitions and explanations that follow relate only to those items that are considered to be inadequately described in the tables where they appear. Although they refer specifically to the 1960 Census of Agriculture, many of them also apply to earlier censuses. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the 1960 Agriculture Questionnaire in the appendix of this report.

GENERAL FARM INFORMATION

Census Definition of a Farm.—For the 1960 Census of Agriculture in the Virgin Islands, the definition of a farm was based primarily on a combination of "acres in the place" and sales value of agricultural products. The word "place" designates all land in the Virgin Islands that was under the control or supervision of one person or partnership. Control may have been exercised through ownership or management, or through a lease, rental, or cropping arrangement.

All places of 3 or more acres were counted as farms if any agricultural operations, as defined for the 1960 Census, were conducted. Places of less than 3 acres were counted as farms if 1959 sales of agricultural products amounted to at least $100 or if they could normally be expected to produce agricultural products in sufficient quantity to allow sales of at least $100. This additional qualification resulted in the inclusion as farms of some places engaged in farming operations for the first time in 1959 or 1960, and places affected by crop failure or other unusual conditions.

To avoid biases arising from an enumerator's personal judgment and opinion, the Census Bureau did not give enumerators the definition of a farm during either the 1960 or the 1950 Censuses. In the 1960 Census, enumerators were instructed to obtain questionnaires for all places considered farms by their operators, for all places of three or more acres (except nonfarm tracts such as parks, military reservations, etc.), and for all other places that had one or more agricultural operations.

In the 1950 Census, all places, regardless of size, were counted as farms if the total value of agricultural products in 1949, whether for home use or for sale but exclusive of home-garden products, amounted to $100 or more. Places for which the value of agricultural products was less than the $100 minimum because of crop failure or other unusual situation, and places operated in 1949 or 1950 for the first time were counted as farms if they could normally be expected to meet the minimum value criterion. Enumerators were instructed to obtain a questionnaire for every place that the operator considered a farm, for every place of 3 or more acres whether or not it was considered a farm, and for every place of less than 3 acres if the agricultural production in 1949 was valued at $100 or more.

In both the 1960 and the 1950 Censuses, questionnaires were filled for a considerable number of places that did not qualify as farms. The determination as to which questionnaires represented farms was made during the processing operations. Only those questionnaires meeting the criteria for a farm were included in the tabulations.

In the 1940 and earlier Censuses of Agriculture, enumerators were given a farm definition and were instructed to obtain questionnaires only for those places that met the definition. In 1940, farms included all places of 3 or more acres on which there were any agricultural operations and places of less than 3 acres if the value of agricultural products, whether for home use or for sale, amounted to $100 or more.

Because of changes in price level, the $100 valuation resulted in the inclusion of varying numbers of places of less than 3 acres in the Censuses of 1940, 1950, and 1960. The fact that sales of agricultural products in 1959 was used for places of less than 3 acres resulted in the exclusion of some places that would have qualified as farms if the value of $100 for agricultural products produced instead of the value of $100 for agricultural products sold had been the criterion for qualifying as a farm.

The farm definition for the 1930 Census was the same as in 1940 except that places of less than 3 acres with agricultural products valued at less than $100 were also counted as farms provided they required the continuous services of at least one person. In the 1917 Census, a farm was defined as "the land under the personal management of a single individual or firm, though consisting of different tracts, used for producing animals, fowls, and agricultural products, and operated or farmed by his labor, the labor of the members of his household, or by hired employees working under his personal direction."

Farm Operator.—The term "farm operator" designates a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner; a member of the owner's household; a hired manager; or a tenant, renter, or sharecropper. If he rents land to others or has land worked on shares by others, he is considered as operator only of the land which he retains for his own operation. In the case of a partnership, only

one partner is counted as an operator. The number of farm operators is considered to be the same as the number of farms.

Farms Reporting or Operators Reporting.—Figures for farms reporting or operators reporting represent the number of farms, or operators, for which the specified item was reported. For example, if there were 100 farms on an island and only 75 had chickens 4 months old and over on hand, the number of farms reporting chickens would be 75. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for each farm.

Where applicable, figures are given for the number of farms or operators not reporting items that were intended to be obtained for all farms; for example, years on farm. The number not reporting as compared with the total number of farms or operators, indicates the extent of incompleteness of the data for the item concerned.

Land in Farms.—All data relating to land tenure and to land in farms refer only to land located in the Virgin Islands. Except for managed farms, the land to be included in each farm was determined from the answers to questions about the number of acres owned, the number of acres rented from others or worked on shares for others, and the number of acres rented to others or worked on shares by others. The acres owned and the acres rented from others or worked on shares for others were first added together and then the acres rented to others or worked on shares by others were subtracted. The result represented the number of acres in the farm. The number of acres in a managed farm was the difference between the total land managed and that part of the managed land that was rented to others or worked on shares by others.

In the 1960 and 1950 Censuses, enumerators were instructed to record total figures for land owned, land rented from others, and land managed for others, including any part of the land that was rented to others. In censuses prior to 1950, enumerators were instructed to exclude all land rented to others and to record only that portion of the acreage owned, rented from others, or managed for others that was retained by the farm operator. Thus, the figures for the individual tenures of land are not entirely comparable except for 1950 and 1960. However, the land included in each farm was determined on essentially the same basis for all censuses.

Although the acreage designated "land in farms" consists primarily of "agricultural" land—that is, land used for crops, pasture, or grazing, and all land that farm operators rented to others—it also includes areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire acreage of woodland and wasteland that farm operators owned or rented from others was included as land in farms, unless reports indicated it was being held for nonagricultural purposes.

Land owned includes all land that the operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration.

Land rented from others includes not only land that the operator rented or leased from others but also land he worked on shares for others and land he occupied rent free.

Land rented to others includes all land that the operator rented or leased to others and all land that he assigned to others on shares or on a rent-free basis. For the most part, the land rented to others represents agricultural land but it also includes land rented for residential or other purposes. For land leased, rented, or worked on shares, the tenant is considered to be the operator even though his landlord may supervise his operations. The landlord is considered as operator of only that portion of the land not assigned to tenants.

Land managed includes all tracts of land managed for one or more employers by a person hired on a salary or wage basis. A hired manager was considered to be the operator of the land he managed since he was responsible for the agricultural operations on that land and frequently supervised others in performing those operations. Managed land was always to be reported on a separate questionnaire whether or not the manager also operated a farm on his own account.

Land in Farms According to Use.—Land in farms as of April 1, 1960 has been distributed according to the way in which it was used in 1959. The land uses described in the following paragraphs are mutually exclusive in that each acre of land is included only once even though it may have had more than one use during the year.

Cropland harvested refers to all land from which any crops were harvested in 1959, whether for home use or for sale. It also includes land in field crops that were grazed when mature or almost mature, land in nonbearing fruit and nut trees and plants, and land in nursery products grown for sale. Land from which two or more crops were harvested in 1959 was to be counted only once. Land used for other purposes either before or after the crops were harvested was to be reported as cropland harvested, without regard to the other uses.

Cropland in growing crops not harvested includes land from which no crops were harvested in 1959 but which was occupied by growing crops intended for harvest in 1960 or later (primarily sugarcane and pineapples). It does not include land in fruit or nut trees, nor land in crops harvested or intended for harvest in 1959 even if such land was replanted to crops for harvest after 1959.

Cropland used only for pasture includes land used only for pasture or grazing that the operator considered could have been used for crops without additional clearing or irrigating. Enumerators were instructed to exclude any land pastured after a crop was harvested from it. Permanent open pasture may have been reported either for this item or for "other pasture" depending on whether or not the operator considered it as cropland.

Cropland on which crops failed and idle land refers to all cropland intended for harvest in 1959 but that was not harvested because of complete crop failure, low prices, labor shortage, or other reason; and also to land that had been plowed and could be plowed again without first being cleared of brush but that lay idle throughout 1959.

Noncrop open or brush pasture refers to all land used for pasture or grazing in 1959 except cropland and woodland.

Woodland pasture includes all woodland where livestock pastured or grazed in 1959. In the Enumerator's Reference Manual, "woodland" was defined as referring "to all farm wood lots or timber tracts, natural or planted; and to cutover land with young growth which has or will have value as wood or timber."

Woodland not pastured includes all woodland, as defined above, that was not used for pasture or grazing in 1959.

Other land refers to all land not included in the preceding land-use classifications, such as house and other building lots, lanes, roads, ditches, land area of ponds, and wasteland.

Farm Ponds.—All reservoirs for water storage made by excavation or by construction of earthen or other dams were to be reported as farm ponds. Natural lakes or ponds were to be excluded unless they had been enlarged or improved for holding water. The size of each pond was to be reported in number of square feet when the pond was full.

Value of Land and Buildings.--The values presented in this report were compiled from operators' individual estimates of the market value of their farms. Market value was defined as the price which the farm operator would expect to receive for the land and the buildings if he were to sell them on the day of enumeration.

More problems and difficulties arise in the enumeration of farm real-estate values than in the enumeration of any other agricultural items. Most of the items enumerated require the operator to make a statement of fact. Reports concerning the value of land and buildings, however, are estimates based almost entirely on opinion. The majority of farms have not changed hands in recent years and are not currently for sale. For such farms, the operators are not likely to have any clear basis for estimating the value. An operator who would not sell his farm under any circumstances is likely to report an unreasonably high market value while an operator who acquired his real estate during a period of relatively low prices may estimate an unrealistically low value by current standards. Because of the extent of variation that is known to exist in real-estate values, it is difficult to devise checking procedures that will disclose inaccurate estimates.

Farm Mortgage Debt.--For 1960 and 1950, the data for farm mortgage debt relate to all land owned by an operator, including land rented to others. For 1940 and 1930, they relate only to the owned land retained by an operator for his own use.

Age of Operator.--For the 1960 Census, farm operators were classified by age into six age groups. The average age of farm operators was derived from the sum of the ages of all farm operators reporting age divided by the number reporting. The number of farm operators 65 or more years of age is an actual count based on the operators reporting age.

Birthplace of Operator.--In the 1960 Census, farm operators were classified by place of birth according to whether they were born in the Virgin Islands, in Puerto Rico, or elsewhere. The purpose of the question on place of birth was to obtain a valid measure of the native language abilities of farm operators as a guide to agricultural agents in preparing news releases for distribution to farmers. Need for information about language abilities had arisen since the 1950 Census as a result of the influx of Puerto Ricans into the Virgin Islands during recent years.

Residence of Operator.--Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated themselves lived on farms operated by others. In cases where all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated provided the dwelling he occupied was included in the rental agreement. The dwelling, in such cases, was not necessarily on the land being operated. Similarly, a farm operator who did not live on the land being cultivated or grazed but who had some agricultural operations (other than a home garden) at his dwelling was considered as living on the farm operated.

Year Began Operating Present Farm.--Enumerators were instructed to report the year during which a farm operator began to operate his present farm and, if the year was 1958 or later, also to report the month. The year was intended to refer to the first year of the period during which the operator had been in continuous charge of his present farm or of any part of it.

Work Off Farm.--The extent to which farm operators rely on nonfarm sources for part of their income is indicated by the number of days worked off the farm during the calendar year preceding the census. Data from the 1960 Census are comparable with those obtained in the Censuses of 1950 and 1940. In all three censuses, work off the farm was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions, whether the work was done on the farm premises or elsewhere. Exchange work was not included.

Equipment and Facilities.--Data obtained in the 1960 Census for the number of motortrucks, tractors, and automobiles on farms are comparable with those presented for earlier years. Farm operators were asked to report the number of each item on their farms at the time of enumeration, regardless of ownership. Items that were temporarily out of order were to be included but not any that were worn out. **Motortrucks** include pick-up trucks and truck-trailer combinations and also jeeps and station wagons if they were used primarily as trucks. **Tractors** include all wheel and track-laying (crawler) tractors, garden tractors, and home-made tractors. **Automobiles** include jeeps and station wagons if they were used primarily as passenger cars.

In the 1960 Census, for the first time, data were obtained as to the presence or absence of electricity, piped running water, and telephones. These facilities were considered to be on the farm if they were available anywhere on the place, whether or not they were in the operator's dwelling. "Piped running water" was defined as "water carried in pipelines by a pressure system or by gravity flow from a natural or artificial source." The data in this report represent the number of farms having the facilities specified. The difference between the number of these farms and the total number of farms represents the number of farms not having the facilities (except for nine farms that failed to report either their presence or absence).

Ownership of Sources of Farm Power.--Data regarding the ownership of tractor power and animal power used on farms were obtained for the first time in the 1960 Census. On the basis of the reports, farm operators were classified by tenure according to whether they used tractor power, used animal power, or used no power on their farms in 1959. The operators reporting use of power were further classified into five groups on the basis of ownership of the tractors or animals supplying the power. These five groups are as follows:

> Source of power owned by (1) the farm operator alone, (2) the farm operator and another person jointly, (3) the farm operator's landlord, (4) a private contractor, and (5) a government agency.

Twenty-four operators reported use of both tractor power and animal power. Therefore, the sum of the figures for operators reporting tractor power and for those reporting animal power is greater than the actual number of operators who used farm power.

Specified Farm Expenditures.--The 1960 questionnaire contained questions for five items of farm expenditures. For each item specified, the total cash expenditures made for the farm in 1959 were to be reported, whether made by the farm operator, his landlord, or both. A farm operator who rented part of his land to others was to report only the expenditures for the land he operated himself.

> Machine Hire.--Expenditures for machine hire relate to custom machine work, such as tractor hire, plowing, spraying, and hauling. Any amount spent for the labor included in the cost of machine hire was to be considered as part of the total expenditures. The cost of freight or trucking and exchange work without pay were to be omitted.
>
> Hired Labor.--Expenditures for hired labor were to include total cash payments made in 1959 to family members and to others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the crew boss were also to be included. Payments for the following types of work were to be excluded: Housework; contract construction work; custom machine work; and repair, installation, or construction work done by persons specifically employed for such work.
>
> Feed.--Expenditures for feed for livestock and poultry were to include total cash payments made in 1959 for pasture, grazing permits, salt, condiments, mineral supplements,

grain, hay, millfeeds, and any other items purchased for feeding livestock and poultry kept on the place. Expenditures made for the grinding and mixing of feed and the estimated cost of items furnished to the operator by a landlord or others were also to be included. Payments made by a tenant to his landlord for feed grown on the tenant farm were to be excluded.

Seeds, Bulbs, Plants, and Trees.—The total cash expenditures for seeds, bulbs, trees, vines, shrubs, or other plants purchased for the farm in 1959 were to be reported. The value of seed grown on the farm and the cost of products purchased for immediate resale without further cultivation and growth were to be excluded.

Fertilizer and Manure.—Expenditures were to include the total amount spent in 1959 for manure and commercial fertilizers of all kinds for use on the farm.

LIVESTOCK AND POULTRY

Inventories.—Although the questionnaire for the 1960 Census specified an inventory date of April 1, 1960, enumerators were instructed to report the number of livestock and poultry on hand at the time the questionnaire was filled. Reports made as of the day of enumeration have a higher degree of accuracy than those made for a specific date in the past, even though that date may be only a few days prior to the actual enumeration. Variation in the reporting dates for different farms is not considered to have any significant effect on total inventories inasmuch as the enumeration did not extend over a long period of time.

All livestock and poultry were to be enumerated on the place where they were at the time of enumeration, regardless of who owned them. Livestock running loose on unfenced land were to be reported as being on the place where the person who had control over them had his headquarters.

Inventory data for milk cows include all cows that had ever been milked, whether or not they were being milked at the time of enumeration. Data for cows milked and milk produced relate to the day preceding the enumeration. The questions about milk cows and milk produced were included in the 1960 Census primarily to serve as a basis for making monthly and annual estimates of milk production in the Virgin Islands.

Sales.—Data for sales of livestock, milk, and poultry products, as obtained in the 1960 Census, relate to the calendar year 1959. Enumerators were instructed to report total quantities and gross values, regardless of who did the selling or shared the receipts. Products given by a tenant to his landlord and products taken from an institutional farm for use by inmates of the institution were to be considered as sold.

CROPS

Crops Harvested.—The 1960 questionnaire was similar to the questionnaire used in previous censuses in that it provided for the collection of data for all field crops, vegetables, fruits, and nuts harvested on an individual farm. Individual inquiries were included for all crops commonly grown in the Virgin Islands; space was also provided for the reporting of any additional crops that were harvested in 1959. In the 1960 Census, data were also obtained for nursery crops and for value of forest products sold.

Acreage of Crops Harvested.—The area for individual crops was reported in terms of acres and tenths of acres harvested during 1959. In cases where two or more crops, or two or more plantings of the same crop, were harvested from the same land in 1959, the area was to be reported for each separate crop or planting. For field crops, the area from which an individual crop was harvested was asked only if the quantity harvested amounted to 200 pounds or more. Therefore, yields computed on the basis of the area and production figures for field crops harvested in 1959, as given in this report, may be slightly overstated for some crops.

For tree fruits and nuts, the figures for acreage and for numbers of trees and plants represent the situation as of the date of enumeration. The acreage relates to the total area in both bearing and nonbearing fruit trees and plants and planted nut trees of all kinds. The questionnaire for the 1960 Census did not include questions for acreage in individual kinds of fruits and nuts.

The acreage reported for vegetables relates only to the acreage harvested for sale and, for nursery crops, to the acreage grown for sale.

Quantity of Crops Harvested.—Data for quantity harvested in 1959 were obtained for field crops and for fruits and nuts. Total quantities of each crop harvested were to be reported, whether the crops were for home use or for sale.

The units of measure in which quantities were to be reported have varied for some crops from one census to another. The aim has been to permit reporting in the units of measure currently in use. In this report, the quantities harvested for each crop are usually expressed in the units of measure given on the 1960 questionnaire. To provide readily comparable information, data published in earlier reports in different units of measure have been converted to the units used in the 1960 Census.

Value of Crops Sold.—Data for value of crops sold in 1959 were obtained for each kind of vegetable and for fruits and nuts, nursery crops, and forest products. The gross value of quantities sold from each farm was to be reported, regardless of who did the selling or shared the receipts. Crops given to a landlord and crops produced on institutional farms for use by inmates of the institution were to be considered as sold. Comparable data for earlier years are available only for total vegetables.

CLASSIFICATION OF FARMS

Farms by Size.—Farms were classified by size on the basis of the total land area established for each farm. According to the Census definition, a farm is essentially an operating unit, not an ownership tract. All land operated or managed by one person or partnership represents one farm. In the case of croppers or other tenants, the land assigned to each cropper or tenant is considered a separate farm, even though the landlord may consider his entire land holding to be one unit, rather than several separate units.

Farms by Tenure of Operator.—In the 1960 Census, farms were classified by tenure of operator on the basis of data reported for land owned, land rented from others or worked on shares for others, and land managed for others. The same basis of classification was used in the 1950 Census.

During the processing operations for the 1960 Census, each questionnaire was coded to indicate whether the farm operator was a full owner, a part owner, a manager, or a tenant. The various classifications of tenure are defined below:

Full owners operate only land they own.

Part owners operate land they own and also land they rent from others.

Managers operate land for others and are paid a wage or salary for their services. Persons acting merely as caretakers or hired as laborers are not classified as managers. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as a second farm. If, however, he managed land for two or more employers, all the managed land was considered to be one farm.

Tenants rent from others or work on shares for others all the land they operate.

In the 1940 and earlier censuses, operators were classified on the basis of the land they retained for their own operations. A part owner who sublet to others all the land he rented from others was classified as a full owner; a part owner who rented to others all the land he owned was classified as a tenant.

Farms by Economic Class.—In the 1960 Census, for the first time, questionnaires were coded to indicate the economic class of each farm. The economic classifications represent groupings of farms that are similar in characteristics and size of operation. The economic classes were established on the basis of total value of all farm products sold or on the basis of total value in conjunction with the number of days the farm operator worked off the farm. Institutional farms were always classified as "abnormal."

The total value of farm products sold was obtained by addition of the reported or estimated values for all products sold from the farm. The value of livestock, milk, vegetables, fruits and nuts, nursery crops, and forest products was obtained from the farm operator during enumeration. The quantity sold was obtained during enumeration for chickens, chicken eggs, and miscellaneous poultry. To obtain the value of sales for these products, the quantity sold was multiplied by the estimated average price at which the product was sold.

For each of the field crops, the reported production was multiplied by the estimated average price. In the case of sugarcane, the quantity produced was always considered as sold. For the other field crops, however, the quantity produced was considered as sold only if the estimated sales value amounted to $100 or more.

Farms were grouped into two major categories, commercial farms and other farms, on the basis of total value of products sold. In general, all farms with a value of sales amounting to $2,500 or more were classified as commercial. Farms with a value of sales of $100 to $2,499 were classified as commercial only if the farm operator did not work off the farm 100 or more days during the year. The remaining farms with a value of sales less than $2,500 and institutional farms were included in one of the groups of "other" farms.

Commercial farms were divided into seven economic classes on the basis of the total value of all farm products sold, as follows:

Class of Farm	*Value of Farm Products Sold*
I	$10,000 and over
II	$7,500 to $9,999
III	$5,000 to $7,499
IV	$2,500 to $4,999
V*	$1,200 to $2,499
VI*	$500 to $1,199
VII*	$100 to $499

*Provided the farm operator did not work off the farm 100 or more days in 1959.

Other farms were divided into five economic classes as follows:

a. **Residential.**—Except for "abnormal" farms, all farms with a value of sales of farm products of less than $100 were classified as "residential." Some of these are farms whose operators worked off the farm 100 days or more in 1959. Others represent subsistence or marginal farms of various kinds.

b. **Part-time.**—Farms with a value of sales of farm products of $100 to $2,499 were classified as "part-time" if the operator worked off the farm 100 or more days in 1959. Part-time farms were further classified into 3 groups on the basis of the value of sales ($1,200 to $2,499; $500 to $1,199; and $100 to $499, respectively.)

c. **Abnormal.**—All institutional farms were classified as "abnormal," regardless of the value of sales. Institutional farms include those operated by hospitals, schools, agricultural experiment stations, Government agencies, etc.

Farms by Type.—Commercial farms were also classified by type for the first time in the 1960 Census. The type represents a description of the farm business according to the major source of income from sales of farm products. To be classified as a particular type, a farm had to have sales of a particular product or group of products amounting in value to 50 percent or more of the total value of all farm products sold.

The types of farms, together with the products on which type classification is based, are as follows:

Type of Commercial Farm	*Source of Cash Income* (Products with sales value representing 50% or more of total value of all farm products sold)
Sugarcane	Sugarcane.
Vegetable	Vegetables.
Fruit-and-nut	Fruits, nuts, and coffee.
Dairy	Milk. The criterion of 50 percent of total sales was modified in the case of dairy farms. A farm having value of sales of milk amounting to less than 50 percent of the total value of farm products sold was classified as a dairy farm if— a. Milk sold accounted for more than 30 percent of the total value of products sold and— b. Milk cows represented 50 percent or more of total cows and— c. The value of milk sold plus the value of cattle and calves sold amounted to 50 percent or more of the total value of all farm products sold.
Livestock	Cattle, calves, hogs, pigs, sheep, lambs, goats, and kids.
Poultry	Chickens, chicken eggs, turkeys, and other poultry.
General	Cash income from three or more sources and not meeting the criteria for any other type.
Miscellaneous	Horses, mules, asses, burros, nursery crops, and forest products.
Abnormal	All institutional farms.

NA Not available.
[1]Revised.
[2]For 1960 and 1950, figures relate to total land owned, including land rented to others; for 1940 and 1930, figures relate only to owned land retained by the operator.
[3]For part-owner farms, includes land rented from others as well as land owned.
[4]For part-owner farms, includes value of land rented from others as well as value of land owned.

T.
C.
Ty.

A1 No.

Section I.—PERSON IN CHARGE, APRIL 1, 1960

(Enter in question 1 the name of the person in charge of this place. Be sure that all information is for the person in charge.)

1. What is your name (person in charge)?

(If a partnership, give names of all partners)

2. What is your mail address?

(Post office)

Section II.—LAND OWNED, RENTED, OR MANAGED, APRIL 1, 1960

S

OWNED LAND: If you own more than one tract of land, include all land owned in the *Virgin Islands*. Include not only cropland but also pastureland, woodland, wasteland, etc.

3. How many acres of land do you own? None ☐ — Whole acres

(*If no land is owned, mark* X *in the square for "None" and skip to question* [4].)

(a) About how much would *this* land and the buildings on it sell for? $____/00 (Per acre) OR $____/00 (Total value, dollars only)

(b) Is there any mortgage debt on the land and buildings owned by you? No ☐ Yes ☐

(c) If "Yes," how much? $____/00 (Dollars only)

LAND RENTED FROM OTHERS: Include any separate fields, pastureland, woodland, wasteland, etc.

[4] How many acres of land do you rent from others? Include acres worked on shares. None ☐ — Whole acres

(*If "None," mark* X *and skip to question* [5].)

(a) About how much would *this* land and the buildings on it sell for? $____/00 (Per acre) OR $____/00 (Total value, dollars only)

(b) What is the name and address of each landlord and the number of acres rented from or worked on shares for each?

Name of landlord	Acres rented from this landlord?
Mail address (Post office)	
Name of landlord	Acres rented from this landlord?
Mail address (Post office)	

(Total acres for all landlords must equal total for question 4.)

OR

LAND MANAGED FOR OTHERS:

[5] How many acres of land do you operate for others as a hired manager? (If a hired manager, enter the name and address of employer under question 4(b).) None ☐ — Whole acres

(*If "None," mark* X *and skip to question* [6].)

(a) About how much would *this* land and the buildings on it sell for? $____/00 (Per acre) OR $____/00 (Total value, dollars only)

LAND RENTED TO OTHERS:

[6] How many acres of land do you rent to others? Include acres worked on shares by others. None ☐ — Whole acres

(*If "None," mark* X *and skip to question* [7].)

(a) About how much would *this* land and the buildings on it sell for? $____/00 (Per acre) OR $____/00 (Total value, dollars only)

ACRES IN THIS PLACE:

[7] Adding acres owned and acres rented from others, then subtracting acres rented to others, we get → Acres in this place —

(Question 3 plus question 4 minus question 6; if managed, question 5 minus question 6.)

Section III. CROPS HARVESTED ON THIS PLACE IN 1959

Y

Include all crops harvested *last year* (on the land in question 7) whether harvested by you or by someone else. Be sure to include the landlord's share. Do not include crops which were a complete failure or which were not harvested because of drought, labor shortage, low prices, or destruction from any cause. (Report tenths of an acre, such as 1/10, 2/10, 1 1/10, etc. Always report any production but do not report the area if less than 200 pounds were harvested.)

FIELD CROPS HARVESTED LAST YEAR

(*For each crop, ask these questions.*) →

Were any of these crops harvested *last year*—

	No	Yes	(1) How much was harvested *in 1959?* (Give acres in col. 2 only when quantity harvested is 200 or more pounds.)	(2) How many acres were harvested *in 1959?* Acres	Tenths
8. Corn, dry?	☐	☐	Lb.		/10
9. Beans, dry?	☐	☐	Lb.		/10
10. Cassava?	☐	☐	Lb.		/10
11. Sugarcane?	☐	☐	Tons		/10
12. Sweetpotatoes?	☐	☐	Lb.		/10
13. Tanya?	☐	☐	Lb.		/10
14. Yams?	☐	☐	Lb.		/10
15. Other field crops?	☐	☐	Lb.		
Give name					/10
Give name			Lb.		/10

VEGETABLES FOR HOME USE AND FOR SALE:

16. Were any vegetables or melons harvested *last year*—

(a) For use by your family? No ☐ Yes ☐

(b) For sale for fresh market or to canners? No ☐ Yes ☐

(*If "No" for* (b), *mark* X *and skip to question* [29].)

(*If "Yes" for* (b), *answer questions* 17 *through* 28.)

(*For each crop, ask these questions.*) →

Were any of these vegetable crops harvested for sale *last year*—

(If two or more plantings of the same crop were made, either on the same land or on different land, report the total harvested acres of the several plantings. Include acres of vegetables harvested from land from which other crops were also harvested.)

	No	Yes	(1) How many acres were harvested *in 1959* for sale? Acres	Tenths	(2) What was the value of sales *in 1959?*
17. Green beans?	☐	☐		/10	$____/00
18. Cabbage?	☐	☐		/10	$____/00

Cashews? Coffee? Mamey? Mesples? Papayas? Soursops? Sugar-apples?			Give name		Quantity
			Give name	Number	Number	Unit
						Quantity
			Give name	Number	Number	Unit
						Quantity

41. What was the **value** of **all fruits** and **nuts sold** *last year*? . . None sold ☐ $_____/00 (Dollars only)

TREES, ORNAMENTALS, FLOWERS, AND VEGETABLE SEEDS AND PLANTS IN 1959:

[42] How many acres of **flowers** and **flowering plants, fruit** and **nut trees, ornamentals, vegetable seeds,** or **vegetable plants** were grown *last year* (*1959*) for **sale**? . . . None ☐ Less than ¼ acre ☐

Acres	Tenths
	/10

(Report tenths of an acre, such as ¼, 1¼, etc.)

(If "None," mark X *and skip to question* **[44]**.)

43. What was the **value** of sales for **flowers** and **flowering plants, fruit** and **nut trees, ornamentals, vegetable seeds,** or **vegetable plants sold** *last year*? . . . . . $_____/00 (Dollars only)

Section IV.—FOREST PRODUCTS CUT IN 1959

[44] Were any **fence posts; wood** for charcoal, other fuel, or furniture; or **other forest products** cut on this place *last year*—

(a) For **use** by your family? . . . . . No ☐ Yes ☐

(b) For **sale**? . . . . . No ☐ Yes ☐

(If "No" for **(b)**, *mark* X *and skip to question* **[46]**.)

45. What was the **value** of **forest products sold** *last year*? . . . . . $_____/00 (Dollars only)

Section V.—ACREAGE, APRIL 1, 1960, AND USE OF LAND IN 1959.

[46] **Acres in this place** (copy acres from question 7) → Acres

(In questions 47 through 54, account for all the land in this place in terms of how it was used *last year*.)

CROPLAND IN THIS PLACE:

47. From how many acres of land were **crops harvested** *last year*? None ☐ Acres
(This area may be obtained by adding the acres of the various crops reported in questions 8 through 42 in Section III. However, if more than one crop was harvested from the same land *last year*, count this land only once here.)

48. How many acres of land were in **growing crops** *last year* that were **not harvested**? . . . . . None ☐ Acres
(Include here any land in sugarcane, pineapples, etc., from which a crop was not harvested *last year*.)

49. How many acres of land that could be used for crops without additional clearing or irrigating were used only for **pasture** *last year*? . . None ☐ Acres

50. From how many acres of cropland was **no crop harvested** *last year* because of failure or destruction, or because the land was idle *in 1959*? None ☐ Acres

OTHER PASTURE OR GRAZING LAND:

51. How many acres of land were in **nonerop open** or **brush pasture** and **grazing land** *last year*? . . None ☐ Acres

52. How many acres of **woodland** were **pastured** or grazed *last year*? None ☐ Acres

ALL OTHER LAND:

53. How many acres of **woodland** were **not pastured** or grazed *last year*? None ☐ Acres

54. How many acres of land are in **house lots, barn lots, lanes, roads, ditches, ponds,** and **wasteland**? None ☐ Acres

Add these acres (questions 47, 48, 49, 50, 51, 52, 53, and 54) and enter the total here → Acres

(These totals must be the same)

FARM PONDS:

55. How many **farm ponds** are on this place? None ☐ Number _____

(If "None," mark X *and skip to question* **[57]**.)

56. What is the **size** of each pond? . . . (Report either length and width or "square feet.") _____ (Feet) by _____ (Feet) or _____ (Square feet)
_____ (Feet) by _____ (Feet) or _____ (Square feet)

Section VI.—AGE, RESIDENCE, AND WORK OFF FARM

[57] Where were you born? *(Mark one.)* →

(1) Virgin Islands ☐	(2) Puerto Rico ☐	(3) Elsewhere ☐ (Give name of place)

68. How old were you on your last birthday? . . . . Years _____

59. Do you live on this place? . . No ☐ Yes ☐

60. When did you begin to operate this place? . . . . . (Report month if person in charge began to operate this place since *January 1, 1958*.)

Month	Year

61. How many days *last year* did you work off your place? Include work at a job, business, or profession off your place. (Do not include exchange work.)

(Mark one.) →

(1) None ☐	(2) 1 to 49 days ☐	(3) 50 to 99 days ☐	(4) 100 to 199 days ☐	(5) 200 or more days ☐

Section VII.—EQUIPMENT AND FACILITIES NOW ON THIS PLACE, 1960

Include all equipment on this place, whether owned by you or by others.

		Number
How many of the following are on this place—	62. Motortrucks?	
	63. Tractors of all kinds?	
	64. Automobiles?	
Do you have on this place—	65. Electricity?	No ☐ Yes ☐
	66. Piped running water?	No ☐ Yes ☐
	67. Telephone?	No ☐ Yes ☐

68. Who owned the following sources of power used on this place *last year*

(Check one square for each item.) →	Source of power used was owned by— You (the operator)	You (the operator) and another person jointly	Your landlord	A private contractor	A government agency	Power not used
(a) Tractors?	☐	☐	☐	☐	☐	☐
(b) Horses, mules, burros, and work oxen?	☐	☐	☐	☐	☐	☐

Section VIII.—EXPENDITURES IN 1959

If you are renting land from others, include all expenses for this place paid by you and your landlord.

69. How much was spent *last year* for **machine hire**? (Include custom work, such as tractor hire, plowing, and hauling.) . . . None ☐ $____/00

70. How much was spent *last year* for **hired labor**? (Do not include housework or contract construction work. Include cash payments only.) . . . None ☐ $____/00

71. How much was spent *last year* for **feed** for livestock and poultry? (Include cost of grain, feed, concentrates, and roughages; also amounts paid for grinding and mixing feed.) . . None ☐ $____/00

72. How much was spent *last year* for **seeds, bulbs, plants, and trees**? . . None ☐ $____/00

73. How much was spent *last year* for **purchase of fertilizers and manure**? . . . None ☐ $____/00

Section IX.—LIVESTOCK AND POULTRY ON THIS PLACE, APRIL 1, 1960, AND LIVESTOCK PRODUCTION IN 1959

Include all animals on this place owned by you and by others.

HORSES, MULES, AND ASSES AND BURROS, APRIL 1, 1960:

74. How many **horses, mules, ponies, and asses and burros** of all ages are on this place? . . . None ☐ Number ____

(If "None," mark X and skip to question **[78]**.)

Of this total, how many are—

75. *Horses* and *colts*, including ponies? . . . Number ____

76. *Mules* and *mule colts*? . . . Number ____

77. *Asses* and *burros*? . . . Number ____

(The total for questions 75, 76, and 77 must equal the number for question 74.)

CATTLE AND CALVES, APRIL 1, 1960: (Include all cattle and calves, both dairy and beef.)

[78] How many cattle and calves of all ages are on this place? . . None ☐ Number ____

(If "None," mark X and skip to question **[86]**.)

Of this total, how many are—

79. **Cows**? (Include heifers that have calved.) . . . Number ____

80. **Calves** born since *January 1, this year*? (Include only the calves that are on this place now, whether born on the place or bought.) . . . Number ____

81. **Heifers and heifer calves** born before *January 1, this year*? (Do not include any heifers that have calved.) . . . Number ____

82. **Bulls, bull calves, steers, and steer calves** born before *January 1, this year*? . . . Number ____

(The total for questions 79, 80, 81, and 82 must equal the number for question 78.)

COWS MILKED:

83. How many **cows** *now* on this place have ever been **milked**? . . None ☐ Number ____

84. How many **cows** were **milked** *yesterday*? . . . None ☐ Number ____

85. How many **quarts of milk** were produced *yesterday*? . . . None ☐ Quarts ____

MILK SOLD LAST YEAR, 1959:

[86] How much **milk** was **sold** *last year*? . . None ☐ (a) Quarts ____ (b) Value of milk sold $____/00

(If "None," mark X and skip to question **[87]**.)

HOGS AND PIGS, APRIL 1, 1960:

[87] How many **hogs and pigs** of all ages, including sows and boars, are on this place? . . . None ☐ Number ____

(If "None," mark X and skip to question **[90]**.)

88. How many are less than 4 months old? . . . None ☐ Number ____

89. How many are 4 months old and over? . . . None ☐ Number ____

(The total for questions 88 and 89 must equal the number for question 87.)

SHEEP AND LAMBS, APRIL 1, 1960:

[90] How many **sheep and lambs** of all ages are on this place? . . . None ☐ Number ____

GOATS AND KIDS, APRIL 1, 1960:

91. How many **goats and kids** of all ages are on this place? . . . None ☐ Number ____

ANIMALS SOLD ALIVE IN 1959:

(For each kind, ask these questions.)

	(1) How many were **sold** *in 1959*? None	(1) Number	(2) How much was the value of **sales** *in 1959*?
92. **Horses, mules, asses, and burros**?	☐		$____/00
93. **Cattle and calves**?	☐		$____/00
94. **Hogs and pigs**?	☐		$____/00
95. **Sheep and lambs**?	☐		$____/00
96. **Goats and kids**?	☐		$____/00

POULTRY: NUMBER, APRIL 1, 1960, AND PRODUCTION IN 1959:

97. Are there any **chickens, turkeys, or other poultry** on this place, or were any kept *last year*? . . . No ☐ Yes ☐

(If "No," mark X and skip to question **[103]**.)

(If "Yes," ask questions **98** *through* **102**.)

98. How many **chickens** (hens, pullets, roosters, etc.) 4 months old and over are *now* on this place? . . . None ☐ Number ____

99. How many hens, roosters, pullets, cockerels, and broilers were **sold** *last year*? (Do not include baby chicks.) . . . None ☐ Number ____

100. How many **dozens** of chicken **eggs** were **sold** *last year*? . . . None ☐ Dozens ____

101. How many **turkeys, ducks, geese, and other poultry** (not counting chickens) were raised *last year*? . . . None ☐ Number ____

102. How many **turkeys, ducks, geese, and other poultry** (not counting chickens) were **sold** *last year*? . . . None ☐ Number ____

Section X.—ENUMERATOR'S RECORD—To be filled by Census Enumerator

[103] *Who furnished the information in this report?* (*Mark one.*) Operator ☐ Wife or other member of operator's family ☐ Landlord ☐ Hired laborer ☐ Neighbor ☐ Other ☐ Give name
